The unveiled of Apple iPad has shown the world about what is modern tablet should be and there are still more to come. Like I have mentioned in several posts I think the Apple iPad's customer is people who use their computer for the daily life basis such as surfing the internet, read some online article or e-book, watch picture & movies, listen to music, play leisure game, and work with iWork application. I believe this is a very huge group of (Who will be) the iPad's customer.

As to me, iPad also used during a month, and now the daily utilization rate is still high, my version is

3.2.2

native, it cannot escape the fact that I do not escape or little effect on the free application was fully sufficient, Some people might say not enough too envy. My greatest passion is reading, strophe iPad, not only can download a large number of books, many famous magazine has also published in version App Store for a special iPad, such as the Bund, Southern Weekend, the people's daily, etc, the amount of information

completely meet the needs of the news of my day. If this is not enough, they may conduct research at the large number of data VeryCD in pdf IPAD with cloudreader for me to read at any time.

During the reading of a book takes most of the time, but tell me, the biggest change in habits or surfing the Internet, the original base is not considered to be used with itouch on the site, the police cannot simply not read small, therefore once more to verify information or to open the computer, and now the screen of 10-inch iPad experience of the Internet is very attractive, are looking for step specifically optimized for mobile phones Mobile version of the page, enter the URL directly on the line, the display of the standard font and smooth operation of contact, so that the Web browsing and reading are also comfortable, the natural frequency of the use of computers at least. Some users often complain of the safari automatic recharge, but for me, this is precisely the point that I like and quick answers forums, if they are not automatically updated to reread an article back to the list page, and I don't always have to manually update their own problems than you. (

## Students! Are You Still Feeling Boring During Your Lectures?

As teachers, We all deeply know that how to make our lectures more interest, attractive and effective! We are trying to integrate computer technology into teaching, such as PowerPoint, multimedia courseware! And we are continuing exploring more powerful and practice teaching tools that can help educators finish the teaching work more effectively!

"One of the main contributors to student boredom is the use of PowerPoint. PowerPoint slides are a powerful aid to today's lecturer, who can use it to easily prepare dozens of slides to accompany a lecture. And that is the problem - lecturers tend to prepare too many slides, pack them with too much information, and whizz through them in a manner that obliges students to spend most of the session attempting to copy copious amounts of text from the screen, while bypassing active processing of the material."

How can we change this terrible situation? Do you have a suggestion for educating educators?

We think that good teachers will always be good teachers no matter whether they use PowerPoint or not - are they able to keep students' attention? I use PowerPoint in all my classes and students often tell me how interesting the classes are. It's the PowerPoint that makes students bored, In my personal experience, I create a PowerPoint for my lesson plain using a PowerPoint to video software, it is a nice aid that I can create attractive Presentation and convert PowerPoint to video format, then I can play it on PC, and upload it to teaching website for download! It is a nice ideal!

It will help you create captivating and attention-grabbing classroom presentations using Microsoft PowerPoint. You'll learn

basic PowerPoint skills such as creating slides, using templates, inserting text, changing background colors, creating WordArt titles, and adding slide transitions. You'll also develop advanced skills such as inserting graphics, sound, and video, custom animations, timed transitions, and hyperlinks.

You'll be able to publish your presentation on a school Web site or even take your PowerPoint shows on the road. You'll also be able to create presentations filled with scanned drawings created by your students or digital photograph slide shows. This class will assist you in learning these skills.

By using

PowerPoint

to video converter tool to create your presentation, you can maintain a record of the material that you cover during the school year. Students who miss lesson topics, or have difficulty understanding them, can easily revisit them later, by adding intuitive audio and animation to make the students understood and accepted more efficiently. Of course, there are plenty of other factors outside of multimedia presentations that affect student learning. It's safe to say a teacher's skills are still more important than the visual method used to deliver the course's curriculum. Nevertheless, we can all use a little help with our teaching, and a PowerPoint slideshow that enhances, rather than detracts from or slows down, the learning process is all to the good.

Finally, let me tell you that I am a college teacher, so I was evaluating and adopt this teaching assistant from the point of view of a teacher first! As educators, we should try out best to help our students accept knowledge more efficiently! We are struggling !

There are so many questions about "TV

Shows on iPad" from Yahoo Answer:

Are you always searching online for how to watch TV on iPhone, iPod Touch, iPad?

Do you want to watch all kinds of sports on your Cell Phone and Wii?

How to watch movies and TV shows on my ipad?

How to download movies/TV shows onto my iPad?

What you can watch live?

Sports

NBA, NBA Playoffs, NFL, Super Bowl, NHL, MLB, NCAA, Baseball, Basketball, Football, Soccer, Tennis, NASCAR, UFC, Boxing, Golf, The Masters Tournament, F1, Olympic and more.

TV Channels

ABC, CBS, CBS Sports, NBC, FOX TV, ESPN, CWTV, HBO, BBC, CCTV, CNN, and more.

TV Shows

American Idol, Fringe, CSI, Glee, Supernatural, Smallville, House, V, NCIS, Criminal Minds, Grey's Anatomy, Gossip Girl, Bones, One Tree Hill, Dancing with the Stars, Two and a Half Men, How I Met Your Mother, 90210 and more.

So how can we watch TV and Sports live on your Mobile Device ?

Today we are going to show you the best way to watch everything on your iPad, iPhone, iPod Touch. This tutorial shows you several ways for

watching TV shows on your iPad. Just choose the way you like to download and watch TV shows on your iPad freely!

Watch TV Shows on iPad with FilmOn

If you think that watching Live TV Shows on iPad and iPhone is really great, you will surely want to get

FilmOn! It allows you to watch live TV shows on iPad or iPhone 4 absolutely for free! It streams videos online and has HD quality television shows from CNN, BBC, Sky News etc.

Tips: The thing which is going to really surprise you is that

FilmOn is not an app. You can access

FilmOn in the safari browser of your iOS device by going to

<http://www.filmon.com/>

. Moreover it allows you to view the TV schedule, pause a live show etc. If you want to watch DVD movie on iPad, you may need a

DVD to iPad mac software to  
help you convert DVD to iPad!  
Watch TV Shows on iPad for Free with Clicker

Clicker  
is a Web site that acts as a TV Guide for all the Web's video  
(including the network stuff), and if you visit it from the iPad,  
you'll get all iPad-compatible video. Whether you're looking for  
shows like The Guild or the latest from ESPN, it's all on Clicker.  
With the help of it, you don't need  
mac iPad converter  
when you want to put Tv shows on ipad!

Watch TV Shows on iPad for Free with Netflix

Netflix  
is also one of the best and most complete iPad video  
applications. The constantly growing library has full seasons of TV  
shows like Friday Night Lights and Mythbusters, and a huge  
collection of movies ranging from mob dramas like The Godfather to  
light-hearted animated films like Up.

Watch TV Shows on iPad for Free with Network TV Sites  
Many network shows can be viewed with the Hulu Plus app, and  
some of other apple program like  
PDF

to ePub for mac to  
convert  
PDF to ePub for ipad but many of the networks have more  
complete solutions, with lots of extra material and  
information.

ABC has a free app with plenty of recent episodes of its  
shows, as well as the ABC TV schedule and information about its  
lineup. The

CBS site  
is iPad-optimized, so you can watch episodes, clips and more  
right from Mobile Safari.  
Bravo has an iPad app for streaming full episodes, and  
TBS has one with more limited functionality.

Now you can watch TV shows on your iPad freely!

Tip: If you want to convert the downloaded movies to iPad compatible format, the video converter for iPad or DVD to iPad converter for mac may help you a lot. It can convert both DVDs and video file media to iPad video and iPad movie formats.

Apple's product is absolutely not a luxury, like the fashionable area of LV, Prada luxury brands that adhere to the policy is limited and custom, and has a lot of advertising, such as large conferences, celebrity endorsements, mass media, film and television drama plant income, etc.; and Apple it has been a higher measure of line brands, like iPod, at the end of 2009 exceeded 220 million units sold worldwide, in developed countries is to achieve a staff, and iriver, iAUDIO, Sony, Samsung price of the product than the iPod brand is higher, naturally, a lot of luxury. Look at iPad, this listing priced at 499 dollars in products that are not expensive, the price 359 dollars, iPad 16GB cost 260 dollars, 499 dollars, the profit ratio is lower than its competitors, this route has always been higher profits for Apple, it can be said is unimaginable.

iPad is not "E-inkPad"

iPad is not "E-inkPad", not only because iPad does not use electronic ink technology, but is not in itself iPad iBook as the main selling point to the same excellent book also for other functions appear to be relatively bleak. iPad specifically for reading and very few people buy, and no high demands on the reader. From a practical point of view, some heavy contact with the text in the e-book reader, you can be recognized by such a reading, but they are more concerned about the content, often neglected equipment, it is generally still adhere to the traditional way of

reading, would like to take the first step difficult. But iPad don't support PDF perfectly, so you can use PDF to ePub mac to help you convert PDF to ePub for your iPad. I always do like so!

In the end, should "Prison Break"?

iPhone on the popular 'Prison Break' (JailBreak), that is, through cracking tools, so iPhone can not accept restrictions on the free installation of a variety of procedures, iPad As a result of the same and the iPhone operating system , naturally, you can 'escape' to achieve , but Apple has some special products, but highly integrated Apple products, always guide the user to focus on practical applications, rather than those more can only function when the display.

Software is not possible, contrary to install a lot of software, but will find yourself using nothing more than a few, just like before, like playing PlayStation, thousands of pirated games, played only real serious 2,3 . So I do not recommend is a more 'Prison Break' (JailBreak) on the one hand respect for the labor of the software of the other, so that they can make the best use and avoid waste of resources. If users want to watch DVD movie on iPad, not "prison Break" just using

DVD

to iPad converter for mac to help you transfer DVD to your iPad device and enjoy it!

Why not support Flash?

This is not to mention scores between Adobe and Apple, we only see Apple iPad this does not really support Flash, the current application on the network, Flash I do not know what percentage of

occupied, but at least not a majority of video sites to see, SNS on farm can not steal food, the focus of the portal map does not show up , but even though it can not support flash, you can also use iPad video converter to convert FLV and Youtube video to iPad.

The official statement by Steve Jobs, is not compatible with Flash is to be able to run more smoothly iPad, A4 processor clocked at only 1GHz, not compatible with Flash can dramatically improve the battery life. In fact, in my opinion this is only an excuse it, do we use iPad you just browse the web, Flash is not compatible with the negative impact of experience, Steve Jobs would never know, all simply because Apple wants to promote The new HTML5 web development standards.

iPad changed what? We need to buy it?

We really need to not buy iPad it? Of course not, for the author to himself, iPad only improve their own lives, but did not fundamentally change the lives lost can still ask the people around them, send a message to the weather conditions, we used to sit in the movies TV preamplifier DVD, free iPad converter, DVD to iPad ripper, play games, we also have PS3, XBOX360.

Maybe we see some novel applications iPad can smile, psyche admire Apple's design, but the iPad design of these novel and can not be a factor in our decision to purchase, hand-held mobile device market has been broken down, although iPad integration of many applications, but mobile devices have been armed for the good of us, do not do a good job adding new Ding's ready, so iPad "for admission" status for some time decided that it was still only a small crowd groups have, if the reference to mobile phone popularity of the road, we found that prices in fact played a decisive factor, but it works on the iPad you, of course, does not work, I believe that the iPad Moreover, prices have been low enough, and it needs only a sufficient appeal to all of the

highlights of the application of this in the end what is it? Can only wait and see.

perfect it? iPad saved the next generation?

iPad real enemy? Perhaps only iPad themselves.

(no subject)

As apple ipad fans, so far, I have been falling in love with ipad, but when I found so much defects of ipad, I fell little disappoint! So, I write down my thoughts, and my experience about ipad.

So many people the world over have already started loathing the idea of buying and carrying around the supersized, not-so-cool tablet PC called iPad. Many say it's a big disappointment and definitely not worth the \$499 tag price. But many people are on the other side of the fence. So why you should get yourself an iPad?

In people's first impression, iPad is a lack of innovative products, a time cries of disappointment - not that an amplified version of the iPhone / Touch it? Border thick, shape no surprises, no camera, no phone function, non-OLED, do not support flash, does not support multi-tasking, there is no USB interface. On the surface, it does not like Steve Jobs described it, "brilliant", but mature enough to make it the design killer so far the best flat-panel products.

#### 1. Web browsing insufficiency

While Apple CEO Steve Jobs (Steve Jobs) has not revealed at the press conference, but the iPad browser does not support Flash, which makes a lot of sites can not be displayed properly on the iPad. Even if not entirely dependent on Flash, but many popular sites still use Flash to build some of the elements, so iPad, visit these Web sites can not show all content. This problem can not be ignored.

#### 2. The lack of DVD or Blu-ray drive

iPad wasn't equipped with CD-ROM drive. Indeed, iPad is a mobile

device which is not ready to replace the computer. But Apple still use them as an entertainment device to promote, in that case, should naturally provide a convenient feature film or television. So, if people want to watch DVD to CD movie on iPad, the only way is you must draw upon third-party software to accomplish the desire,  
free  
DVD to iPad converter or  
iPad  
converter free would definitely be a nice option which is worth giving it a try!

### 3. Starter Edition is not meaningful

Many people believe that the minimum price of \$ 499 is reasonable enough to attract consumers to buy iPad. But to note that the \$ 499 Starter Edition does not include 3G module iPad, and storage space is only 16GB. This product is only applicable to those who use at home and do not store too much content iPad users, but the positioning of iPad is a portable entertainment device. If the lack of 3G connectivity, and storage space is only 16GB, it can not provide a rich mobile entertainment experience.

### 4. Application compatibility is not good

Apple spent a lot of time to the application developers to demonstrate the operation of iPad. Apple even said, iPhone App Store without modifying existing products to run on the iPad. Nevertheless, iPhone applications still need to be upgraded to be able to adapt to larger screen iPad. This is disappointing.

### 5. Does not support multitasking

If you want to use the iWork office is also able to surf the Internet, it must be disappointed, because this function can not be achieved iPad. Jobs also did not mention at the press conference iPad does not support multitasking. In today's tablet PCs, multi-tasking is not only a demand can even say that is a must.

### 6. Can not output video

Despite claims iPad support HD content through iTunes, but after seen the iPad will find that the product is not equipped with video

output interface. This allows users to high-definition TV or monitor can not watch video content unless using free mac iPad converter. So far, iPad video features still seem to rely on iTunes to achieve.

#### 7. Reading experience is so poor

IPad did not use the E-Ink technology, or OLED display, it can not be achieved for a long time to read, and read features is highly recommended by Apple. Indeed, iPad technology allows users to view color books, but more suitable for E-Ink e-reader, because the technology can mimic the real books, but also for a long time to read and not feel tired. iPad is like reading a book with the iPhone, reading the same in the large, for most readers, this is not the best experience. What's more, iPad doesn't support PDF format perfectly, as to me, I always use PDF to epub for mac for converting PDF to ePub with easy.

#### 8. Does not support USB devices

Although Jobs said, iPad with many built-in features, but users still bound to add some peripherals. Because not equipped with USB and FireWire connections, making it difficult to add peripherals. Although Apple said that the base can be used by an external peripheral, but users must therefore buy another product. Apple does not support the USB interface is a big mistake committed.

#### 9. Can not print documents

When users receive important documents on the Mac and want to print it out, just click the "Print" button can be realized. But iPad does not provide this functionality. Although positioned as an Apple iPad between the iPhone (mobile Internet) and notebooks between the products, but this Tablet PC can not connect to other devices to print tasks. The lack of this feature will make many people are hesitant to buy iPad.

10. Expected to appear a better alternative

Jobs said at the event, iPad is a revolutionary product. However, further investigation will be difficult to find, it is simply a large iPod Touch only. More importantly, Dell, HP and other vendors in this area may deliver better products

iPad

video converter for mac. Apple certainly do not want users to know this, but when the user is not aware of iPad tablet PC market, the best, there might be surprised.

Finally, As we know, apple iPhone, iPad, ipod and some of other digital products of Apple company are walking into people's life gradually and plays a significant roles in our daily life. Even though there some unavoidable limitation and defects, but we should believe iPad is striving to change everything, we are looking forward.....

## How to View YouTube Videos on iPad

Around few days ago, I have release some blogs regard the iPad doesn't support flv movie, and today, for those who want to view youtube video on ipad, I particularly take some time to list a practical tutorial on how to play YouTube video on ipad with ease! Please keep attention!

As we all know that iPad's high pixel screen play make it play YouTube video better, and it is convenient to watch the video through YouTube for Apple iPad, and this tutorial will introduce you how to view YouTube video on Apple iPad. You will need software:

YouTube to

iPad converter and iTunes.

YouTube for Apple iPad is a application which designed to meet the advantages of iPad, iPad's high pixel screen play make it play YouTube videos better. The app's Browse related YouTube video interface is redesigned for iPad, to be more convenient to watch the video search and viewing. This tutorial will introduce you how to view YouTube video on Apple iPad. If you are also looking for

ways to watch YouTube on iPad, then you are right here. In this article, we will introduce the following two parts.

First up, we must know that most of YouTube videos are FLV formats, and some are MP4 formats with higher resolution. All of these YouTube videos couldn't be played back on new iPad directly.

Now, the

best

iPad converter would be the best option that can convert

YouTube to iPad supported video formats. Besides, if you are a mac user, the

mac

DVD to iPad converter is also a good choice!

The Following is the Step-by-Step

Tutorial on How to Play YouTube video on iPad

Step 1 :

Free Download YouTube Videos

Find YouTube icon in the main menu, and click it to visit YouTube.

KeepVid is the top one website for downloading streaming videos from websites. Type the specific YouTube URL to the KeepVid address bar. Then it will lead you to the downloadable page while clicking the "download" button

Step 2 :Add YouTube video to Program.

After enter into the YouTube, you can see all kinds of video clearly, Click "Profile" drop-down list to select the output format for your iPad. Then click the "Convert" button to start converting YouTube video to iPad formats.

Tips: if you are windows user, the DVD to ipad

converters would be also your optimal option.

Step 3 : Choose the output format and start converting.

Search the videos by type the text into the search box.

Step 4 : sync the video to your iPad  
with iTunes, then enjoy movies on iPad.

By the way, the next Generation of iPad - Apple iPad 2 has been released for some days, so, I also search the  
mac  
DVD to iPad 2 converter or  
DVD  
to iPad ripper for your convenience.

(no subject)

Now, let's take some time to deeply study and analyze the development trend of Tablet, As we all know that iPad's greatest contribution is to develop a new tablet PC market , before smart phones smart phones are the focus of attention, and in the recycling of the iPhone, iPad pomp and miracles, the Tablet PC into a smart phone alternative you start a new battlefield the new market also means more opportunity. Android beat ipad?

Apple iPad's success stems from the successful experience of smart phones, they will be the good user experience design for induction, and then transplanted to the iPad iOS up, which made an unexpected success. To know the iPad has just launched, most people who hold a skeptical attitude, because it looks more like an enlarged version of the iPod Touch, Apple can not be a phone call from the handheld digital device.

iPad's success is not important for other companies, they are more concerned about the ability to replicate such success but it can not be pasted. We know BlackBerry smartphone vendors (Blackberr) has been introduced in the earlier their Tablet PC - "Playbook", the PC manufacturer Hewlett-Packard (HP) has introduced a system based on webOS phone and tablet PCs, they have in common

are along the Apple tablet PC from the phone to the evolution of the line, expect to have gains in this market. So a very important question is, Android iPad tablet computer is able to defeat a new world leader? But in my humble opinion, due to the biggest flaw of Apple iPad, which can not support Flash, DVD and some video formats and PDF ebooks. For some apple fans who want to watch DVD, pdf on ipad, they have to buy some converter to get help, here I highly recommend two free tool:

free

DVD iPad converter and

free

PDF to ePub converter.

Additionally, For some time past, the iPad was pretty slender, for its time. But if you looked at it from the side, it was still visible. Admittedly, so is the iPad 2, but you do get the feeling that it is at least another step towards Apple's eventual goal of creating a computing device so slender it has to be observed under an electron microscope. And it weighs fully 100 grammes less than its morbidly obese predecessor, which will shave valuable seconds off your time in the race for the last free seat near the wi-fi outlet in Cafe Nero.(if you are the mac user ,you can do search iPad converter for mac or iPad converter mac in the google rearch)

Android can beat the iPad tablet? I think perhaps with "more than" the word would be more suitable, because the emergence of Android Tablet PC just lets some users have a new option, and firm Apple fans will still support Apple's own iPad, Both user groups are not for exactly the same, but it looks Android Tablet PC should be able to gain more consumers.

As it is known to all, The field applied also become wider and wider, such as business, education, medicine and almost every field. However, there are still many people that can not fully take its advantages, By following these simple steps, you will be up and running in no time at all and impressing all of your visitors with your talents!

To help those who is willing to invest This tutorial shows how to insert Flash into PowerPoint 2007, insert Flash into PowerPoint 2003 easily.

Tips: If you want to export PowerPoint to flash video, the guide on how to convert

PowerPoint to flash may help you out of this problem.

How to Insert Flash into PowerPoint 2007/2003

Step 1. Insert the flash movie to your PowerPoint . The specific steps may be slightly different in PowerPoint 2003 and 2007.

After you have opened the Control Toolbox you will have an option box on your

Step2: After you have opened the Control Toolbox you will have an option box on your screen which looks like the one in Figure

2

After you have drawn your animation box you will have something similar to figure 3, a transparent box with 6 white dots representing the 4 corners as well as the top and bottom of the

animation. At this point, if the size is not quite right, you can resize the animation.

step3: You now need to edit the properties of your Flash animation. You will see a white box with an X through it on your screen, this is your animation. Right click on the box and then select Properties from the menu (Figure 4).

step4: A Properties box will now appear on your screen. Double click on the (CUSTOM) setting at the top of the menu as in figure 5.

Done! That's all the process of how to insert flash movie to PowerPoint 2007, insert flash movie to PowerPoint 2003. So easy? And you can also convert your PowerPoint presentations to flash format and video format like AVI, MP4, FLV, MKV, MOV, WMV, SWF, etc. with the best PowerPoint to video converter. You can easily convert PowerPoint presentation to various video formats.

## The Easiest Methods to Watch DVD, YouTube and PDF to iPad Freely

In most time, a lot of my net friends have been asking me how to rip DVD to iPad on mac os, to help these friends, I particularly take some time to collect the most practical and easiest method for those who are in need of ripping and watching DVD on iPad. with it

you can play your favorite commercial or home made DVD movies on your widescreen iPad and watch them wherever you go?

As we know, iPad only supports H.264, MPEG-4 in MP4, MOV, M4V formats, and MP3, protected AAC, AAC, Audible, Apple lossless in AAC, MP3, M4A files. That is to say, you need to rip DVD to iPad Mac in friendly formats. The

DVD

to iPad converter Mac is your ideal choice!

What you need to know:

H.264 video up to 720p, 30 frames per second, Main Profile level 3.1 with AAC-LC audio up to 160 Kbps per channel, 48kHz, stereo audio in .m4v, .mp4, and .mov file formats  
MPEG-4 video, up to 2.5 Mbps, 640 by 480 pixels, 30 frames per second, Simple Profile with AAC-LC audio up to 160 Kbps, 48kHz, stereo audio in .m4v, .mp4, and .mov file formats

How DVD to iPad Converter Works?

(1) Guide: How to Rip DVD to iPad on Mac OS X

Step 1: Load DVDs.

Launch the DVD to iPad Ripper for Mac and click the "Load DVD" to open your DVD folder, then select the VIDEO\_TS folder and click "OK".

Tips: you can also use the

DVD

to iPad ripper to finish the same work.

Step 2: settings

Choose the output path and the needed format.

(2) Guide on how to watch YouTube video on iPad with this software.

Firstly, Free download YouTube video form KeepVid, just copy and past the YouTube url on KeepVid address bar.

Add YouTube video and choose the out file as

MP4.

Tips: the  
iPad  
converter free also a good tool! Recommend you give it a  
try!

### (3) Guide on how to read PDF on iPad

Reading PDF files on iPad is an amazing thing. Unfortunately,  
iPad does not support PDF format directly. So if you have an iPad  
and want to

read

PDF on iPad anywhere and anytime, you need to convert PDF  
documents to ePub for iPad first, Then load the ePub files in  
iBooks app on iPad for flip page style ebooks reading. Let's see  
how to makes it. Just use the PDF to ePub converter.

Step 1: Launch the Converter and add the PDF files.

Step 2. Set the output name/range and output path, and start  
converting.

Tips one: Import your Contacts to  
iPad

Are you frustrating with no way moving your contacts from app to  
iPad? as I knew that I could keep my contacts forever and never

have to worry about moving them. But despite the ease of web based email, its just not as powerful as system based email applications. Thankfully to Google.

If you are using iPad for the first time, then you need to add contacts to the app, but adding each one manually is not only a time consuming one but also a tedious task. You can import contacts to your iPad using iTunes installed on your PC.

Under the info tab, scroll down and you can see contacts listed. You can sync contacts to your iPad using this feature.

You are able to choose which contacts you need to sync with, the app allows Outlook, Google Contacts, Windows and also Yahoo address book. If you've chosen an online contacts option like Gmail, then you may need to login to your Google/Yahoo account.

Tips two: How to Put DVD movie on iPad

This tips is especially designed for those who want to play DVD movie on iPad, PowerPoint presentation, pdf e-book on iPad freely.

The tools required:

mac iPad converter

and

PDF to ePub mac. They are

free. So you can try the trial version.

the steps is extremely easy, so you can do it by yourself! But if you wan to view PowerPoint Presentation on iPad, you need a

PPT to video

converter to turn PPT into MP4 format, and sync it to your iPad.

Tips three: How to Change the Default Search Engine in Safari in iPad

As we all know that Safari Web browser is the default web browser for Apple's iPad and it comes with almost all features of a standard browser. Just like normal web browsers, The default search engine is Google and if you want to change it, you can do it from the settings. This tips is mainly telling you how to change the default search engine in Safari browser in iPad.

If you receive an Adobe PDF file in an email on your iOS device or maybe you want to download a PDF file from a website then it's now possible to store and read it right in the iBooks App from Apple.

I wanted to make sure that I had a copy of the book on my iPad so I could show friends and prospective buyers examples of the content in the book. The ebook comes in a PDF

format, but I wanted to read it in the iBooks app since it does such a wonderful job of displaying the printed word. Was I going to have to convert the PDF file to the app's native EPUB format before I'd be able to read it in iBooks? Unfortunately, iPad does not support PDF format directly. So if you have an iPad and want to read PDF on iPad anywhere and anytime, you need to convert PDF documents to ePub for iPad firstly.

Firstly make sure you have iBooks by opening up the App Store on either your iOS device or in iTunes and downloading it. And follow the steps below to learn how to convert

PDF to ePub document for iPad, iPhone, iPod or Kindle.

Step 1. Launch the PDF to ePub

converter program and add the PDF files you want to convert by clicking the "Add File" or "Add Folder" button.

Step 2. Set the output name/range and then choose an output folder for saving the converted files.

Tips: if you use mac os, here PDF to ePub mac is specifically designed to convert PDF to EPUB Mac, making it possible to view PDF files on eBooks supporting EPUB format. Adobe Acrobat or Reader is not required when converting PDF to EPUB and all original PDF features will be preserved after conversion.

Step 3. When settings are done, simply click the "Convert" button to start converting PDF to ePub.

After converting PDF to EPUB, you can easily use iTunes to sync your PC or Mac with your iDevice and then transfer your eBooks!

pdf,ipad,converter,  
Are you looking for a software to converting PDF to ePub so that you can watch it on iPad, iPhone,iPod touch? You just come the

right place. Here, this article will mainly introduce the most practical conversion tool for you reference.

Firstly, you need to know about EPUB format!

EPUB (short for electronic publication) is a free and open e-book standard by the International Digital Publishing Forum (IDPF). "EPUB", which allows publishers to produce and send a single digital publication file through distribution and offers consumers interoperability between software/hardware for unencrypted reflowable digital books and other publications, is designed for reflowable content, meaning that the text display can be optimized for the particular display device.

The fast and efficient

PDF to ePub mac is

specifically designed to convert PDF to EPUB Mac, making it possible to view PDF files on eBooks supporting EPUB format. Adobe Acrobat or Reader is not required when converting PDF to EPUB and all original PDF features will be preserved after conversion.

Guide: How to Convert PDF to EPUB Mac

Step 1: Import

Select PDF eBooks on your Mac and drag them into the panel, or choose File-> Add PDF Files in the menu bar, you can easily add PDF eBooks for conversion.

Step 2: Customize (Optional)

Select PDF to EPUB-> Preferences... in the menu bar, you can easily set the output folder for the converted EPUB eBooks.

Step 3: Convert

Step 3: Convert

After customize the output settings, click Convert button converting

PDF to ePub. The conversion will be finished in seconds. Then you can click on the EPUB icon to open the destination folder to get the converted EPUB eBook

What's more: The PDF

Editor for mac not only enables users to edit PDF text, insert images, and annotate on PDF files, but also allows users to convert PDF to Word on Mac OS X. The Mac PDF Editor is an application that can help you view, edit, annotate and convert existing PDF documents on Mac OS X.

### iPad movie for Father's Day

I was lucky enough to have a fantastic dad. A dad who was smart and funny and loving. A dad that my brother and I learned a lot from. Now we're both fathers and if we turn out to be half the dad that he was we'll have done a very fine job.  
Let the countdown begin! Father's Day is three weeks from today. I am sure you already have some awesome ideas to show your dad just how much you appreciate all he has done for you, but just in case you are looking for some last minute ideas to round things out, you should check out these iPad apps.

Kung Fu Panda 2 (originally entitled "Kung Fu Panda 2: The Kaboom of Doom") is a 2011 3D American computer-animated action comedy film and the sequel to the 2008 film Kung Fu Panda. The cast of the original film reprised their voice roles. The film was released on May 26, 2011 in Real D 3D and Digital 3D.

### Best Father's Day Movies on iPad: Pirates of the Caribbean 4

As we all know, the Apple devices iPad, iPad 2 is the best device for watching movies, unfortunately the iPad supported formats are limited, we offer the

DVD to

iPad converter and

mac iPad converter

for you, this is a suite which can rip DVD and convert video to iPad supported formats with ease.

Captain Jack Sparrow crosses paths with a woman from his past, and he is unsure whether it is love or if she is a ruthless con artist who is only using him to find the fabled Fountain of Youth. When she forces him aboard the Queen Anne's Revenge, the ship captained by the formidable pirate Blackbeard, Jack finds himself on an unexpected adventure in which he does not know whom to fear more: Blackbeard or the woman from his past.

### Best Father's Day Movies on iPad: Father of the Bride

Father of the Bride is arguably one of the best movies to watch on the occasion of Father's Day. This hilarious comedy deals with a worried father, played by, Steve Martin, who is too possessive to give away his daughter when she decides to marry. With an unmatched performance of Steve Martin, this 1991 flick, focuses on issues related to marriage, parenting and interaction among the family members.
