New Taxi Dispatch Available Online

Here

at T Dispatch HQ we've been working hard to implement further developments to our system. Having had our soft launch on 30th May at the Private Hire and Taxi exhibition in Coventry, we're now approaching our general release. T Dispatch, our new taxi dispatch system, will be available with online sign up at the end of July. 'Hurrah', we hear you cry!

We've

had a great deal of interest in our system, from cab offices large and small; the great thing is, our price plans make the best taxi dispatch software accessible to them all. We're able to do this because, unlike other systems on the market, there is no hardware required. T Dispatch is a web-based private hire and taxi dispatch system, built in the cloud. As such, we negate the need for hardware, installation costs and call-outs for servicing. Our price plans reflect these cost-effective savings, making T Dispatch affordable for everyone.

With

T Dispatch, we don't require you to sign on the dotted line. You're not fastened into a contract, which means our price plans are available on monthly subscriptions for as long as you wish to use the system. Each plan is categorised by the number of drivers within a fleet, so it's tailored to the size of your business. Plus, we have a Free Plan, which is suitable for cab offices with up to three drivers. It's perfect for those starting small, so they can manage their client base as well as offering the opportunity to those who wish to trial the system initially.

Together

with great rates, you'll also receive system updates at no extra cost. When new features are added, you'll receive a system notification informing you of a new function or improvement. Things have never been better in this industry, and for those cab offices wishing to bring their business into the 21st century.

Just

because we have made a complex system that enables you to use T Dispatch wherever you wish and not in one fixed place, doesn't mean it has to be complicated to use. Its functionality is simple; we wouldn't have it any other way. The straightforward User Guide that comes with your subscription tells you all you need to know, so you should have no difficulty getting to grips with it.

Upon

our launch, you can subscribe via the website to receive your login and User Guide, and away you go. You'll soon be able to use this revolutionary system to run your cab office much more efficiently, from wherever it is you wish. Even if it's at home in your pyjamas!
