## White ipod touch turn up

It is seems that all the apple fans are waiting for something, such as iphone 5, ipod nano 7.etc, what about you? Are you also expecting a new thing from apple? Yes, it is my dream of getting a white ipod touch in the near future.

As you likely know by now, Apple has been rolling out it's iCloud service today, as promised. In turn, Apple has released the new white iPod touch in their retail stores today. These devices come pre-loaded with iOS 5 and are ready to be used with iCloud.

As many of you know the White iPod Touch 4G or iPod Touch White was announced on October 4th 2011. We had anticipated an iPod Touch 5G from Apple but it seems we won't see that until 2012. The iPod Touch White is the first touch to come with the iMessage and iCloud and will operate on Apple's iOS 5. Apple gave the White iPod Touch 4G an upgraded retina display as well as High Definition video capability. The iPod Touch White will also feature an upgraded gyroscope allowing for greater sensitivity to movement. The White iPod Touch has a very stylish and looks incredible in a lighter color. iPod Touch White / White iPod Touch 4G will be available in stores on October 12th 2011.

Pure white appearance of coquettish showing off rival

Appearance

Do you remember the white iphoen 4? Athough it is delayed for a year-long, but it turned out to be on the market. Now, the new ipod touch's coming is unexpected for our apple fans. We look forward to the release of IPhone5 , white version of the iPod Touch suddenly surfaced, giving us too many surprises. Many people prefer the white, the white version of the registry would allow more fans to join the ranks of fruit powder.

Now the iPod Touch hsa black and white two colors, the appearance has not changed, the same ultra-thin design, size 110×58.9×7.2mm, 101 grams, the figure to be light, easy to carry. I bet as an ipod fan, you will not miss the wonderful design.

Performance

The new iPod Touch comes with IOS system, support ICloud services, and equipped with a new IOS5, the latest iOS5 with 200 exciting new features.

With iCloud this feature to make life more simple, you can put their own content through the iPod Touch Mac, IPhone, iPad connected display, whether you download songs, pictures, games, or a number of software such as ipod to computer through icloud with ease. Of course, if you have little idea of icloud, you can also

directly
transfer
ipod to new compuer with ease as long as you download a
istonsoft ipod to computer transfer tool which is an excellent iPod
to PC Transfer software, and specially designed for iPod users. It
can fast backup and
copy
ipod to computer including Music, Movie, Photo, Book,
Audiobook, Voice Memo, Podcast, TV Show, Playlist and more from
iPod to PC.
New iPod Touch also has a free text message sending features,
you can use iMessage to achieve the free transfer of information,
equipment issued to any one IOS5 own information, of course, such a
transfer is not limited to text, you can use it to transfer
pictures, video and contacts, etc in a convenient and simple wau.
What is more, with this iMessage feature, we can send our messeges
in mass. How cool it is!
Apart from these, the white iPod Touch uses the 960×640
resolution screen, which can attractive more users. And the new
technology will also allow the retina display even better, clearer
text, pictures, more bright colors, to a great extent, we will have
a great visual effect to watch video.
Given that, what are you hesitate for? Just buy it in the first
time and play with it on the go!

## Show you around ipad 3

It is well known that apple is a great company in America,
which has produced the most popular iphone, ipad, ipod etc. As an
apple user, do you want to pay your attention to the latest news
about apple? How can we get the most information from apple?And
as an apple powder, what are you expecting for? An iphone 4, or
ipad 3 or others? Maybe as an
ipod user, you have been very familiar to
play with ipod or iphone such as
how to transfer songs from ipod to computer,
how to copy ipod to mac , how to play games on ipod, how to
delete photos from ipod, how to
transfer music from ipod to computer etc, but

do you want to have a better

learn of the upcoming

ipad 3? What will be the ipad 3 like? Now,

let's have a

first

look at it together.

iPad 3 Features

A6 Processor

The current

Apple iPad 2 has a 900MHz dual-core ARM

Cortext-A9 processor, Apple A5 chipset and PowerVr SGX543MP2 GPU.

This certainly made

the Apple iPad 2 a powerful tablet and a

main competitor in the world of tablets. Now Apple is aiming to

make the competition tougher by sporting an A6 Quad-core

Processor in the iPad 3. This would make the iPad 3 as powerful

as any high-end desktop.

According to Linley Group senior analyst Kevin Krewell, "We

expect the A6 will be a quad-core ARM Cortex-A9 design, which

would be competitive with next year's best

mobile processors. In 2012, Nvidia will

offer a quad-core Cortex-A9 processor, and Qualcomm will have the

aforementioned MSM8960, a dual-core A15-class processor operating

at 1.7GHz.

iOS 5

The iPad 3 will come with the latest iOS 5, which will host

the multi-touch gesture

technology. However, analyst and tech

enthusiasts predict that Apple would introduce OS X Lion for the

tablet, since it will be powered by a quad-core processor.

This will also include multitasking features, such as

notifications, task-finishing, app-switching, location and

background sound.

3D

Feature and New Retina Display

Apple enthusiast expected the Retina Display feature on
Apple iPad 2; however, Apple has been
working majorly for an improvised version
of it to include it in the iPad 3. With the Retina Display
feature, the screen resolution of the
iPad3 will be 2048 x 1536 pixels. However,
it is said that the third version of the tablet is delayed due to
Retina Display issues, and Apple is expected to ship the tablet
in early 2012.

There are speculations that the tablet will display the 3D
view. Although it's too early to expect features like 3D display,
devices like the LG Optimus can record videos in 3D, and output
the same through
HDMI.

After learn above, I bet you must have a better learn of
ipad 3, all we have to do is just wait and see what will happen.

Given that, I bet the upcoming ipad 3 must be one of the
best-selling tablets in the world. If you are interested in it,
you may as well to put aside some
money to buy one to enjoy.

### Review the Apple memory-iPod tenth anniversary playback

Now when it comes to the recent high tech products, most of us
maybe think of Apple. Yes it is a common sense that Apple products,
such as ipod, ipad, iphone etc not just a player, but also a symbol
of fashion symbol, a kind of living conditions, a living
phenomenon. As long as Apple products have a small move, people
around the world will feel the butterfly effect. And the geographic
scope, influence, is well known.

Speaking of MP3 products, we think the most is the first
Apple product, Apple is also a wide variety of products, including
the iPod series, a work of art, which not only form a culture but
also MP3's representative.

Remember back in 2001, Steve Jobs introduced the iPod in
Apple's headquarters in it? Apple was making mistakes and because
the previous economic crisis has entered a double test of the next
period of instability, when the newly appointed CEO Steve Jobs made
Apple become a make a cultural creation. On October 23, 2001 iPod
was born. Now it is often the case that we can see most of people
listening music with an ipod touch or nano when they are waiting in
the bus stop or subway. For them, they are master-hand in playing
with ipod, such as how to transfer music from ipod to computer, how
to
transfer
ipod to new computer etc, all of things like this just are a
small piece of cake, because they are the first generation
ipod-players.

With the birth of the first generation ipod, the team of
Steve Jobs did not stop to think, Apple launched their own music
store, iTunes, for the convenience of downloading and buying

user-friendly, with more resources, in the past nine years, they
proved the wisdom of past choice for a number of ipod update, make
more selling ipod, ipod series is now counted in addition to many
already, and now the market to Shuffle, Nano, Touch the fire. With
various of its products, now we can have more choices  for us,
such as we can copy our computer music or photos to ipod for
enjoying everywhere, or
transfer
music from ipod to mac in case of losing ipod.

Now Apple products are a kind of wave, a kind of faith. Prior
to Apple back in 2001 just a common technology company, has not so
many people concerned, but with Apple's product innovation and
gradually grow, it has become the world's largest technology
companies, Apple also will become a culture and beliefs, how many
people crazy, obsessed Apple products intensified. As long as there
have been what Apple ring, the world would so many believers,
regardless of time of day and night stick, these "believers" also
got a name - "powder"

Now, the tenth anniversary of the Ultimate sparkling debut -
iPod Touch 4 has become the hottest selling products of Apple, and
it compared with previous generations, from the appearance actually
changes are not large, but a more slim. But in performance, but has
been a qualitative leap, loaded with the latest ioS 5.0.0 and a new
social system FaceTime function. For a more high-end better.

Now how do we define ipod in our hearts location? In fact,
over time the growth, technological advancement, iPod series is
certainly to be replaced, but the process of being replaced is very
distant.

Extensive reading:as an ipod user, you maybe meet various
kinds of questions related to transfer or copy, if you don't know
how to do it, or If you want to be a master-hand of ipod, you can
just feel free to come to the professional ipod to computer
transfer for you which will teach you
how
to transfer music from ipod to mac, how to transfer ipod to pc
free and so on.
