Introduction:

overseas media wrote, though iPad can compatible with many iPhone application, because of the difference of size and function configuration, it makes iPad's application market difficult to be predicted.

Joy coexists
with grief

Major iPhone application developers have exploited over 140,000 applications for this kind of cell phone. This group goes from strength to strength. But apple's new product iPad, to these developers, may be a good news or a disaster.

Many developers, including game company and media company, indicated that the opportunity iPad brings is exciting, it is not difficult for small screen application to fit iPad, while some developers found that iPad will be a challenge. For example, same with iPhone, iPad also is not allowed application to be ran in backstage, so users can not run multi-procedure at the same time like PC.

To Internet Broadcast Company ---Pandora, It is not a big problem in iPhone. Because users usually listen their music when do their exercise. But to iPad users, they may probably listen their music when they read e-book..

Video is
restricted

Though iPad isn't equipped with webcam, it is in some developers' expectation. Because iPad is not that small and exquisite like iPhone, the function of webcam is not that outstanding. Making some photography and video application of iPhone can not transfer to iPad in the existing form. So iPad users had to use

iPad dvd converter

to convert video to iPad.

Internet Telephony Service like Skype had to use video to communicate and sent immediate message because with no webcam, at least it is so far. So is iPhone. But compare to laptop, the convenience of iPad is inadequate. Spokesperson of Skype said, "They are researching the device of iPad and hope to find an experience method for excellent users."

When asked the opinion of the prospect of iPad application market, spokesperson of apple quoted apple Senior Vice President---Scott Forstall's words "It will be developers' gold mine".

Advantages
remain

But there are still some developers who are full of enthusiasm of the change that iPad brings, especially the big screen. Game developers are not longer restricted by the 3.5 inch screen of iPhone. Cell phone Social Game manufacturer SGN said, their company can transfer the Fight Game "Skies of Glory" in iPhone to high-quality 3G multiplayer like Xbox 360. Their company also plans to shift iPhone to hand shank, the same with WiFi hand shank controlling iPad.

Software Company SonicMule once pushed out iPhone game application "Ocarina". Ge Wang, The company's alliance originator, said iPad can not only make some large virtual instrument possible, like guitar and harp, but also can give a mark according to users' performances, so as to provide a whole new experience for users.

Though apple didn't publish iPad's whole development plan, publishers were inspired. They said most iPhone application can be ran in iPad directly without modification. Publishing company Conde Nast is now optimizing some magazine's electronic edition.

Disadvantage
is numerous

Same with iPhone, iPad also doesn't support Flash. Users can watch YouTube through preloaded YouTube application. But users can not watch video in website like Hulu because of lacking the support of Flash. Adobe wrote in his blog, "Apple still restricts device, it will have a deep effect to publishers and consumers".

Some iPhone applications that play an important role when users are proceeding can not transfer well enough. For example, Loopt Company develops a Social Network basing on geographical position. The company plans to add more guide functions, such as restaurant and vocal concert. But they will not depend on real-time information. Because they realize that users are unlikely to bring their iPad anywhere and anytime.

Sam Altman, the CEO of Loopt, said, "To Loopt, the situation may change. We will push out Loopt application facing iPad, but it is hard to gain the same success."

iPad plays such a significant role in someone's life, so you almost want to say out the words "married with iPad" to him. Some people really get married, not with their iPad, but using iPad to preside over the wedding.

Bride and bridegroom both use iPad instead of paper to read out their wedding vows, even

the solemn priest holds a iPad to conduct the ceremony to announce them man and wife. Not content with simply having the vows read from an iPad, the groom then proceeds to halt proceedings at the critical moment to whip out his iPhone and 'update his Facebook and Twitter status'.

The bride stands patiently by while her husband-to-be snaps a quick photo, before he finally tears himself away from his iPhone to lean in and kiss his bride.

Inevitable? Maybe, but that doesn't keep it from being a little sad: A recently married couple had their wedding conducted via iPad. The officiant is even fiddling with it when they kiss after taking their vows. What's more, in the middle of the ceremony, the groom whips out his iPhone to Tweet and update his Facebook status.

Making iPad involved in wedding, such kind of cozy spectacle may be appeared in many other wedding ceremonies in the future. While I can't say that I'm ready to read my vows from an iPad just yet, it certainly is one of the more unexpected places that we've seen the lovely device show up.

If we hold an innovative iPad, why not add innovative element in our own wedding? What's more, you will find that iPad can be your good assistant preparing your wedding. Such as, keeping your wedding video to iPad, it can store your video safely. So using

mac ipad video converter,

you don't need to worry about the sacred day deleted. Using

dvd to iPad converter

to play your favorite songs on iPad in the ceremony, don't you think that is splendid? Sharing your precious photos with your family and friends, all these can hand over to iPad. In addition, 100 Wedding Tips and Wedding Guests, such kinds of apps, may help you who are terribly defeated.

An iPad, on the other hand, weighs less than 2 lbs, and is the perfect tool to show off your wedding photographs. It's small, chic and rugged and is the perfect portable solution to showcasing the images from your beautiful day. That is why all Wedding 2.0 Packages will include an album and other tangible items along with an iPad... or two.

I see the iPad as being a very slick presentation tool for photographers. Let's face it, desktop terminals and laptops are a bit clunky and somewhat impersonal for presentations. The iPad is a lot like a picture frame. It's uncluttered. Whether showing work to a potential bride, or showing off some proofs post-shoot, I can see this as being an ideal tool.

The new era of wedding photography has arrived and you have seen it right here first at Paramour Photography.
The new era that iPad overwhelms wedding has arrived

All right, Thanksgiving Day is knocking on the bell. This festival, held the last Thursday of November, continues until Sunday and for many still has meaning more special as it marks the start of the holiday season. You will find information about Thanksgiving Day as a holiday heartfelt and popular.

Make the most of Thanksgiving Day by expressing love and admiration for everyone who cares for you and everyone special to you! Thanks to all of the people who helps me in my past, current and future life. Try and remember everyone who did something good to you - those who were present with you when you badly wanted their support, or those who brought smile on your face when you were in a pensive mood. Think a little and there will be so many people whom you owe big thanks. This Thanksgiving Day, make it a point to thank all of them.

There are a variety of things and gift ideas which can be tried out this Thanksgiving Day. Gift them a tight-warm hug, a beautiful flower, a pretty Thank You card or a beautiful Thanksgiving Day Gift like turkey wee bear, fun family games, gourmet snack gift basket, Thanksgiving books, music, Thanksgiving videos, Thanksgiving greetings, etc, to express your sincerest love and admiration for them. Remember

the size of the gift does not matter; it is the feeling behind the gift that really counts. So go ahead and select a beautiful Thanksgiving gift and share the blessings of God with your friends, family, relatives and loved ones.

The special gifts for my respected mother, like flower, jewellery, cloth, household gift, perfume are all mentioned before. This year, I want to give a special gift to my dear mother. I want nothing else but iPad to my dear, greatest mother who gave life to me to show my sincere love to her. She likes watch movie such as Annie Hall, A Night at the Opera. In her spare time, she likes to walk around, so I bought an iPad to her, no matter where she goes, she can enjoy it.

However, as we all known, iPad has not USB port, before we play dvd on our iPad; we should convert dvd to iPad compatible format. In order to enjoy it without trouble for my mother, I should buy

iPad video converter

to help her transfer the movies. I searched a lot of information from internet and I have learned

how to convert DVD to iPad

. I find that it is very easy to use. I am full of confidence to teach my mother to do it.

Another reason that I choose iPad as the thanksgiving gift is that to stop my mother breed the thought: she is separated herself from the modern time because of the getting older and older age. Teaching her how to use iPad and convert the movies she loves can enhance her confidence of keeping pace with society and get rid of boring time. iPad and iPad video converter are the best gifts for my mother as the gift for Thanksgiving Day this year.

What is the gift for your mother this Thanksgiving Day, my friends

i¼

Share your with me!
