USA online casinos

When American government passed the UIGEA in 2006, opinions of people split up. The same situation was with the states. As a matter of fact, Kentucky was the first state started acting against online casinos. In 2008 Kentucky Governor seized 141 domain names. Until now there are no decisions made on domain names seizure suit. It seems that everything goes back to its starting point. New suit concerns payments, and it is said that those online casinos who were working illegally at Kentucky state, have to pay revenues. Now the suit is passed to the court and trial begins. Situation arose according to statute of the state which had never been used before. We have tried to throw light upon the situation specially for you
