We should all try to save electricity by making a concerted effort of concerned and conscious citizens. We are so used to living with power that most people never even think about it unless it goes out. "Battery life" means the time your iPad will run before it must be recharged. To maximize the amount of battery usage you get on your iPad 2, you can change certain settings within the device.

So you want to save electricity on iPad no matter how many hours Apple Inc claims iPad can last. Here we will introduce several tips for saving electricity on iPad.

Tips for saving electricity on iPad:

Tips 1: Make sure that you have set the "brightness" option to the lowest. You know in the ordinary course of events the function has no much to help but use very much power.

Tips 2: Try to keep your iPad at room temperature.

The iPad burns power much faster when it is at higher temperatures than room temperature. Don't overuse your iPad and wait for it to cool down every 30 minutes or so. This will ensure that your iPad lasts longer.

Tips 3. Turn off location services

1/4

If you not

play

video on iPad, you should turn off the videos.

An increasing number of applications now want to track your location, and will continue to do so unless you turn this tracking off. To check which applications are running location services, go to Settings > General > Location services. You can set location services to be off for all or just select applications.

Tips 4: Turn Wi-Fi off if you are not using Wi-Fi.

Because when Wi-Fi is always turned on, iPad will last about an hour or so shorter than if it is turned off. Also, if you are using an iPod Touch or iPhone put

video to iPad

Mac

, turn the "Push" option off too.

Tips 5: If you have played movies on iPad for a long time, you'd better turn off your iPad to have a rest. It's good for you and your loved iPad.

Tips 6:Auto-Lock Sooner: You can determine how quickly the iPad's screen should lock when it hasn't been in use. The shorter the time before it locks, the less battery you'll use. To change this setting, go to Settings -> General -> Auto-Lock and choose your interval.

As you can see, there are things that can be done to save on your electric that don't even cost anything, other than a few minutes of time to flip a switch. Still, there are lots of choices you can make to adjust the settlements. Since any operation is controlled by you, so you can do personal option.

The recent tablet PC revolution has changed the way we perceive and use the personal computer. Just as Apple came out with its iPad 2, Amazon released its Kindle Fire Tablet PC, with a very market-friendly price tag of \$199 to boot. The personal computer is now more personal and can be with us anywhere we go!

Comparison between Apple iPad 2 and Amazon kindle fire

Price

While the iPad costs \$499 for the base model, Kindle fire at \$199 costs \$300 less than the iPad 2. According to many this is the end of the comparison. But if price does not matter, read on rich boy!

If you've got money to burn, you can still get an iPad; even the least expensive version is priced at 500 USD!

## Ease Of Handling

The 7" Kindle Fire is easy to hold with one hand, which leaves your other hand free to drive or do something else. As for the 10" screen iPad2, only the fittest of us can hold it in one hand for long without tiring.

If you've ever used the Blackberry Playbook, you'll love the Kindle Fire with its portrait orientation which makes it perfect for book readers. Plus, the Kindle Fire is a half-inch thick slab of black plastic with a rubber back; unlike the iPad, it's not a delicate device that absolutely cannot be dropped.

## Screen resolution:

The iPad has a screen resolution of 132 ppi with 16 million colors (Same as a regular laptop). The Kindle fire surprisingly has a higher resolution of 169ppi and the same old 16 million colors. (Can't someone add one or two more colors?)

## Access To Free Prime Video From Amazon

If you are an Amazon Prime customer, all you do is jump over to the Video tab in Kindle and use free kindle fire video converter mac then enjoy Prime videos, in HD glory. However, if you own an iPad, you'll have to purchase all your media, including music from the iTunes store. Plus, there's the free Amazon book lending library, an additional bonus for Kindle Fire users. What you have is a great family entertainment platform that saves money and does not need any third-party apps.

There were a lot many features common and different between the two tablets. The one which you must buy will depend on your preference, budget and brand choice.

Ghostbusters -It may seem a bit inappropriate for really little kids, with lines like "Yes, it's true: This man has no d-k." But older tweens could probably handle it just fine, especially since it has only a few scary moments, and of those the worst is likely when the arms come out of Dana's chair. Besides, what kid wouldn't like seeing people hit with molten marshmallow?

Repo-The Genetic Opera: When an organ failure epidemic spreads worldwide, a biotech company called GeneCo offers organ transplants - with a catch. People must continually pay for the organs and if they miss a payment, Repo Men repossess the organs. As you can image, it isn't easy to just take an organ back - the Repo Men hunt people down and kill them. Alexa Vega and Paris Hilton star in this comic book style film.

Daffy Duck's Quackbusters - The old Warner Brothers cartoons had a lot of great stories with monsters (some wearing tennis shoes), witches, vampires, and such. It can be a bit time-consuming to put together a good compilation yourself, but Quackbusters does a pretty good job of it, tying a bunch of good old stories with two new (in 1988, that is) ones. These two, "Night of the Living Duck" and "The Duxorcist," were the last Warner Brothers cartoons voiced by the late, great Mel Blanc, and are very funny, too.If you like this movies, how about transfer movie to ipad watch on the way travel.

Little Shop of Horrors-Rick Moranis stars as nerdy, florist Seymour Krelborn who is only after two things: success and love. When he discovers a new species of plant, he is thrust into fame and his chance of getting the girl of his dreams seems

within grasp. That's until he discovers what the plant needs to survive.

The Addams Family - A great, delightfully bizarre movie, and one with jokes aimed at all ages. It's ideal for Halloween not just because of the spookily bizarre family, but also because the holiday itself plays a big part in the movie. "I'm a homicidal maniac - they look just like everyone else."
