## How to rip and convert DVD on Windows and Mac

This guide is mainly about how to convert DVD and rip DVD.

Before you start reading the guide, you may have this question, why you need to convert your DVD if you can watch it on DVD player.

Below are some reasons that can convince you to do that.

1. DVD is mpeg-2 video, but

iPod, iPhone, Zune, PSP, etc support only MP4 video, you have to convert your DVD to the right format, and then you can put them on portable player.

2. Video editor such as Windows Movie Maker, Sony Vegas, iMovie, etc are not support DVD directly, you have to convert your DVD for editing.

3. The DVD has CSS copyright protected; you want to bypass the DVD copyrigh protection.

4. You want to copy your favorite DVD movie to computer for backup, keep it from scratching.

5. You want to rip some clips from the DVD to computer and upload it to Youtube, Myspace, blog, etc.

6. DVD has

region code limitation; you want to watch your American purchased DVD on your English DVD player.

Now, if you sure you want to convert DVD or rip DVD, let's start the guide. The tool you need is this
