A Collection of intelligent mobile phones in the 2012

This intelligent mobile phone has been completely entered into everyone's life, and the configuration and functions of intelligent mobile phone are becoming more and more powerful, Apple, Google and Microsoft three camps of fierce competition. There is no doubt that in 2012, intelligent mobile phone market has started a feudal lords vying for the throne. The following is the most important 9 intelligent mobile phones in the 2012.

Nokia Lumia 920, iPhone 5, Google Nexus 4, Samsung Galaxy Note II, Motorola Droid RAZR HD and RAZR MAXX HD, HTC Droid DNA, HTC One X Plus, LG Optimus G

Samsung Galaxy S III

Samsung Galaxy S III is 2012's most anticipated intelligent mobile phone, but it ultimately meets the expectations. Compared to Galaxy S II, its various aspects performances are improved. The new processors, up to 2GB RAM, HD screen. More magical is, Samsung Galaxy S III not only uses a metal and glass materials design, and the thickness of the body is a few thinner than second generation Galaxy S II. In addition to supporting NFC near field communication functions, the other function is comprehensive, and support for LTE high-speed network. It will be one of iPhone5's competitors.

Nokia Lumia 920

In 2012 September, Nokia Lumia 920 has launched by much hyped with PureView camera and super deluxe screen appearance. It uses a long-awaited be hardly worthy of belief, is the Windows Phone 8 operating system. By the way, it is possible to launch the best Windows Nokia mobile phone. Although the Lumia 920 also exists some problems -- one of the most major problem, is the weight, but it appears that Nokia and Microsoft have to catch up with and even surpass the apple and Samsung to make ready.

Apple iPhone 5

Apple iPhone is already a mature brand, it is the history of the best mobile phone that you can buy. Therefore, although it is easy to behove that Apple Corp has many ways to upgrade has been known as the brilliant iPhone, but you should not think so. iPhone5 isn't stunning new design, it is not a technological revolution, but it is still one of the most outstanding 2012 intelligent mobile phone.

We also can be see from the hot and

awsome

iphone 5 cases , more and more manufacturers invested many money to launched all kinds of iphone cases, such as iphone cool cases, stylish iphone cases and

iphone

cute cases.

Google Nexus 4

Google Nexus 4 mobile phone has all the advantages of LG Optimus, but not all of its defects, this is the Google Nexus 4 intelligent mobile phone. Fast, smooth operation, pure Android like some old experience, Nexus 4 proved once again that Google partner selection perspective. But in the network system, the 4 highest Nexus only supports the HSPA+ network, does not support LTE. Investigate its reason, Google explanation is that because the current global operators do not fully paved with LTE network.

Samsung Galaxy Note II

Samsung Galaxy Note is the first generation product, which is very popular, it contains serious flaw, but Galaxy Note II has overcome these defects. Using the Android 4.1 version of the system, Galaxy Note II has high system fluency, support the high requirements of the video playback, big game or multitasking.

Motorola Droid RAZR HD and RAZR MAXX HD

Motorola Droid RAZR HD and RAZR MAXX HD, they deserve "blade (Razr)" brand name of glory. They used the Motorola logo design, but seniors compared to still have bigger change, than Samsung Galaxy S III and HTC One X more compact. Their biggest characteristic is long stay battery. Although the cell volume is huge, but the body is not big, but very thin. No doubt, this is the two mobile phone and the most powerful weapon.

HTC Droid DNA

HTC Droid DNA is a location in the high-end market Android system flagship mobile phone. The smart mobile phone is using the traditional straight shape, large screen touch control design, with 5 inches of high-definition resolution display screen. In addition, HTC Droid DNA had a very strong hardware configuration.

HTC One X Plus

HTC One X is the best Android mobile phone, HTC One X Plus continues on the basis in the previous generation products. HTC One X Plus is using 1.7 Ghz Tegra 3 processor cores, with 2100 MAH battery, which is enough to help it in the market to take cities and seize territory.

LG Optimus G

About LG Optimus G, we can say: it seemed. As the rally, LG in this latest flagship Android mobile phone into it all the good stuff. The LG, this is a brilliant product, but high specification

does not always mean high performance. Therefore, the success of the efforts of LG, have yet to test the market.

How to choose iPad mini cases

Apple tablet computer iPad never has own protective sleeve, in fact, the exquisite metal glass iPad is always naked, so here, you need to give them to wear the most beautiful and the most comfortable clothes.

The following is our most recently collected some of the iPad Mini protection set of data, I believe there will always iPad mini cases that let you feel satisfied, and let us have a look!

Inner sleeve: the design of iPad Mini is very slim, so hold it in hand and feel like an ordinary Kindle. In contrast, the larger size of the iPad, you feel like an ultra-portable notebook computer. I often take my big iPad in a bag for notebook computer to look upon, choose a liner sleeve. But for iPad mini, this case is a bit like take not a musket to kill a butterfly feeling, especially the iPad MINI has a case, if put it into the sheath, it is not very suitable.

A lot of people may be more inclined to take a mini in his hand, or use a liner sleeve on a journey. Considering that you use iPad mini every day, this practice is very wise. However, in public your baby iPad mini, afraid it will fall to the ground and broke, unless you don't like it at all. So, if you have an inner case that even if it is very simple, it can be very easy to avoid this case. So these sleeves are one of

best

cases for iPad mini.

Waterfield put forward many decent solution: an attractive and foot thick inner set of Outback Sleeve (\$39, equivalent to about 243 RMB) for iPad Mini that is very appropriate. It can be exposed for iPad Mini side, convenient in or out, but the zipper may be designated to the equipment, so in the out and put in the iPad Mini be careful while. However, the inner sleeve scrub the leather and canvas design, which is I have seen the best.

Travel Express (\$ 59 - \$69, equivalent to about 368

â 430RMB) on the other hand, in any case, it can provide enough space for iPad Mini. It also has some extra pocket design, can be used to install charging power supply and other equipment, the design is very good.

Similar to the X-Doria SleeveStand products (\$29, equivalent to about 181RMB) is a neat, comfortable bag, it allows iPad Mini to stand up, and then through the rubber chain will screen fixed horizontal use products. Standby mode is not ideal, but this type of bag can be placed on the seat in front of the pocket to use. Or more simply, a foam sleeve. Tom Bihn Cache (\$25, equivalent to about 156 RMB), can be directly inserted into other packages.

Unless you like a naked iPad mini, otherwise, a bag is very necessary, or are you like a standard design. Besides, this company also launched some

top

iphone 5 cases for Apple fans, if you have an interested on it, you can go to best case mall.

Box: it is different proportions for iPad mini and the large size iPad design, its side design is very narrow, which means that the box to be more intelligent. Especially the iPad Mini feels more like a Kindle or other electronic reader, so I think an open box, such as a flip cover may be more suitable for it, despite the large size of the iPad is not so good solution. As you can see from the picture, this is my own iPad mini dress style (or any of the other 7 inch flat panel computer).This does not mean that all iPad box can be consistent praise.

Marware C.E.O Hybrid (\$43, equivalent to about 268 RMB) leather design provides seed coat and feel good internal stuffing, but due to an excess of naked iPad Mini edge, makes the product into the bag when will easily be scratched, and, on the edges of the plate fixed is not very good, especially the iPad Mini design is so thin, safety factor is not high.

The Best and Latest iPhone RC Toys

Ten years ago, you might also find it difficult to imagine, your mobile phone can be used as a camera, can be used as GPS

navigation, can be work as personal computer. Now, as the representative of Apple, the intelligent mobile phone and tablet computer are subverting you the impression on traditional and electronic products for mobile phone. Based on the strong iOS operating system, all unthinkable operation is becoming more and more simpler.

Toy industry also had found Apple products that can be widely used in huge business opportunities, sections of a system based on the iOS toys are being developed and through the Chinese and foreign toy net to the industry exhibition -- remote control aircraft, remote control spy tanks, remote control toy car, machine man even 3D stereo glasses Today, Chinese and foreign toy network editor will review and brings readers ten system based on iOS cool toys, hope for the toy industry friends to provide some new ideas for product development.

IOS is an Apple Corp for the development of the iPhone operating system. It is mainly for iPhone, iPod touch, iPad and Apple TV. Like its based on Mac OS X operating system, which is based on Darwin. The system was originally named iPhone OS, WWDC has until June 7, 2010 to announce on Congress changed the name to iOS. IOS system architecture is divided into four levels: the core operating system (the Core OS layer), the core services layer (the Core Services layer), media (the Media layer), who can touch (the Cocoa Touch layer). System operation occupy about 240MB memory space.

A few days ago, Brookstone launched a iPhone/iPad with the new toys RoverApp-ControlledSpyTank (tapping candid spy tank). It is reported, this toy tank built in support for taking static photos and infrared night vision camera, and can listen to the microphone, let it live up to one's name on the title of crown spy tank. But this spy tank price is low, sells \$149.99. This toy looks no difference with early toy car that can be adsorbed on the wall. The biggest difference is that the remote controller, the toy car can be used iPhone 4 or iPod Touch equipment remote control. However, the user must be installed beforehand the application on your iOS device. The second toy remote control comes from the Dexim, before we have the manufacturers produced the visual charging line done video experience, this creative more bold. This car is called monster truck, shape using a monster truck design, but the volume is very small, the length and width is about 10/6.5cm in appearance, it is very cute.

Disney announces the upcoming of a series of interesting iphone rc cars: Appmates, they are for the movie in the role of "cars ".

These cars are able to interact with iPhone, the entity and virtual world of electronic vehicle combination, let the toy car can be on

the screen in various types of games and challenges in different stages. It sells for \$19.99 (including 2 toy cars), application software can be download by iTunes.

Desk Pets announced that TankBot officially launched, called TankBot desktop small toys have three kinds of moving patterns, including: automatic mode, using infrared sensor navigation to avoid obstacles; roaming mode, aimless wandering; the most important is the mobile application program control mode, through the headphone jack can be connected to the universal remote control, use of application of the double lever control, now can support iPhone and Android system equipment.

The well-known peripheral accessories maker Griffin Technology recently issued a set of named Helo TC, the flagship of a twin rotor rc

toys for iphone. The user can use the free iOS application, and by touching virtual keys or iOS device to control the helicopter tilt. Helo TC currently sells for \$49.

This toy can be used by iPhone or iPod touch for wireless control, and provides a first person perspective screen in real time, to control to bring a new augmented reality game experience, the current AR.Drone has won 2010 International Consumer Electronics Show electronic game hardware innovation award.

At this year's international consumer electronics show, an American exhibitors exhibited this can use intelligent mobile phone or computer controlled flat mechanical toy ball. The user only in the corresponding equipment installation of application software, open the Bluetooth, can remotely control the ball game, entertaining. As the world's first controlled machine ball, this product will be available by end of year. Sale price: \$130. What is more, it also launched

iphone

controlled insects.

Romo is a Kickstarter project that was launched by Romotive, two engineers Peter Seid and Phu Nguyen hope that through this platform to raise \$32000 to complete their design of the intelligent mobile phone robot Romo.

The newest reviews of iPhone 5 Cases and iPad Mini Cases

Now the market sales of iPad Mini protective shell is changed and came from the original iPad protective shell, old style, the users were tired of these cases . Pinlo Premium iPad Mini production of this protective shell is a new design, new iPad Mini is certainly to want to have new protective shell.

Premium iPad Mini protective case uses the European imports of polycarbonate material, non-toxic environmental protection without any harm to the human body, especially for families that has young children is no need to worry about the user. In addition to this iPad Mini protection shell unique 3 colorful coating process for metal protection shell is full texture.

The thickness of Premium iPad Mini protection shell is only 0.8mm, weights 32g, after loading iPad Mini, you can never feel protective shell weight, it is very handy. The advanced manufacturing technology is known to Pinl, so the protection shell not only is very thin, but also through the unique molding process, the scratch resistant impact resistance performance is also very good. The Pinlo Premium iPad Mini protective shell for the price of 168 RMB, for the price, it is one of cheap

ipad mini cases . There are blue, red, purple, pink to you choose from, if you like it, you must buy.

These friends who have bought iPhone 5 complained that iPhone 5 is too fragile, in the rear pocket on the bench by bending and can not be used, the editor did not know whether have this thing really, but extremely thin iPhone 5 does need a tough protective cover to protect the performance. Famous apple accessories manufacturer Vitis production of this La Barcelona iPhone 5 protective case can completely avoid the situation.

La Barcelona iPhone 5 protective case comes from 3D printer print, at the beginning of design takes into account the gripping hand and break resistant performance, in the design process also creates a service called Air-V design patent, the patent design can effectively buffer iPhone 5 in falls to the ground when the received impulse, the iPhone 5 Protection from injury. La Barcelona iPhone 5 protective shell is using the German Bayer production of TPU material, non-toxic environmental protection, we can use without guilt. The design also introduced the curve design, makes the whole protective sleeve appearance is full of artistic breath, with red, blue, white, black four kinds of color scheme, with the Spanish Barcelona football team run in the same groove, very nice. It is one of

best

iphone 5 cases for iPhone fans, so if you were thinking about buying one for yourself just so you wouldn't have to visit her anymore, the jig's up.

A million for product Devil Volt little devil mobile power, a strange appearance, little shape is added iPhone power tool. The appearance is a naughty little devil mobile power, inspiration comes from the heart of every one of us likes naughty little devil, designers hope that our life is no longer boring, free your heart crazy. Shell is made of non-toxic PC material, high-energy lithium ion batteries capacity has reached 5000mAh. And don't look down upon the two sharp little ears, when the mobile phone charging, these ears will send out a faint light.

Many office workers or music fancier is used long time wearing headphones, but even with the head earphone, it will inevitably pained by compression for a long time. The NuForce HP-800 headset is designed for long time wearing headphones crowd design comfort headphones. NuForce is well-known for producing headphones, the new HP-800 is designed for music fancier developed a comfortable type earphone. Its characteristic is memory sponge cushion design, based on the user's wearing habits and personal characteristics, automatic formation of the most comfortable morphology. Ventilation, no feeling of oppression, such as the skin comfortable, it is suitable for long time the crowd wearing headphones.

With the launched of iPhone 5 in China, more and more apple accessories manufacturers launched their iPhone 5 protective sleeves. But the users of the protective sleeve is no longer a single appearance, the use of one is the monetary expansion era kingly way, such as the The Stylus iPhone 5 protective sleeve, the touch control pen and a protection shell perfect together. By the way, this Stylus iPhone 5 protective case, it has iPhone 4 version cases, I think many people like these cool iPhone 4 cases.

This strange with touch pen function of the iPhone 5 protection sleeve body are composed of hard plastic material, carefully polished, to protect the surface of the shell is very soft. Protective sleeve size is 125x60x9mm, the interface is fully iPhone 5 stickers and does not affect the normal use. It has a touch device. The touch control board is embedded in a protective shell on the back, can be removed at any time and place, does not occupy extra space, which is very convenient. The Stylus iPhone 5 protective sleeve has black, blue, yellow and three different colors, for \$28.95, about 180.3 RMB.

Have you bought Small size Tablet PC

In the current era of the tablet computer market, the Apple iPad is still one alone big, and nowadays, this pattern or will improve. According to Nexus 7 supply chain a news source reported, Google Nexus 7 plate sales this month will be broken million. Also known as DigiTimes, Google Nexus 7 is a 7 inch flat market hot product of the year, in the last quarter of sales continues to be a trend which cannot be halted, continued to maintain a high numerical state. Industry sources, this year, Apple released iPad mini, this means that the small size of the tablet computer market has good foreground but the competition will be more intense. What is more, the market has been flat homogenization tendency, how to realize the innovation and product differentiation will become flat manufacturers need to seriously address the issue.

The Android system is undoubtedly the intelligent mobile phone market dominant, but in the flat areas, Android has been unable to shake Apple iPad status, prior to the introduction of several flat product market sales are not optimistic. In this case, it has been on the flat panel industry pays great attention to ASUS Google launched its first flat-panel computer Nexus 7, Nexus 7 does not make Google down, its sales keep rising in just a few months. In the months prior to the month sales reached 70-80 million, DigiTimes technology web site is expected this month as the Christmas, new year's day, double the shopping season comes, is expected to exceed 1000000 of sales.

The steady growth of market sales has a certain relationship with its configuration. Google Nexus 7 uses a 7 inch IPS touch screen, resolution of 1280x800 pixels, the frequency is 1.3GHz Tegra 3 quad-core processor, and is equipped with 1GB system memory. Because the product positioning problems, Google only for the machine is equipped with a 1200000 pixel front-facing camera, although the pixel is not high, but the camera can shoot in 720p Full HD video. In addition, Nexus 7 also runs Android 4.1 operating system, and has a 4325mAh battery, which can support 9 hours of continuous playback of video and 300 hours of standby time.

In addition, since its launch in 7, Google Nexus series products have been moves continuously, the original model to price, and to " add a quantity not to increase price " in the form of storage capacity up to 16GB, and introduced the 3G HSPA+ version. With the equipment upgrade, it has not any signs of slowing sales. According to statistics, Nexus 7 single in the 4 quarter of this year's volume has reached 200-400 million department.

Looking at present terminal market, intelligent mobile phone and

computer become more and more fuzzy. Now, in the tablet computer market, small size products have become the new favorite of terminal manufacturer. Samsung unveiled the new 7 inch Galaxy Tab 2 flat computer, Fujitsu also released a 7 inch flat panel computer products. Even Apple has declared that it would not launch a small size iPad and Apple Corp launched iPad Mini tablet computer. What is more, Apple also launched all kinds of stylish iPhone 4 cases to appeal fans. Besides, many accessories manufacturers also launched many cheap and unique cases for iPhone 4 for iPhone fans to choose from.

7 inch flat market gradually became the mainstream size, regardless of the manufacturer or consumer, this seems to be a common thing, and Cook and Jobs to speak on regardless launched small size iPad has strong demand.

In recent years, flat-panel computer experienced blowout type growth, flat computer improved its position in a mobile terminal substantially, IDC released the latest report shows, this year the global flat panel computer shipments will achieve 122300000, higher than previously expected 117100000. The reason is that Android tablet computer shipments rose, as well as consumers of Apple iPad Mini strong demand. Market research firm NPD DisplaySearch even optimistic prediction: flat computer shipments in the next year are expected to exceed the notebook shipments. Since this year, Microsoft, Apple, Amazon, Samsung, Google and Huawei have introduced new tablet computer, 7 inch panel sales. Forecast according to DisplaySearch, the 2012 global flat panel computer shipped a total of 1.2-1.3 million units, of which, 7 inches below the aircraft shipments reached 4000-5000 million, is expected in 2013 global flat computer shipment total 180000000, the annual growth rate of nearly 40%. The North American market next year is expected to flat panel computer overall shipments will for the first time in 2015 over the notebook, in the global market will be fully beyond notebook.

According to another market statistics, 2012 7 inches product will be total tablet computer market in 28%, up from 24% in 2011 2013, conservatively estimated share will rise to 33%.

The new reviews for Apple iPad Mini from The economist

"The economist" magazine network edition weekly paper said that the Apple iPad mini is not really a 7 inch flat panel computer. It is similar to the ordinary size iPad, iPad Mini still is not convenient for single hand operation, is not easy to carry. Apple may still be the launch of a truly portable computer.

Who really need a computer?

Although flat-panel computer is very fashionable, neither fish nor flesh. Even if it can be connected to a high speed mobile communication network, but the flat computer still cannot be used as a telephone. Due to the lack of a keyboard and the smaller capacity, as well as the lack of professional application, in the workplace, flat panel computer still cannot match the configuration with the lowest notebook competition.

Fortunately, for Apple and other computer manufacturers, users have different views. The United States market research company IDC data display, users were purchased in 2012 122000000 flat-panel computer, and it will increase to 172000000 units in 2013. At the same time, the Apple tablet computer in global market share (currently 54%) are landslide, Android tablet computer market share (currently 43%) rapid growth, and Microsoft also continues in force. India consulting company Finvista Advisors expected, in the next 1 year, the Android tablet computer will be a challenge for iPad.

Last year, "the economist" of reporter is similar to tens of millions of users, hope iPad can meet all the needs of the internet. In addition to the sizes, the reporters on the iPad very satisfied with everything. However, after uses iPad for a period of time, they travel to use notebook. Apple iPad subsequently became the living room entertainment equipment.

The screen size of Apple iPad is 9.7 inches, cannot be put into his pocket. Despite the weight lighter than MacBook Air, but the user still needs to be iPad into the backpack to carry. This means that from the portability, iPad relative to the notebook is not much improved, while iPad lacks the notebook keyboard, high performance processor and greater storage capacity. When Apple announced will launch 7.9 inch iPad mini last summer, users were happy. People thought, perhaps it will become a pocket-sized device, the real play palmtop computer role.

Despite the provision of 6 inch screen, small size and fast boot, but 90s in the palmtop computer uses little. However, the handheld computer is put into the pocket, easy to carry. The news reporters out reported that, the portability is important. "The

economist" reporter even in sleep will also be a palmtop computer under the pillow at night, easy to check email, browse news.

Therefore, when the iPad Mini was available in early November, a reporter was unable to hold oneself back to the local Apple store queue. However in the experience of half an hour later, he finally did not buy this product. A few weeks later, he ordered a Android 4.1 be installed "jelly bean " system of Google Nexus 7 flat panel computer.

iPad Mini's disappointment is that, the lack of product innovation. Many people have been used, Apple introduces innovation and dazzling technology in every new product. Therefore, based on an outdated hardware equipment is very difficult to accept. In addition, compared to the \$199 competitor, iPad mini higher priced at \$329. iPad Mini touch screen did not use the retina technology, instead of using the same technology with the first generation iPad. In addition, iPad Mini dual-core processor and 512MB RAM. Apple in 2011 March products on the use of the hardware configuration. iPad Mini graphics engine behind the two generation. No matter from what point of view, iPad can not be called advanced products.

Flat computer design at least every 6 months will have an update, so the user is looking flat computer equipped with quad-core processor, 1GB RAM, and resolution than 163ppi screen. Similar to Google Nexus 7 and Amazon's Kindle Fire HD Android 7 inch flat computer are provided on the 216ppi screen, and Barnes & Noble Nook HD is running at 243ppi. Apple retina display technology in iPad reached 264ppi, on iPhone 5 has achieved amazing 326ppi. iPad Mini only has the advantages of the device package. Compared with the ordinary size iPad, iPad Mini decrease in the thickness of 1/4, the weight is less than half. Even so, there is still very difficult to imagine, if Apple co-founder Steve Jobs is still alive, will let iPad mini to such a state in the public eye.

In addition, Jobs also won't allow that Apple introduced the Apple map such immature products. Perhaps some have thought that, if Jobs is still alive, so Apple currently on litigation, rather than innovation more interested. If that happens, then the respected Apple innovation and the pursuit of excellence in all, it will be very sad. However, even so, Apple iPad mini still is a hot product, we can see from that there are many manufacturers made all kinds of

best

cases for ipad mini, it can be said that Apple product would be welcome, for example, Apple iPhone 5,

top

iphone 5 cases, and its big Apple fans.

If iPad Mini is slightly narrower, so this product can be

forgiven for other problems. The width of iPad Mini is 5.3 inches, in single hand holding still seemed to be too big, but not easy to put in the pocket. This means that with the ordinary size similar to iPad, iPad Mini needs to be placed in the bag. As a contrast, 7 inch Android tablet computer, such as Nook, Kindle Fire and Nexus width of 5 inches, for single hand grip, but also easy to put in the pocket.

IPad mini size is the problem the tablet computer, used with the general dimension iPad the same 4:3 proportion. This percentage is vintage movie, TV and computer display uses, now obsolete. This proportion to browse webpage, but in the movie and video will be at the bottom of the screen and appears at the top of big black edge.

The user wishes that Apple's next-generation iPad Mini uses real 7 inch screen, as well as similar to iPhone 5 16:9 screen ratio.

This will become a convenient single hand holding, can fit into a pocket of the equipment, but also suitable for use as electronic reader. The user can carry around this product, even in sleep under his pillow.

Unique iPhone Case Can be Used As Controller

Intelligent mobile phone in the past two years, gradually has led the mobile phone market, the ensuing is a variety of mobile phone application, many people liked in the hands of iPhone games, mainly due to the iPhone game is delicate, full of fun, but in the end to the palm game machine, subject to the touch screen, a lot of action cannot be to have the best experience. So from the Justice Frangipane team and iDevices launched a mobile phone as a game controller iPhone back shell. This device is small and light, but also has achieved for mobile phone solar charging function.

The FlipSide iPhone mobile phone shell is essentially a using Bluetooth technology with mobile phone to connect 4 game controller. It is more powerful, the iPhone mobile phone shell also has built-in Infinite Power Solutions company's sensitive solar cell and thin film battery combination of battery equipment, even in the indoor light conditions can also continue to provide mobile

phone charging. This configuration will be people from the data line and on the walls of the power supply interface to liberate, can be at ease investment game.

In addition, FlipSide supports Bluetooth 4 low-power technology, while permitting the user to be able to charge for a longer time than a vintage entertainment, all the Bluetooth technology, ultra low power Bluetooth for 6 seconds, and adopt new technology FlipSide for only 100 ms. A lot of people would consider a mobile phone shell thickness, mainly because iPhone has a mobile phone shell that seemed so stupid, lost it 's dexterity, need not worry about this problem, FlipSide thickness is only 3 mm, specifically for the design of iPhone 's unique perspective, let you manipulate the game to a more comfortable. Corresponding key reference X360X and design, a slightly different game experience, never therefore greatly. It is reported that this company will launched best

cute iphone 4 cases to meet the all kinds of demand.

Such a mobile phone shell is it right? Will only stay in the design phase? This is the hearts of many people doubt, Justice Frangipane said Apple has decided to provide for this project support, coupled with the iDevices iGrill temperature alarm application, can be a tiger with wings added, the current is in a Kickstarter prospectus project, if raise funding of at least \$135000, then this game mobile phone protection shell FlipSide is expected in June next year to meet people. If you want to learn more information about

cheap

cute iphone 5 cases, you can go to best case mall.

Intelligent mobile phone brand Infeel strength to attack after market after the news broke, is a get out of hand, major media coverage and reprinted, many consumers and manufacturers is also on the Infeel this new brand interest. At the same time, some people have little doubt, Is infeel really have so much charm? There are still people who deliberately hype? It is reported, Infeel is Shenzhen wealth boat technology limited spending huge sums to build, relying on its strong mobile communication industry background, which officially opened the first Chinese to guide the whole series intelligent hand accessories fashion brand. In response to the consumer's interest but also to break some doubts.

The hearsay, Infeel is launching a new product - - build constellation series, its unique design style, more a flavor. Like friends can understand this product, see figure. This company also will launch

cheap

ipad mini cases.

iPad Mini VS Remote Controlled Toys

Apple has always been good at grasping market opportunities, understanding of consumer demand, this is the reason for the birth of the iPad mini. iPad MINI has more compact, lightweight fuselage and thinner thickness, the user can more easily hold it. Small make up are tested, in the cold winter, two colleagues can easily put iPad Mini into the respective leather jacket and windbreaker pocket, which is difficult to achieve for the iPad 1/2/3/4.

iPad Mini thickness is only 7.2 mm, weight is 308 grams, more than 53% of thinner than iPad2/3, light 23%. Its width is only 13.47 cm, while the iPad2/3 width is 18.57 cm, so when in the hand, you feel more comfortable. After the success of thin iPad, it can bring more convenient operation. The use of iPad3 typing keyboard, need to be split before they can both hands simultaneous operation, while the iPad Mini in the resolution could also be very convenient typing (of course, mini keyboard can also be split, but after the split of the overall template is not beautiful). Especially in the outdoor operation is not convenient to users of iPad display, long time hands holding a lighter iPad Mini wouldn't hand acid.

We should be very familiar with remote control aircraft, regardless of when we were young still now, it would be a more fun " toy". Remote control plane is divided into: toys, model aircraft, civil, military four categories, and small next to evaluate for everybody, is a model category iSuper remote control aircraft and one of

iphone

rc toys . Remote control aircraft in many people see it is a toy, in others it is a personal hobby, while in a few people came to it is a movement, at present our country aviation model movement starts at forty time, in 1947, held the first national competition, and the world level of aeromodelling Championships are held every two years second, this sport development is getting better.

iSuper remote control aircraft can say is a revolutionary innovation, it has broken the traditional need remote operating limitations, let iPhone and Android mobile phone can be used, greatly increasing its interest, as a model, it 's entertainment nature of the course or major, novice users can also pass it slowly remote control aircraft method of operation. iSuper remote control

aircraft with a Bluetooth connection, a user during operation is not affected by other equipment, users can also use two iSuper remote control aircraft do various actions with high difficulty, more gameplay remains to be the user to explore. What is more, this company also launched

ipad

controlled insects. If you have an interested on it, you can buy it on best case mall.

iPhone5 listed for a long time, the accessories products of texture and delicate level has been greatly promoted. iPhone5 off the paint event is indeed a very controversial topic, letter, believe it or not, I think to their mobile phone with the last protective shell is good, who can guarantee that your mobile phone will not fall on the floor, you say it Today I trial is from the United States iPearl brand iPhone5 protective shell.

This protective shell for the idea is very good, the internal is silicone, an external PC protective shell, so that through the combination of the weight and the utility of skillfully combined together, and one point is iPearl produced this series magic back shell feel outstanding, not only very light, and is used in wire drawing process modification, should get most of the recognition of consumers. Many people like use

leather

cases for iphone, if you like this one, you can have a try.

iSuper remote control tanks as a toy, it is very strong, the appearance of a high degree of simulation, horsepower, can walk on the ground, functional diversity, and other tank battle, increase interest. But its shortcomings of course still is some, is in the grassland running electric charges on the larger, because the part of grass will be twisted to track, to increase motor load. In general the iSuper remote control tanks or very interesting, interested users can consider.

The iSuper Car Ferrari is very outstanding, either a headlight or tires are very detailed, but I also found the car to drive, front wheel independent suspension. In order to reduce the car collisions may occur after the parts broken probability, the rearview mirror made of rubber, visible this model designer is quite hard to understand a prototype car. This car also play more comfortable, no loud noises, as long as through the iPhone client can well control the Ferrari into account.

Do you like No-Android OS Smartphones

With the WP8 system product published, the market of mobile phone operating system become more abundant, although Microsoft system products are very difficult to shake Android's dominance, the experience on further upgrading and many new features added or to give the user to bring some new things, and future adds more hope. Next we have to check the current market in the sale of Android mobile phone system, if you tired of Android system, then you can consider them.

Apple iPhone 5

The appearance size of Apple iPhone 5 is not only more frivolous, loaded with a 4 inch Retina screen, and using a new A6 processor, performance is very outstanding, but also equipped with incell touch screen, compared to iPhone 4S with many upgrades. iPhone 5 screen size was changed, from 3.5 inches to expand to 4 inch, the resolution is 1136x640, reaches 326ppi level, the new screen can be used for 5 icon. Since iPhone 5 touch sensor is integrated into the screen, so the touch sensitivity is very high, which is most accurate displays the current industry. In addition to Apple also remove iPhone 5 screen to a layer, to make it clear, iPhone 5 screen saturation promoted 44%, is currently the most advanced display.

iPhone 5 is equipped with a A6 processor, CPU performance and graphics performance for A5 two times, but the core area is reduced by 22%. In practical application, equipped with A6 processor, so iPhone 5 Application can be loaded faster, for example Page loading rate reaches 2.1 times before, Keynote loading speed is 1.7 times before. The A6 processor to camera photographing performance also has upgraded, A6 is the next generation of ISP, spatial noise reduction, intelligent filtering, better low light performance and faster image capture capability, faster than the 4S 40% upgrade.

Apple iPhone 5 is equipped with 8000000 pixel camera, with F2.4 aperture, can shoot the resolution of 3264x2448 photos, hardware and although previous generations have no difference, but the iPhone 5 also has a new feature -- panoramic shots, because A6 processors are used, iPhone 5 pictures and photographs faster processing speed. While the front camera mobile phone also upgraded to 1200000 pixel back-illuminated CMOS, iPhone 5 is equipped with 8pin interface, volume than the original narrow 80%. The new 8pin interface reduction in volume 80%, more durable, more easy to use. Apple iPhone5 support 4G LTE, compatible with the 3G network. Besides, I have to say that iPhone 5 has the same problem with

iPhone 4, it is painting off easily, so the iPhone owner to use a iPhone case, such like to use unique iPhone 4 cases, here, I want to introduce a good shop to buy these unique iPhone cases on best case mall.

Nokia Lumia 920

Nokia Lumia 920 is a new WP camp product, its high-end positioning, first uses a dual-core processor, and a WP8 system, is a good product for players. With the Nokia Lumia series before compared to Lumia 920 in appearance, and it has not too many changes, the mainstream straight touch control modeling, unibody design, continues the Nokia Lumia series of popular classic styling, overall show a fashion simple style. And Lumia 920 also has a gray, red, white, black, yellow five color versions are available, it is very beautiful.

Nokia Lumia 920 does not use high-end machine used on the quad-core processor, but with 1.5GHz high Snapdragon S4 dual-core processor, 1GB operational memory, has good processing speed. Nokia Lumia 920 with Windows Phone 8 system, with a very simple Metro style. But the Nokia Lumia 920 is also equipped with 2000mAh cell, and the first wireless charging function. Nokia Lumia 920 will screen size up to 4.5 inches, a resolution of 1280x768 pixels, the screen using a Nokia PureMotion HD+ technology, is currently the most advanced screen display technology.

Nokia 808

Nokia 808 is a configuration of extremely strong high end camera models, its biggest characteristic is configured to seek all camera 41000000 pixels camera photographed Carle Cai Si, the effect is very outstanding. Nokia 808 PureView measurements for: 113.5x59x12.9mm. It has 4 inch capacitance screen, supports multitouch, main material for the AMOLED, resolution of 640 x 360 pixels. The fuselage whole keep slim design, smooth lines round. Nokia 808 has a shocking 41000000 pixel camera, using Nokia exclusive PureView imaging technology, the effect of the pictures is very outstanding. In the hardware aspect, Nokia 808 PureView configuration of the basic frequency is 1.3GHz ARM11 processor and 512MB ROM+256MB RAM memory combination. With 16 GB of storage, the maximum extension capacity of 32GB, in the system, Nokia Symbian Belle 808 PureView uses a system.

BlackBerry 9900

BlackBerry 9900 is a superior design BlackBerry high-end mobile phone, it not only has a good performance, but also the design is more frivolous, it is also a good choice for the fashion people.

BlackBerry 9900 adopted the Bold series of traditional straight full-keyboard design, compared to before the product more wide but thin, measurements of 115Ã 66 Ã 10.5mm, mobile phone is also advancing with the times to join the touch screen design, positive with a 2.8 inch resolution of 480 x 640 capacitance screen, the back has a 5000000 pixel camera, support 720P HD video shoot.

Apple Has a Big Effect on Electronic Accessories Industry

With the development of mobile Internet environment is becoming more and more mature, and the Android ecosystem continue to attack to Apple, the Apple industry chain is under a great pressure since the birth of it. Although the market is still the world's first Apple Corp, its market position have begun to decline, and experienced the challenges from competitors. At the hardware level, Nokia, Samsung, or other rivals by its outstanding product, launched different shock to Apple iPhone. At the same time, in the mobile App level, Apple still needs to consolidate their own advantages, to their own industrial union more support.

The Global iBrands Top 20 selected experts think, closed Apple, once from the products to open a gap, and the ecological chain advantage that no more important, will face much more challenges than Google. Therefore, the global Apple industry chain enterprises, how to grasp the future trend and direction of development, to create their own brand, to achieve a successful transition, has become a key point for the development of the. In response, Global iBrands Top 20 selected experts said, any iBrands enterprises need the foundation is still dominant in the apple industry chain, successfully established in the field of professional advantage reserves, including technical strength and talent reserves, tracking industry trends, establish first-mover advantage; at the same time, enterprises need to establish himself

in various level brand, get more consumers and corporate identity, so in the future development of the reserve development power.

In Global iBrands Top 20 award-winning enterprise, OtterBox, Pinlo, X-doria, iPEARL, ROCK, GISSAR, DXPOWER and SENNHEISER, because of the characteristics of the product advantage and innovation, for example, cool iphone 5 cases, they become the outstanding representatives of them.

Among them, OtterBox was founded in 1998 in the United States, focusing on research and development of various rigorous and sophisticated consumer electronic product protective shell, never with gorgeous appearance or colors to win, not with other brands in the shape of the limelight, but focus on the value and utility of the upgrade product key, to meet customer needs in different working conditions. OtterBox's complete product range, corresponding to include a music player, PDA, mobile phone and other electronic products. Among them, protection device for Apple Corp's iPod music player and iPhone mobile phone OtterBox welcome at a global, deeply consumer's affection. According to media reports, OtterBox will continue launched unique iphone 4 cases.

X-doria is the United States of America high-end fashion accessories brand, this event was crowned world apple industry chain leading brand 20 strong at the same time, the classic X-doria Defense 360 session of the general assembly once again won the " products innovation design award ". The new season X-doria focus on three-dimensional texture hand carved, with laminated fluorescence bright build Xuandong tide, perfect inherited the core design concept of X-doria fashion brand, high-end. Since iPhone 5 World Premiere, X-doria with the fastest speed of global power has more than 100 parts of new, more a listing a month iPhone5 cover global sales break million.

iPad Mini Smart Cover VS iPad Mini Metal Case

IPad Mini is too small and not to attract the eye of the people?

Then you can look at this retro scrap metal type iPad mini case.

The scrap metal protection case is a one of Shima series products, which is designed by the Japanese BIRD company, Shima Mini protective cases are specially designed for iPad mini, the appearance of the scrap metal style. In the new product of apple new brilliant set such a reexamination of the scrap metal protection shell, this contrast is really great, attract eyeball sometimes with comparative strong style.

The cover itself is thick and sturdy and feels like it should withstand repeated folding. That's great because the metal iPad mini case folds up into a number of triangular shapes that then function as great stands for the iPad mini. Learning the different configurations takes a little time, but after a day with the case it felt like second nature. The cover has been pretty good about staying stain-free and has defied repeated placement on my dirty kitchen counter over the past week by staying totally clean. Because this iPad mini case is adopted with metal material, so the price is a little high, it sells at 3980yen. If you want to buy cheap iPad mini cases, you can go to icase-zone.com.

The second one is Smart Cover, it is made from polyurethane, the iPad mini Smart Cover is available in five main colors - blue, green, dark grey, light grey and pink - the same as the iPad's Smart Cover in fact, although that also comes in a choice of five leather designs. There's a sixth special edition red-colored one too.

The inside is adorned with a soft microfibre faux-suede layer, the color of which complements the outside. This helps keep the mini's screen clean, but in our experience the thin and flexible folds separating the three plates create two channels into which dust readily collects. This frequently left two lines of dust on the iPad mini's screen.

There is also a portrait stand alongside from the usual set of landscape modes, and it's one of my favourite features of the case by far. It's a lot easier to edit iA Writer documents in portrait mode (due to the smaller font size in that orientation), and I'm thrilled that I don't need to carry a separate stand with my iPad to edit the way I want to. Do you like this Smart Cover? According to media reports, though Apple iPad mini and iPhone 4 have published, Apple still will launch cheap iPad mini cases and unique iPhone 4 cases to appeal fans.

Cute iPhone Cases PK Cool iPhone Cases

RICOUS Colors series protective case looks simple and generous, only change in color, with orange, purple, rose red, blue and black 5 colors are available. The design of the product itself without too much flowery, pure candy color design, ultra-thin material that is using Bayer of Germany imported materials to produce can perfectly fit body, to ensure more comprehensive.

The RICOUS Colors series iPhone 5 protective case is made of Bayer of Germany imported PC material, the case body is tough and resilient, can bear high degree bend without breaking, reduce even in the winter cold product toughness is not, let your mobile phone all year can enjoy perfect close protection; frosted surface precision molding, feel comfortable and meticulous, but also has the characteristics of preventing scraping, non-slip, waterproof, anti fingerprint, heat resistant, good protective effect. The RICOUS Colors series iPhone 5 protective case is a so cute case.

The next one is a cool iPhone case. We've been doing extensive testing of iPhone 5 cases for the past month. We each have our own favorite case for our own reasons, which are at the bottom of the post. Before we get to that, we should give an overview on the market for cases. This case snaps on to your phone, only adding a little bit of extra bulk to the phone. It also generally offers unfettered access to the buttons of the iPhone. However, there's a

slight annoyance with the snap cases. The thick plastic makes it hard to press the iPhone's buttons. If you want to hit the power button, you're almost blocked by the hard plastic on the top of the case. You have to angle your finger to press the button. What is more, this case also has a version of iPhone, which is one of coolest

iphone 4 cases in the market.

You have to ask yourself what you're looking for. Do you want to keep the phone thin? Do you want to have the phone protected at all costs? Are you looking for a funky design? Are you looking for a good feeling when you're holding the phone? If you want to learn more information about iPhone cases, you can go to [icase-zone](#).

The Newest and Individual iPhone 4 Cases

Today we will introduce some cute and unique cases for you. The first iPhone5 case is launched by Griffin, the case has fine workmanship, with a front cover in the protection of housing, so that it can be on the mobile phone screen protection, on the front cover is provided with a clamping groove, so also confers protection shell more features.

The internal Griffin cortical case is used in the bottom shell of plastic material, the outer layer is cortical, protective shell on the front cover provides three card slots, the slot side opening can also be placed in coins and other objects. The shell can be a certain extent, wallets and card package together, saving the user space on the body.

Protective shell back designed for iPhone5 camera reserved openings, wearing the protective shell will not affect the normal operation of the mobile phone. The protective shell for \$29.99, interested users can go to the official website to view more information. By the way, this company also launched a version of iPhone 4, if you have an iPhone 4 and have an interested on it, you can buy these

individual

iphone 4 cases.

We also introduce a lot iPhone case that has a card slot, the protective shell is better than previous. The protective shell is launched by the Marware, from the appearance point of view the overall design is simple, simple design and iPhone 5 is tie-in.

While many iPhone owners may question whether this is the ideal case to carry around, we can understand that others may find this amusing and pointless for mobile use, but the tail makes a great stand for watching videos and the blow hole at the top is ideal for your earbuds. The 3.5-millimeter headphone jack is a useful option and the hollow hump of the case can be used as storage space for them, as well as USB cables.

Initially launched on Kickstarter, Slip Stopper adds grip to the slippery iPhone back without bulk. Users can have a peace of mind and no longer worry about the iPhone gliding out of the hands or slipping off the desk or the car's dashboard. The unique gel resin adds grip but does not stick in the user's pocket. It's also dustproof, scratch resistant, and shock absorbent. The patented 3M adhesive technology leaves absolutely no residue and is reusable. Slip Stopper is the ideal choice for users looking for iPhone 5 cases. If you want to learn more information about

Five Unique and Cheap iPad Mini Cases from iCase-Zone

Apple iPad Mini has launched for a long time, more and more people bought iPad mini, so to buy a protective case is critical, so today I will introduce some cost-effective products to you.

The difference between the iPad and iPad mini is that iPad mini uses 7.9 inch screen and smaller than iPad, so that it is more convenient to carry and use. Apple launched the official Smart Cover to protect the iPad mini, but its price is more expensive, we will not introduce. Now I will introduce some third party products, which they are cheaper and better than official Smart Cover.

Today we collect five representative iPad Mini protection products, different materials, such as hard plastic, leather texture, and polycarbonate materials etc. Work and feel are very good, at the same time, it can protect iPad Mini against dust and other damage. Let's take a look at them.

Fine leather manufacturing Moshi iPad Mini protective case

Recently the United States well-known manufacturer of peripheral Moshi, released its unique iPad mini cases that is designed to protect Apple iPad Mini, we introduced before the Moshi from the iPhone4 era from iGlaze now, Moshi product series is less. But the VersaCover series iPad Mini case, which used the same design with iPad cases.

This dorsal shell protection case is made of traditional polycarbonate material, and front part of the front cover is provided with superfine fiber leather manufacturing, not only that, the protective case has support function, which is very useful. The the price of Moshi iPad Mini cover is \$50, equivalent to approximately RMB 300 yuan. The price is very good.

Excellent iPad Mini Handle Leather protective case

For some business people, leather protective case is better than plastic protective case for them, so many accessories manufacturers have begun to protect the sleeve out of the leather. I will bring you a today named Next Step leather protective case, I believe it will win a lot of welcome.

Next Step iPad Mini cover uses the genuine brown leather, the design is very retro. This case has a multi-functional front cover, which can be iPad Mini provides a support function, this function is very useful in travel. The fraternity of walnut currently sells for \$64, about 404 yuan.

Hard plastic iPad Mini protection case

Speck is one of the world famous Apple accessories brand, the brand has launched a number of good parts products, got well received by users. But I do not know is the reputation has earned enough or recently benefit is not too good, Speck recently released a SmartShell iPad Mini case, which work quality is not good, it is very like a copycat products.

Named as SmartShell iPad mini case only has hard plastic material, which looks very rough. But outside the protection case has not any novel design, it is very monotonous. Of course, these are not the key, key is to protect the shell this regardless of workmanship or appearance are no bright spot was priced at 218RMB.

The colors must be good boundary iPad Mini protective case

Uniq is the United States well-known Apple accessories manufacturers, the brand's products has always been the majority of Apple users demand. Uniq recently released a product called Maech iPad Mini cover, the appearance is very beautiful. The protective sleeve using different colors to show different beauty, absolute gives another impression.

In addition to the protective case material appearance is also very good, depending on the fabric made of silica gel and soft, not only have a good feel and protection performance also is good. At present, the March iPad Mini cover the price of \$49.9, equivalent to approximately RMB 311.

Feel first-class fashion iPad mini case

SwitchEasy is the United States a local and famous Apple accessories brand, the brand of Apple accessories have been favored by the vast number of users. Recently SwitchEasy launched a protective case for the new iPad Mini, named Cara. Beautiful appearance and comfortable feel, believe it will be a good choice for users.

After careful grinding and polishing treatment, the Soft plastic case has a comfortable feel, appearance is beautiful. The most important is to be able to play a good buffer internal rubber material, so the protection is very good. At present, the protective case sold for \$40, about 249 yuan.

Today we have introduced the five products, they are cheap

ipad mini cases that the price is controlled in 500 yuan, workmanship is excellent, can play a very good protection function for iPad mini, immutable and frozen, have a taste excellent protective sleeve is the best way to highlight the fashion and personality, so which one do you like best? If you want to learn more information about ipad mini case and other Apple accessories, you can go to [icase-zone](#).

Do you like these Cute iPhone 5 Cases from iCase-zone

Pink is always a favorite color for the girls, today I will bring a pink lines iPhone case for you. Plum blossom pattern matches bright tenderness pattern, I believe this iPhone case that is launched by Zazzle website will be a favorite case for all female compatriots.

The Zazzle iPhone 5 case is a printed pattern, but the pattern design 's sake, seems to have a very strong sense of

three-dimensional, let a person feel very fresh. At present, the girly protection case sold \$45, equivalent to 280RMB.

Marilyn Monroe is one of the most famous movie actresses in the United States in the twentieth Century. She won a stunning performance style and sexy beauty, became the representative of many fans' heart sexy goddess, sexy symbol and popular culture. But for the iPhone5 case that brings you today the whole interpretation of another kind of style of Monroe: the dress was entranced with the music of Monroe, who was full of tattoos.

But is the goddess is goddess, even if the body covered with tattoos can not resist his elegant temperament, Monroe fans not to take it? The protective shell is currently priced at \$14.99, equivalent to approximately RMB 100. If you want to learn more information about

girly

iPhone 5 cases, you can go to icase-zone.com.

Next I will recommend a girl special protecting case to you. If many before the recommended protective shells are more suitable for the cute style girls, then this protective shell should be for those taking ladies route girl design. The protection shell called Bouquet in Red, simple design is absolutely give a person a kind of elegant feeling. The protection shell material is also very special, the outer layer is the use of cotton material, lining is black suede. Because of these two kinds of material can be ignored, so the protection shell is considered a decorative accessory. At present, the product sells for \$10, equivalent to about 63 RMB, whether material or other never meet you ladies temperament.

For girls that always chase after fashion, color is bright protective shell, which is the greatest love. For example, the Ke Ma company launched the colorful candy iPhone5 protective shell, believe that the protection design style matches fashion will let many female students heartbeat.

The protective shell uses unique "double color design" : border uses a color, after the shell is a kind of color, looks very stylish. The main material selection of German imports of high-quality TPU Seiko production, not only the extreme thin, scratch and abrasion resistance is also very good. At present, the colorful candy iPhone5 protection shell sold 128 RMB.

If you want to learn more information about cute iPhone 5 cases or

unique

iphone 4 cases , you can leave a message to me, next I will continue to introduce many kinds of iPhone cases for you.

Apple iPhone Cases From iCase-Zone in Free Shipping

According to foreign media reports, focus on the research and development of various tight compact consumer electronic product protective case of OtterBox company launched a variety of fashion color shell for several top intelligent mobile phone, including Apple's iPhone4, iPhone4S, iPhone5 and Samsung GALAXY S3, and the user can also features special mobile phone shell custom only belongs to own themselves.

Reportedly, the "protection" of the case makes iPhone4, iPhone4S, iPhone5 and Samsung GALAXY S3 to an additional three characteristics in a certain extent, which is composed of two layers of polycarbonate shell and the outer layer of silica gel, which causes the body to have better protection, and the screen is designed to screen protection in part, at the same time does not affect the touch; at the same time the series of housing also has a belt buckle assembly.

But this series of housing a big disadvantage is that the mobile phone volume becomes larger, so want to use these shell users also need to consider their own tolerance degree of the mobile phone volume.

Rumors of a cheap version of iPhone has not been broken, like yesterday, it will have news that Apple will offer a cheaper version of iPhone specially for a no Home key plastic fuselage patent. But today immediately Apple officials declared the patent is only an iPhone case, isn't a cheap version of iPhone.

It is understood, the Apple officials from the United States Patent and Trademark Office out of the patent, this patent, 8364032. Patent Description is for the Light Isolating Protective Cover for Small Form Factor Electronic Device, which means lightweight isolation protection for small electronic equipment enclosure. It seems that this patent is indeed a protective shell of patent, a cheaper version of iPhone seems more and more distant from us.

Apple iPhone 5, people really love and hate, exquisite design and superior user experience, let a lot of people itch for a try, but paint " off the door and then exposed the " a lot of people and step back, but for a lot of fans, paint is not thing, the market shell products can protect many well to solve this problem, we also saw the advent of iPhone 5. For many girls, they like to use pretty

iphone 5 cases to dress up their beloved iPhone 5.

All accessories manufacturers have introduced every kind of protective shells, say good protection of iPhone 5, but the fact is not this, some protective shell not only protect the body, but because of the defect and the quality of their design, causes the protection shell itself have damage to the body.

So, we must first some big brands of well-known manufacturers in the selection of accessories, today I will introduce a Moshiclassic product version of iPhone 5 -- Moshi iGlaze for iPhone 5.

Moshi iPhone 5 protective case still adopts a very simple packaging, like many Moshi products, packaging simple direct the protection shell show your stylish style. IGlaze series a total of eight colors, black, white, and blue respectively, gold, red, purple, pink and transparent color, need to be able to satisfy most users. What is more, Moshi will plan to launch more unique
iphone 4 covers to meet all kinds of demands.

The Perfect Protection of Stanley iPhone 5 Case

Recently Apple well-known parts maker Incipio launched a new Stanley case for iPhone. The inception of the company is a dedicated to the creation of the company, the mobile phone shell, called Stanley, which is full of creative inspiration and design sense. This work mainly work in the complex working environment of iPhone mobile phone, as they provide strong, perfect and unbreakable protection.

This Stanley case is launched by Incipio for iPhone 5, iPhone4/4S and Motorola Defy, in the retail price sold at 39-49

dollars (about RMB 240-300). At present, there are a variety of different colors to choose from, but should be the most popular and famous Stanley yellow or black.

Incipio was founded in 1999, Incipio Technologies consists of a group of top design master and movement, in just a few years, it is rapidly becoming a consumer electronics product peripheral products leader. Its unique and elegant design is the best choice of collocation of Apple products, the Apple Shop quickly became a hot brand. What is more, Incipio also launched many kinds of cheap iphone 5 cases to meet demands.

According to Japanese media reports, a company called Trinity (not APU) the company issued a special designed for iPhone 5 " Ultra Thin Cover Set-Zero protective shell of 4 ", the thickness of case only 0.4mm, and the three piece of paper thickness almost, the weight is only 5g, is currently the most frivolous iPhone 5 protective shell.

The protective shell is made of polycarbonate, with heat resistance, impact resistance, fire resistance, it is very suitable for protecting shell. The shell in the keys, camera and other parts made careful cut processing, will not affect the operation of any functions.

The price of the protection shell sold at 1980 yen, or about 130 RMB, includes antimicrobial film, earphone wire clamp and wipe patch use and other accessories, a total of 5 colors, transparent, pink, blue, green and orange to choose from.

Apple Will Publish The New iPad Mini in April

According to Piper Jaffray analyst Gene Munster said: Apple will hold the new conference at the end of April, then we are likely to see the new design of the iPad. Gene Munster said: "we believe that Apple is likely to launch a full size iPad new design, and have the appearance style of iPad mini. But limited by supply constraints,

the use of Retina display of the new iPad Mini might be released later in the year. "

Apple iPad Mini released in 2012 October, the fourth generation of full size iPad compared to the previous generation products, the overall change is not big, so according to the apple before launch cycle, in 2013, March or April, is likely to be issued with a iPad Mini style view full size iPad. Gene Munster also said, in addition to the new update of the iPad, Apple may introduce a new version of Apple TV, and can be applied to the Apple TV APP Store, in preparation for the full size iTV future.

According to foreign media reports, investment news website BrightWire quoted close to Apple suppliers in Taiwan Chinese sources as saying, Apple's next-generation iPad Mini will configure the pixel density for the retina display 324 pixels per inch, higher than the fourth generation iPad retina display screen.

It is reported, AU Optronics in trial production of 7.9 inch display second generation iPad Mini configuration. The next generation of iPad Mini screen resolution will reach 2048 X1536 pixels, 4 times than in the first generation iPad mini, and is the same with the fourth generation iPad. In that time, I think more and more iPad mini accessories will come into being. Many iPad Mini fans want to use

best

cases for ipad mini, on the whole, Apple has a big effect on peripheral industry.

The iPad MINI has a small size of flat computer with iPad the same resolution that Apple can have high resolution, and no requirement for the developer based on the optimized for the application of another kind of display size.

Since the iPad Mini released, the next generation of iPad Mini rumors configuration higher resolution display has been the existence of. Despite being part of the media criticism is not configured to retina display, but since the release of iPad Mini sales is quite strong, recently Apple can satisfy the market demand for iPad mini.

A Review About iPhone 5 Leather Cases

As for the famous Intoxicase bottle opener protective case, I believe we are not unfamiliar with it. Today, Intoxicase also launched the upgraded version of the new: Intoxicase Five, only exclusive models version for iPhone 5. Intoxicase Five case still uses polycarbonate durable production, back shell embedded with stainless steel bottle opener. (of course, also want to pay attention to what is your occupation) Intoxicase Five overall size is 117mm/ long x 61mm/ wide x 13mm/ thickness, size and general protective shell is installed. At present the official price of \$49, equivalent to about 305 RMB, interested friends can also go to the official website for more details.

In September of last year, the Apple Corp new conference was held in American San Francisco Yerba Buena Center, in the conference, officially released a new generation of mobile phone product iPhone 5. The new product becomes big screen, at the same time also becomes thinner, lighter. It is reported, iPhone 5 used 4 inches retinal screen, screen resolution of 1136x640, screen application icon was increased to 5 rows. iPhone 5 will be pre-installed Apple's new iOS 6 system.

With the release of new products, it is of course iPhone 5 accessories market fiery. GGMM launched Apple leather

iphone 5 cases, not only the classic business but also more durable, more fully demonstrated the characteristics of iPhone 5.

Four major characteristics

1, ultra-thin clamshell design, considerate careful protection

Select an album of quality leather fabric and grey superfine fiber material, combined with the application of PC base, through the fine sewing, hot melt, voltage process, make leather protection sets of this simple clamshell. Edge will be made of natural fiber section cortical be exposed, joint stitch regular appearance, highlight the fine quality, modern technology and craft with the comfortable, elegant, strong and durable.

2, portable mini sucker

The front cover two built-in soft silicone material Mini sucker, compact and lightweight, the iPhone5 becomes into a bottom bracket, close cover, sucker can be easily adsorbed on the screen, the

protective sleeve and the body to form a perfect whole, not easy to fall off, the whole party to care for their. Open the front cover, the screen without leaving any traces.

3, the call more convenient

The front cover of the receiver holes, can answer the phone after the front cover, still keep the voice. Protect the screen clean at the same time, more convenient for handheld.

4, convenient disassembly of the PC base

The bottom bracket using high-quality PC integrated molding, material clamping precision, not easy to fall off. Select and leather with the color of translucent color, to create a matte texture, scratch resistance, also plays a role in protecting the excellent shock absorption, resistance to fall.

Apple iPhone is the best reliability in mobile phones

February 25th news, according to the understanding of consumer products, dedicated to provide repair guide FixYa released this week by the intelligent mobile phone brand repair analysis report, Apple, Samsung, Nokia and Motorola intelligent mobile phone manufacturers, the highest reliability is Apple, reliability index 3.47, ranked second in the Samsung 1.21, shows the reliability of iPhone is almost 3 times of Samsung mobile phone.

According to FixYa, a higher index indicates that it is more reliable, the index is according to each manufacturer's mobile phone problems proportional data. For example, iPhone's market share was 25.86%, there were 74000, Samsung mobile phone market share of 22.69%, 187000, Nokia mobile phone market share was 22.15%, 324000, Motorola mobile phone market share is only 1.81%, but the number of times the problem is as high as 136000 times.

As everyone knows, iPhone's main problem is the battery life, 35% of all issues, the lack of new function accounted for 20%, accounted for 15% of the lack of customization, unable to connect to Wi-Fi accounted for 15%; besides, the Shell of iPhone is easy to scratch, so many users have to use

unique

iphone cases to protect their beloved iPhone.

Samsung mobile phone main problems from the microphone, speakers also accounted for 40%, accounted for 20%, the battery life is occupied 15%, device to heat 15%; Nokia mobile phone is the response is too slow (35%), the application is too small (20%), the battery life (20%) and (15%) device overheating; Motorola mobile phone application problems from preloaded (30%), touch screen is ineffective (25%), horn quality (20%) and quality (camera 15%).

In addition, FixYa further analysis of various intelligent mobile phone quality, said iPhone operation interface is the most simple, but cannot be customized, battery life since iPhone4S suffers criticism, and new models failed to add more new functions, however, iPhone users think it is relatively stable, the core function of almost no mistakes.

As for the Samsung mobile phone also has a user interface is interesting and high order screen quality, but the battery problem some models the influence of credit, such as GalaxyNexus, there are many models have emerged in the microphone and speaker problems.

Nokia mobile phone has a touch screen and home interface design excellence, but it still has the response is too slow, inefficient application, battery life and overheating problems; intelligent mobile phone and Motorola manufacturing although battery life and appearance design is good, but it doesn't even allow the user to remove pre-installed program resources, but also touch screen, speaker and camera quality problems.

The Ad Impressions of Tablet Have increased in 2012

Mobile advertising platform MillennialMedia recently released a new report, statistics the year 2012 mobile devices in the network

data flow, which is the main reason to increase its flat ad impressions, and Android equipment increased a lot obviously. Kindle Fire and Samsung tablet are big winners, helped Android flat occupied 41% of the shares, Apple was 58%.

Shares in MillennialMedia 2011 iOS plate and Android plate are respectively 80% and 17%, in 2012 the Android tablet will have a substantial growth, one of the biggest contributors shall belong to Amazon's second generation KindleFire product line, compared to 2011 growth rate of 500%.

Intelligent mobile phone market share will continue to rise, increasing from 75% to 68%. The Android intelligent mobile phone market share increased by one percentage point, while the iOS has slipped, blackberry still ranked third, WindowsPhone increased by one percentage point.

Millennial points out that in the Top20 rankings, Android equipment still occupy most of the seats, while the Apple device in each class is still the market leader, only a few core equipment occupies a large share of data flow. iPhone ranked first in the mobile phone, increased from 14.67% to 15.59%, Samsung with the GalaxyS product line, success will BlackBerry squeeze down from second place, advertisement impression ratio of 4.24%, the annual growth rate of 182%.

In all Apple products, iPad mini is the most conspicuous and eye-catching performance of a product. The ad impressions on the growth rate of 28%. Millennial says, in all 7 inch tablet products, iPadmini's performance is the best. In 2011 KindleFire came into being first, its growth rate was only 19%. So we can arrive at a conclusion, the more ipad mini, the more cheap ipad mini cases.

From the above we can see that, compared with the intelligent mobile phone function machine share share, it is too little, further increase the share of future intelligent mobile phone and tablet device will, also will be a very important part of the market.

It makes sense for Apple to double the pixel density of the iPad mini in order to bump the screen up to "Retina" display quality, but going up to 400 pixels-per-inch (ppi) makes no technical sense at all.

The current generation iPad mini features a 7.9-inch

1,024x768 display with a pixel density of 163ppi. This falls below Apple's standard for a Retina display screen, where the human eye is unable to distinguish individual pixels at normal reading distances for the device. The pixel density is well below that of the current generation iPad and iPhone, which have a pixel density of 264 and 326ppi respectively.

If you want to find more iPad mini cases, you can go to [icase-zone](#).

Tell you Why Apple Would Decline

Of course, the demand decline is a relative term. In the case of iPhone, this does not mean that iPhone sales will decline. On the contrary, this situation may be iPhone sales growth slowed this year. For Apple, the worst may be decreased iPhone shipments in 2013. In either case, consumers and business users in 2013 the demand for iPhone will have some extent decrease. Don't believe in? Here are 5 reasons why iPhone demand will begin to decline in 2013.

1 Apple will fail in hardware performance competition

Current mobile users need powerful hardware performance. The user needs to own a mobile phone to play games, to provide the best performance and within a year, never out of date. But, look to mobile, Apple's hardware performance competition defeated. Product configuration speed Samsung and other companies to provide faster and better graphics card. Consumers are beginning to understand this point.

2 Apple also will fail in competition

Apple will not only fail in hardware performance competition. From the comparative point of view in technical specifications, Apple's device iPhone began to lag behind the competition. For example, iPhone4 inch screen than the main rival mobile phone small 1 inch. What is worse, iPhone lack of the support of NFC technology, its camera quality is also behind the Nokia mobile phone camera. At least in the field of intelligent mobile phone, iPhone is no longer give people so impressed with the product. So in that time, all kinds of iPhone accessories will be disappear, for example, cute iPhone 5 cases.

3. iOS has been behind Android

When Apple introduced the iOS, the mobile operating was far ahead of the market on any operating system. However, iOS is now behind Android. For example, Android fully supports the NFC data transmission and multiple user accounts. Using Samsung's PremiumSuiteUpgrade (Senior suite upgrade), users will find many good features, others such as, according to the position of the rotating display user face. At the same time, iOS is a very good 2010 software technology. In the mobile market, two years is a long time.

4. Embarrassed everywhere

It is important to pointed out that, Apple and its operating system have many embarrassing things in the past two years. When Apple introduced the Siri voice assistant function, this function is to improve people's work efficiency. However, Siri has become a laughing stock, because the voice response technology not much improved. Users also not forget these flaws. Because of concerns about these problems, users in the purchase of iPhone may consider.

5 China is a worrying problem

Apple has the marketing problems in china. The big problem is iPhone not in China Mobile sales. China Mobile has 7 hundred million users operators. Another problem is the selling price of iPhone in China than in the United States sales price a few hundred dollars. In fact, iPhone is too expensive, Apple has started to provide a monthly payment plan for iPhone. In one there are still many people who live under the poverty line of the country, the price is a problem.

What about the future of Apple iPhone

Like Samsung GalaxySIII, the mobile phone has prompted the question. Apple's mistakes and lost opportunities also urged people to put forward the question. In this process, some people wonder whether iPhone will be decline in 2013 to combat in demand.

Of course, the demand decline is a relative term. In the case of iPhone, this does not mean that iPhone sales will decline. On the contrary, this situation may be iPhone sales growth slowed this year. For apple, the worst may be decreased iPhone shipments in 2013. In either case, consumers and business users in 2013 the demand for iPhone will to some extent decrease. Five reasons to tell you why iPhone will be decline in 2013 to combat in demand.

1. propaganda machine is reduced

When Steve Jobs managed Apple, Apple 's propaganda machine has been running very well. However, Apple 's propaganda machine now weakened. Current CEO Tim Cook does not like Jobs charm. Apple has lost many dazzling star charm. Consumers also began to realize that apple is no longer the only can provide exciting products company. Apple's new mobile product updates have been somewhat boring also illustrates the problem.

2, the amplitude upgrade of iPhone may be quite small this year

To observe the history of Apple, Apple makes a major upgrade to iPhone every year. If Apple again this year in accordance with the implementation of the plan, iPhone5S will only is very small and the upgrading of the iPhone5. For a need to make efforts to improve their product demand for the company, this is a problem.

3. Samsung made a challenge for Apple

Many discussions about iPhone, which are related to one of the biggest rival in the field of mobile: Samsung. Samsung is not only the main enemy apple in a patent court, and continue to provide the same apple iPhone as good or better products company. GalaxyS4 intelligent mobile phone Samsung is expected to be launched in the next few months. The mobile phone may be far more than iPhone5. If so, Apple will be very difficult to keep up with the pace of Samsung. Though this, I think that there are still more and more iPhone cases come into being, for example, cheap iPhone 5 cases.

4, Google is a great threat to Apple

We also don't forget Google is a great threat to Apple. Over the years, Google has been improved Android. Now, Android may be better than iOS. In addition, Google will firm partners invested heavily

in hardware. Paying attention to Google will take massive action this year against iPhone.

5" value"

All of these problems are formulated as a final question: Apple can really win the "value" reason? Since 2007, iPhone by the reasonable price is generally thought to seek high-end properties of ordinary consumers is the most valuable. However, this opinion is now is not necessarily true. The price of iPhone is in intelligent mobile phone price range of high-end. Considering the function of iPhone has not yet reached some competitive product level, still do not see consumers this year will be found in the iPhone of much value. Whether you believe it or not, iPhone may lose their high prices in 2013 on the grounds.

If you want to learn more information about iPhone cases, you can go to best case mall.

The Development Direction of Tablet manufacturers

Although apple is challenged by Samsung mobile phone manufacturers in the market, in the tablet computer market, iPad still be thriving. Design and therefore most tablet computer with iPad as the only opponent, which resulted in the beginning of the year two exhibition -- CES and MWC, we can always see each manufacturer for a collective iPad response, like a teacher made questions, students answered the questions.

But unlike the previous two years, this year the teacher Apple is somewhat different the question, this is because Apple in October last year has finally released rumors have published iPad mini, to fill the gaps in the apple in the small size and low flat computer field. iPad Mini a listing on the popularity in China, is swept each big company annual meeting and at the show Apple iPad Mini means tablet manufacturers gives answer: two years ago at a low price and size difference no longer work, that in MWC, how to solve the iPad problem Mini this problem for the tablet manufacturers?

Samsung: products are better than Apple in hardware

Samsung Galaxy Note 8 tablet computer in the MWC, unlike Note

series products in the past, this product is not the most outstanding Samsung Electronics Hardware collection in a body, the screen resolution of 1280*800, the pixel density is 189 PPI, the size is 8 inches. Comparison of apple iPad Mini 1024*768 resolution, 162 PPI pixel density and 7.9 inch screen, Samsung Galaxy Note 8 almost every parameters are only a little bit higher than iPad mini.

The continuation of the Samsung products for Apple's consistent finite surpassing strategy, to ensure that Samsung products in the maintenance and Apple products in the same price at the same time, the configuration can be a little beyond, in order to achieve the purpose of attracting consumers, Galaxy Note 8 will become the biggest rival iPad mini.

Lenovo: a lot of cheaper products

Lenovo's strategy also maintains the style of the past, the quantity and the price. Based on this idea, Lenovo launched in salvos three tablet computer in the MWC, three product size and screen resolution is different, but the processor are part of the programme, Lenovo is obviously trying to drive down the cost of creating a price advantage in response to iPad mini.

But in the past the facts have proved, low price and number of varieties and can not shake the dominance of iPad, Lenovo so obsessed with the strategy of puzzling. In fact, in the Nexus 7 tablet computer into the \$199 range, for flat-panel manufacturers profit space has been quite modest, the price war has become a very unwise choice.

ASUS: more deformation products adhere to the hardware of creative

In addition to working with Intel to launch a conventional design of flat computer, ASUS in MWC exhibit more mobile phone plate deformation products, which show the ASUS unique understanding of flat products hardware. Although the ASUS third generation Padfone and Memo deformation products won acclaim, but this kind of product is faced with good skills, according to public information, the first generation of Padfone only sales of less than 1 million, ASUS overseas market still needs to be strengthened.

The deformation of the product but also show the ASUS ability of hardware design and manufacturing capability, which won favor with Google, ASUS cooperation launched Nexus 7 with great success, in the MWC was selected as the best tablet. What is more, we can see from the more and more nexus accessories have appeared, for example,

cheap

google nexus 7 cases.

HP: Acer is cheap

HP in the MWC has returned to the flat panel market, but the first product was the main price strategy, the introduction of the Slate 7 for only \$169. But this is Acer's \$99 flat or a lot of expensive, Acer had introduced in CES \$99 tablet ICONIA B1 really is the price of butcher.

But the hardware manufacturers to make price war is very unwise, look at the flat computer product history, product prices down is the two Internet Co's products: Amazon Kindle Fire and Google Nexus 7, which directly led to the Apple iPad Mini can only be maintained at \$329. But apple, Google and Amazon can find a profit point in the hardware products, which is a cornerstone of its low-cost strategy, hardware manufacturers and Internet Co to make price war is undoubtedly court defeat by fighting against overwhelming odds.

Problems of iPad mini to the panel manufacturers still no solution.

Samsung Galaxy Note 8.0 Tablet VS Apple iPad Mini

According to foreign media AllThingsD reports, Samsung today at the mobile world congress officially launched the Galaxy Note 8 tablet computer, desire to break into medium-sized flat-panel computer market, beat to Apple's iPad mini and Google Nexus 7. Samsung Galaxy Note 8 size is between 5.5 inch Galaxy Note II and Galaxy Note 10.1, now Samsung in almost every dimension has a product line.

Samsung Galaxy Note 8 tablet computer has 8 inch touch screen, pixel 1280*800, equipped with S Pen stylus as with Galaxy Note series of products, the products also include many new features.

The first new feature called "reading": as long as the user

open electronic reading application, the device will automatically adjust the screen contrast, to reduce user fatigue of eyes, read more like browsing the electronic ink display. In addition, Samsung is still Galaxy Note 8 installed many proprietary applications, such as Samsung smart new notes of application of Awesome Note and application of Flipboard and other social news.

Samsung Galaxy Note 8 with S Pen can control the computer hardware button for the menu and equipment stylus, in the previous Galaxy Note series products, the menu and the hardware buttons only controlled by finger touch.

The flat computer uses the Android version of the 4.1.2 operating system, 1.6GHz Exynos quad-core processor, 5000000 pixels and 1300000 pixels in the rear camera front-facing camera, the software features include Galaxy Note II and Note 10.1 features such as multiple window support and video pop-up window.

Another feature is that Galaxy Note 8 global version also provides telephone function, which will include Wi-Fi version, 3G version and LTE version, including 16GB and 32GB capacity expansion.

Of course, this product is not a Samsung tablet computer first medium-sized screen, 7 inch Samsung tablet computer initially involved in is Galaxy Tab, but the Tab tablet computer. But it is not better than Galaxy S series intelligent mobile phone and Galaxy Note palmtop computer.

Though Samsung has launched in many sizes products production line so far, they were different. The Samsung Galaxy Note 10.1 tablet computer listed before, Samsung products are very easy to confuse. Samsung now expect multiple window support and S Pen smart touch pen function can help Galaxy Note 8 talent showing itself in the Apple, Amazon and Google and other competitors. However, Samsung Galaxy Note case is not good as Apple, for example, now more and more people like to use cheap ipad mini cases free shipping.

The product price of course is also a key factor, but Samsung today has not yet announced the price details. Samsung Galaxy Note 8 is expected in the second quarter of 2013 in the United States and other market, Samsung said sale will release more information.

Samsung also said that plans in 2013 to become the main focus of

the United States of America flat-panel computer business market. Samsung subsequent new products will be around the main theme of several design, including the bedroom experience, more consistent user interface and creativity. maybe interested on:

Intensifying Competition between Google and Samsung

The Wall Street journal recently wrote, Google and Samsung in recent years the cooperation is win-win, but relations between the two sides is from a friend to frenemies stage, both sides compete in hardware, media content stores and Internet services is rising.

Some years ago, Samsung Electronics supported Google's decision system of Android, has been proved to be a win-win choice. Samsung technology and marketing strength to help Android mobile operating system, which has become the most dominant, while Android let Samsung and Apple as an equal, received billions of dollars in profits from the intelligent mobile phone and tablet computer business.

Now, from the Barcelona Mobile World Congress (MWC), the relationship is entering a more complex and delicate stage become more obvious. As previous reports of Samsung hopes to get Android higher advertising into Google cited dissatisfaction reported, the increasingly tense relationship between the two partners.

Google in the last only focused on software business, but in the past year, the company to enter the large-scale hardware business, the completion of the Motorola mobile scale high of \$12500000000, while actively expanding its brand Nexus series and Chrome equipment.

For Android equipment manufacturers, the move is a worry, because they worry that Google may favour Motorola, let it take advantage of other Android equipment manufacturers in the competition. Google said, Motorola service is an independent operation, it does not treat differently other partners. As of now, Google and Samsung are trying to downplay both competition and tension. Samsung communications Usa Inc chief product officer Kevin

Parkin, said in an interview, he saw more positive momentum of bilateral relations.

"At some level, you must trust each other," he said, "Google know they must prove they have between Android and Motorola separated by a fence." Parkin Ham pointed out, such as friend and enemy mode won't let Samsung uncomfortable, after all other departments have been sold Samsung and Samsung parts to competitive equipment manufacturers.

Flat field

Flat computer is becoming fierce competition of the battlefield.

Samsung at MWC. This week released a new tablet computer Galaxy Note 8, aimed at last appeared in two medium-sized flat-panel computer -- Google Nexus 7 and iPad mini. Now we can imagine that there will be more and more Samsung Galaxy Note cases come into being, just like

cheap

ipad mini cases.

Parkin ham said, expand the tablet computer market share is the top priority of the company in 2013. For Samsung in 2010 launched the first tablet computer, Parkin, said the user experience is not very good." The experience is just not good enough. " But he points out that, along with the launch of the new tablet computer, the problem will become the past.

Internet service

In the Internet service, Samsung and Google competition also is in upgrade status. Related services currently offered include online Google wallet Checkout, online content storage cabinet Google Cloud Storage, and mobile and PC payment service Google Wallet.

In the MWC, Samsung has released a new cloud storage service HomeSync. HomeSync allows people to upload and download content from a variety of devices, the use of cloud technology, at home through the wireless technology or through a mobile device and family to share content in outdoor. Samsung has also revealed its new ambitions in the field of payment, at the MWC conference announced an agreement with Visa. According to the agreement, Samsung agreed to use Visa in the mobile payment technology.

An Introduction of Apple iPhone 5 Accessories

Apple iPhone 5 is one of the most popular mobile phone, has become a symbol of high quality. Just like people now use the price of iPhone 5 to measure the other brand mobile phone, has become the price of iPhone 5 for the mobile phone industry standards. Apple iPhone 5 has become the product of a new era, which has become a trend of products in today's society.

For users of the iPhone 5, the most concern is how to protect the mobile phone, who does not want lovely iPhone that has a little injury. Now, mobile phone shell not only serves as a protective role of mobile phone, mobile phone has become ornaments. Types of mobile phone shell is various, style is each different, the function is very comprehensive, we can choose a suitable for mobile phone shell according to their own needs.

Not only mobile phone shell has become a popular fashion product, and now through the mobile phone spin-off of mobile power, Bluetooth headset, Bluetooth and so on are the necessary elements today. Every parts have their own use, and can effectively solve the daily needs of everyone. Today I will introduce for everybody including some good equipment, for example,

best

iphone 5 cases, recommend them to everyone. We want to provide some help for you.

ROCK original protective cases

First of all, I introduce this ROCK Mr. II protective case, which is designed for iPhone5. Like its name, well-known parts maker ROCK launched a mobile phone appearance are very much in line with the offbeat style rock. Graffiti series pattern is the most love. Today I give everybody the introduction of Apple iPhone 5 protective case is adorable and rabbit, that let Mr. Rock as the background, and has a variety of different colors for your choice.

This product is worth to buy.

Uphold ROCK consistently excellent quality, the ROCK Mr. Rock II and rabbit let doodle protection case in the design of each hole is also have an ulterior motive. Joining the original pattern, but add it.

Protective factors set is the biggest lies in its selection of materials and processes, the rabbit small protective case adopts

the most advanced technology in the world, enduring, fresh. It is made of super high quality polycarbonate with high transparency, flexibility, and very good, also very scratch-resistant and wear-resistant high temperature.

Lepow Mini Bluetooth speaker

I want to introduce second products for Lepow Mini Bluetooth speaker, just easy for bluetooth. Listen to the music of the people know, the sound effect is very important for the music man. Mobile phone sound really dare not flatter, Bluetooth speaker so a convenient just to meet people's needs.

Lepow joy bubble magic like Bluetooth three varieties for your choice, blue Dumbo, green Apple, orange tropical, color is very pure, can't feel a copycat. Inspiration of this product shape design style from the trunk, and have obtained patents. The fuselage diameter 58mm, height 89mm, weight 150g. The material is using rubber process, make its have comfortable interesting touch.

Lepow joy bubble magic Bluetooth speakers can not only free, and support cable transmission. Built-in 500 milliamper lithium battery, can work for 4 hours. Perfect sound experience, by the German tuner tuning master personally, let you enjoy the master of the music feast. In the hardware is optimized for the base, to make them have rebounded, so that the voice of strengthening the resonance effect. Note that the Lepow joy bubble magic as the effective transmission distance of Bluetooth speakers is 10 meters.

Besides, Lepow also launched some unique

iphone 4 cases for fans. If you have an interested on them, you can go to best case mall.

The sales of Google Nexus 7 is Less than half of Apple iPad mini

Google Nexus 7 is manufactured by ASUS OEM a super Quad flat computer. The flat has two versions, 8GB storage capacity and storage capacity of 16GB, the official price is respectively \$199 and \$249, which has NFC bus communication function brush approach, mobile phone will no longer be a dream, but the popularity needs some time.

Nexus 7 tablet is running Android Jelly Bean system, with 7 Inch Touch screen and a Tegra3 processor, while also providing NFC (near field transmission technology) and Google wallet function (possibly only for the United States market). The tablet computer screen IPS display screen, a visual angle of 178 degrees, the resolution is 1280*800, showing good results.

Nexus 7 is made by Google and ASUS, the battery support high-definition broadcast 9 hours, 300 hours of standby time, support WiFi, Bluetooth and NFC communication way, weight is 340g. In addition, the device also provides a lead of 1200000 pixel camera, battery life time is 9 hours.

A noble pure Google Nexus brand bloodline, it is as four Prince Nexus 7, which is still not out of the infant. It was expected, was pinned, promising to give the consumer and media at the top of the high-profile, has a pair of yellow in the body only owe ascended the throne of the emperors of the phase. Indeed, NVIDIA Tegra3 quad-core processor, up to 7 inch WXGA IPS wide viewing screen, a thickness of 10.45 mm and less than 340 grams of weight, so configuration let us really hard to pay attention to the shortcomings of it.

According to foreign media reports, the mobile industry analyst Benedict Evans (Benedict Evans) Tuesday, according to the latest sales data ASUS computer tablet computer, rough estimate of Google Nexus 7 tablet computer sales last year of about 4500000 to 4800000. Since Google did not posted sales of Nexus 7 data, the sales data may be the most close to the actual sales data of Nexus 7. For the lower sales, other accessories manufacturers have to launch cheap google nexus 7 cases to appeal fans to buy Google Nexus 7 tablet computer.

Evans said in the report, ASUS computer in 2012 6300000 tablet computer sales based on oral statement, as well as the CEO of the company, to approximately estimate out October has approximately 7 Nexus sales. Nexus 7 in the second quarter of 2012 to the end of the third quarter sales of about 2200000; in the fourth quarter of last year 's sales of about 2400000. The analyst also said, apple iPad Mini is listed in the first quarter, the fourth quarter of last year 's sales of about 10000000. This is expected to be based on the average selling price of iPad mini, Apple's revenue obtained

data and flat computer sales results. Apple hasn't sales data to divide according to iPad model.

Evans reported that, Apple still ruled the tablet computer market, but the company entered the small screen tablet computer market decisions, help the company to stop the pace of development of other company, consolidated the dominance of Apple in the tablet computer market.

Taking into account the apple in the first quarter of fiscal 2013 (2012 fourth quarter) sales of 22900000 iPad, five times Nexus in 2012 7 shipments are equivalent to Evans expected, this also means that Android wants to gain share fairly and intelligent mobile phone market in flat computer market, still need a long time. maybe interested on:

Samsung and Google are both of partner and competitor

From now to see the short the market share, Google seems to win Apple, and this situation has become relatively stable. But before success, Google camp has found a new "enemy" -- Samsung. Though belong to the Android, but from the recent news that. The concept of Samsung seems to have gone beyond the basic system for android. However, simply influence, we analysis carefully, Samsung for Google has what great threat.

In fact, we can not be said that Samsung too big but Google is too large to almost by default. Samsung has become the world's largest mobile phone manufacturer, the most important is, in the field of high-end mobile phone, Samsung has also surpassed Apple, on the surface of the Google, it is good news, because it means that Android gets a victory.

But compared with Google Nexus mobile phone Samsung brand and the best selling Galaxy S mobile phone software system, the basic OS system is the same, but almost all other applications of difference is very big, from mail, calendar, media player and other basic applications to voice commands, wireless file sharing, interactive services, Samsung and Google have very different. At Samsung investment and momentum, Samsung mobile phone, Google mark will become less and less.

And in the flat mobile phone and tablet computer field, more and more embedded application according to the product optimization or custom, function and interface of

Samsung's unique advantages will become more prominent, and with the increase of Samsung control force, its relationship with software partners will be more and more close, Google is facing the danger of being marginalized. Thought this, Google and Samsung still can not beat Apple, Apple iPad still is an important part of tablet computer market, we can see from the iPad accessories, for

example,
cheap
ipad mini cases.

And in such as: straight camp shop, online sales and various channels, mobile payment, smart TV media store, these Google will attempt to dabble in the field, Samsung has development more. So calm, Samsung this Google 's former comrade-in-arms, soon will become the enemy militarily.

"We have a terrific relationship with Samsung. They've been very successful with the Android platform. They benefited just like the rest of the ecosystem. We welcome all of the partners that we have on our Android platform and continue to innovate. And what our objective and our aim is to make sure that as many partners in the ecosystem continue to benefit from these open source platforms."

"I think that both Samsung and ourselves have benefited not only on the Android side but also on the Chrome side," he continued.

"The Chromebook is a runaway success; it's a runaway success for Google, it's a runaway success for Samsung. And so, what is not to like about these types of environments. I just think journalists love big headlines that sell newspapers."

Editor's comment: " no permanent friends, only the interests of forever " this point in the market is particularly prominent. I remember a few years ago Google Nexus two generation machine also by Samsung foundry, today we will get the smell of gunpowder slightly. Samsung in recent years is rising obviously, if rely on these would be able to win a Google, said so too. Fortunately, the impending launch of Xphone, Google 's next move, who can guess? Four Top Three Proofings iPhone 5 Cases With Free Shipping

For your lovely iPhone5, which is easily to fell down, the preventive measure is very important. For this noble and fragile thing, how to protect it? Maybe you think that LunaTik brand iPhone 4S case, it is like to iPhone 4S added a very strong " armor ", then you will envy iPhone 4S, but now don't have to do this, because specifically for the new Lunatik iPhone anti-throwing design 5 protective case appearance, you are still worried about iPhone5 not enough resistance to fall? In order to design brand Lunatik iPod Nano related accessories for Apple accessories this turned to iPhone 5, and released several different versions of the iPhone 5 and price protection cases.

Flak

Priced at \$34.95, the Flak design is a very simple iPhone 5 protective case, seemingly simple shell adopts a staggered design method of double, that is designed to protect your mobile phone, thereby reducing the impact of external shell because of the damping effect of the inner core.

Strong impact resistance of the shiny case is made of polycarbonate, it has a white, black, red or pink, four colors. The inner core is using TPU soft core to support, ensure that iPhone 5 will not be scratched. The Flak bending degree is relatively high, so when you put into iPhone 5 which is a piece of cake. Flak has a volume control button and sleep / through the wake / on / off, a mute button is open, easy to use.

Although the shell is made of the polycarbonate material, in the protection of mobile phone extent increased a lot of points, but for the dust, fingerprints or stain resistance is deficient, so people also need to often to wipe.

Seismik

Preparation of mixed material Seismik is made of hard plastic and rubber, whether hard plastic or rubber, break resistance properties of the two materials are very good. Seismik iPhone5 protective sleeve is unique in that part of the edge protection shell with hollow design, this design can impact buffer mobile phone to the maximum extent fell. On the base of iPhone 4, it increases the shockproof suspension system, ballastik ring and the anodic oxidation of aircraft grade aluminum alloy.

Seismik has 5 different colors: black, grey, blue solution, grey and yellow collocation, transparent gray and gray and purple red.

What is more, it offer these

cheap

iphone cases free shipping, you can buy these iphone cases in icase-zone.

Taktik Strike

Priced at \$79.95 Taktik Strike's role is to protect the iPhone 5 against the most serious impact and falling. The Taktik Strike function is equivalent to the shock absorption, TAKTIK? STRIKE 9mm patent truss and ballistic baffle, and audio and charging port sealing. See the Taktik Strike from the literal meaning is based on the design of tank, with heavy protection capability, in the harsh weather conditions, Taktik Strike could effectively protect your iPhone 5 from harm.

Taktik Strike provides a black, grey, green, white and pink color for you to choose, the user can be used to select the appropriate personal preferences for color.

Taktik Extreme

Taktik Extreme may be a member of Lunatik family, which is the most expensive iPhone 5 protective case, priced at \$124.95. In CES event TakTik on their iPhone Extreme protection shell 5 new custom, just as its name is a can withstand all physical damage extreme protection shell. Using silicon truss LunaTik unique 9mm thick, connected by steel bolts and high elasticity of the polymer coil. And it also has built-in Gorilla Glass 2 screen, to prevent the screen is broken into pieces.

The plug portion of the Taktik Extreme also has extreme protection, waterproof and dustproof, and provides weather protection, although not with waterproof this item to do publicity, but it should be enough to deal with because of the rainy day or when the water splashed on the damage caused by the mobile phone.

On the screen using Gorilla glass to provide protection is extremely rare, but this requires you to pay a higher price, so the \$125 mark is not so expensive, Taktik Extreme weighs 4.1 ounces, considerably more than the weight of 1.3 ounces of Seismik.

Have a certain understanding of three mobile phone shell for the four iPhone 5, in the rugged design, iPhone 5 as the giant panda is the perfect protection, in the fierce competition, Lunatik products occupy a certain advantage, as long as there is iPhone 5 this kind of precious and fragile product Lunatik, then the product will go farther and farther. What is more, this company also plans to launch cheap cute iPhone 5 cases to meet the demand.

Who is the Winner in Tablet Computer Market

In the month of October 2012, for the tablet computer, it is a busy month: on October 23rd, Apple released the iPad Mini; on October 26th, Microsoft released Surface RT; on October 30th, Google released Nexus 10.

Perhaps, one of the most popular products, it is the iPad Mini. Not only because of its pedigree, but also because it is Tim Cook "from" Jobs's intention to launch the product -- despite the joke said, Jobs does not allow 7 inch tablet, but did not allow 7.9 inch tablet. However, iPad Mini belongs to the small size of the product, which in the past, Apple did not set foot in the market.

Perhaps because of the small size tablet becomes more and more popular, perhaps felt from the Nexus 7, Kindle Fire HD 7 Android tablet pressure, Cook finally chose to yield, brought iPad mini to us.

Cook preferred the iPad Mini before released, seems to lead to a major reshuffle of the tablet Market in those days: iPad also occupied nearly 70 percent market share, 7 inch Android plate making up the remaining three of the vast majority of. But iPad mini, is about to be part of this is captured, firmly in hand.

However, when the iPad Mini officially listed, the reaction is as it "elder": Although the website have been spoken for, in the Apple Store, queuing to buy the person is far less than The new when the released of iPad. The emergence of such a scenario, it was expected, after all, iPad Mini in addition to the "portability", does not seem to have any special attraction: than price, higher than the Kindle Fire HD 7 for \$130; than the screen, 1024 Ã768 far inferior to 1280 Ã800, not to mention Kindle Fire HD 8.9 equipped with a 1920 x 1200 Full HD resolution. What is more, Apple also launched best cheap ipad mini cases to appeal people to buy its tablet.

But even so, also did not prevent iPad Mini as a "small size flat computer" preferred. We want to know about is, in the purchase of Android plate in the crowd, in fact, have quite one part just because I think iPad is too big too expensive. When a 7.9 - inch, the \$329 iPad in front of you, you will also consider other tablet computer?

Jobs made iPad so successful, although the price is not cheap, but if " iPad " is synonymous with " flat panel computer ", may also not have too many people oppose it, after all, when we speak of this kind of product, the first words in my mind is that it. However, once occupied 70% market share in the iPad family, also will be the day of attenuation. In order to compete for the market, the Android camp has never given up efforts, from Kindle Fire to Galaxy Note 10.1 to Nexus 10, Android Tablet Computer efforts finally paid off: according to IDC statistics, the third quarter of 2012 flat-panel computer market, apple dropped to 50.4%; at the same time, form bright contrast is the old rival Samsung, share in the second quarter from the 6.5% jumped to 18.4%. For the Android tablet, Samsung digital growth represents the benefits of differentiation. In the past, the Android family in the face of the iPad, probably can only use four words to describe: unable to confront. Too much appearance with similar function, make Android Tablet and Apple's extreme lack of competitiveness, simply rely on the "price " of this kind, change is just to fight for it, the final outcome is still " alive ".

Maybe it was inspired from the Apple model (iPad+iOS+App Store), Amazon also other vendors for the Android camp lesson: want to make money? By software. If Apple can not give up the hardware profits, then the Amazon is more than apple. The \$199 Kindle Fire, can be said to be selling at a loss, but with Amazon Empire fee service -- such as movies, such as books, such as music -- support, profit, still can be guaranteed. Unfortunately, there is power to create " ecosystem " of the company, in addition to the Amazon, seems to be only Google can do it. After the Kindle Fire listed Nexus 7 is Google to develop a standard 7 inch Android Tablet, but its revenue model is hard to say no is Amazon's influence: the same price of \$199, the configuration is better than Kindle Fire luxury several times, expect hardware profit, completely is Arabian Nights, can bring profit, is that the content of Google in Play.

Only at the end of 10 release of the Nexus 10 can be said to the continuation of the Nexus 7 features: high configuration, low price. The 2560 * 1600 resolution, 300PPI 10 inch screens allow us to stare, the architecture of Cortex-A15 Samsung Exynos 5250 chip amazes us, but the price, but only need \$399. But, compared with other Android Pad, Google " son " and one of the biggest advantage: you can first update to the latest version of the Android system. For example, in Nexus 7 with Android 4.1, such as the Nexus 10 's first run Android 4.2. Of course, Google will plan to publish

cheap

google nexus 7 cases to appeal fans to buy the Nexus 7.

We can say, Android flat difference created a precedent for Kindle Fire " price + service ", Nexus 7 will move up to a peak, then the Kindle Fire HD, Nexus 10 is to perfect the continuation of. Even if does not mention Amazon and Google a variety of value-added services, they only with high ratio of performance to price, is enough to occupy the share for entry-level flat. Moreover, individual efforts to finally get the environment change, Apple has finally shaken, 9.3% of the decline is not a negligible number.

Apple iPad is Lasting for Five Years

5 years ago, the first generation of Apple iPhone listed open intelligent mobile phone market, Apple's IOS system allows users to truly experience to touch the fun, at the same time, Apple family is also growing, MacBook air, iPod touch, iPad of every new product are amazed the world, " Apple, it is so great! " gradually Apple products seems to be " pack to force ". In a word, Apple has been imitated, has never been beyond. Old Joe although away from us, but his spirit of innovation is still the source of Apple. But, all things are in change, and so is the Apple, iPad Mini seems to be controversial.

After Apple iPad Mini released, the United States "Forbes" magazine website published a signed for Ewan Spence UNS article pointed out: " iPad Mini has Apple hit Tim ingot grams (Tim Cook) of the deep. With the launch of iPad mini, Apple may be able to support short-term interests, but the future is covered with thorns. "

Some people say that Apple in each section and will experience at least 2-3 years for products listed, iPad Mini is no exception. But now the market mature, Cook's eyes is very sharp, he know the needs of the market of such a product, so I pushed it out.

Such as iPad, iPhone and iPod are closely related, they just seem to have the same screen size different architecture products, iPad Mini seems to be in order to make up for a deficiency that is

7 inch flat areas. Why do you say that? We have a look now and several brands such as Samsung, Google and their product shipments is increasing day by day, while the iPad Mini shipping eldest child's status has not changed, bad-mouthing iPad Mini maybe don't use carefully. Because the truth is very simple, you do the industry first, then there is no friends, is surrounded by the enemy.

Any of the advantages of the Jobs era of Apple, the key is seen as a breakthrough, so there are many industry analysts said that iPad Mini market prospects, but Apple 's brand influence is sure to exist for a long time in the next period of time. Besides, we can see from the iPad accessories, the iPad accessories are more and more, such as best cheap ipad mini cases, ipad mini skins, ipad mini holder and so on.

At the end of last year the United States well-known survey firm Morgan Stanley and AlphaWise released a survey data, investigation of this one on more than 1000 iPad Mini of the American consumer. Analyst Katy Huberty said, although iPad Mini had the part of the market share of iPad, but in fact, fears the trend is "excessive".

At the beginning of this year, the United States of America Yankee Group to do a market survey, the content is based on the current consumer preference for flat panel computer selection, and asked consumers plan to buy iPad, consumers occupy nearly half, while the remaining product selection rate is less than 10%. Technology blog Wirecutter Seamus Bellamy and Brian Lam think, iPad Mini is " the best tablet computer, for almost all of us are far better than a full size iPad ".

NVIDIA CEO Jen-Hsun Huang has said the launch of applications for Android 3.0 system, Android 3.0 operating system has no small increase and optimize also appeared in the native apps, but simply " one of the most still seems to be the replication of iPad ", iPad has 1000 the primary application in the first generation of launch, and now it is up to the 100000 level, and most of them are exclusive to iPad.

From the consumer experience end also can realize the IOS system the details of the control, which is perfect, the user experience is quite ideal. After the latest release of Android system in Google, Android manufacturers must first carry on the test to ensure that the new system is suitable for your own custom interface, and then extended to its products. This leads to the system upgrade process becomes slower, many users are forced to use older systems.

This resulted in a firm is difficult to make the products achieve differentiation, in addition to the appearance and the hardware parameters. Analysts pointed out, Google has made in recent versions of Android, trying to solve the problems of fragmentation. In addition, with the development of intelligent mobile phone screen is more and more big, Android Tablet appearance also will appear more and more homogenization.

Why is Apple Fast Updating Speed of Products

From launched a mobile phone a year, now Apple launches two generation tablet a year, the speed of Apple released the product increased. Seeing from last one released iPad 4 has been half a year, a new generation of product information quickly surfaced. According to foreign media reports, sources said, Apple iPad 5 and iPad Mini 2 will be released in April this year. It is reported the new version of iPad cost is less than that of the current version, but Apple is determined to strengthen their endurance.

While it's true that experience is very good but Apple does not like to make innovation. The fifth generation of iPad is lighter and thinner than Apple released at the end of last year of the fourth generation, the fifth generation iPad will be equipped with Lightning chip A6X processor and smaller size, but the same design will be released last March with third generation iPad; as for the second generation of iPad mini, White expects its size will be like the first generation the product, but the internal component may upgrade, such as the use of a faster chip. Although the news did not mention Retina screen is the second generation iPad Mini will be equipped with high resolution, but at last month's news, Apple is going to improve the next generation of iPad Mini screen resolution.

You can tell them which is ipad5? In addition news showed that

the upgraded version 5 of the new generation of iPhone will be listed in July, appearance on the generation of products has no big difference. Over the same period, the product also has a cheap iPhone, and uses polycarbonate body material. What is more, Apple will plan to launch

cheap

ipad mini cases to appeal people to buy iPad mini.

Editor's comment: frequent replacement, hardware, small upgrade, forcing consumers to upgrade, everything is nothing new. Think of yesterday, the station has just reported that Apple's decline in the news, control the out of expected product replacement information, it seems Apple in the short term is still in place. As to when and who led the Apple out of the bottleneck of innovation, the industry is quite concerned.

Apple since 2001 has released three major product lines: iPod (2001 October), iPhone (2007 July) and iPad (2010 April). At Google, Microsoft, Intel and Dell of these 4 companies, relative performance is the best Google and Microsoft and Intel's share price is almost a pool of stagnant water.

Apple's product strategy is a classic case of market segment. More different from the traditional to join in a product function is different, Apple's strategy according to the specific user experience, user experience on product design. Do any product if you are starting from the user must be able to provide more and better products, if you start from more to squeeze profits will always follow behind the others.

Apple Will Launch iPhone 5S and Cheap iPhone

Although Apple is known for its excellence in product design, as a new iPhone in design has gradually little innovation, while a large number of new Android devices appear in the image in different poses and different expressions, Apple's iPhone will be faced with severe challenges. Even many loyal Apple fans will also

begin to hope for product design and some characters of Android in iOS.

Based on this idea, Holland designer Martin Hajek as the conceptual design of future Apple device created impressive design for iPhone 6. The overall design concept is based on the touch pad, but he cancelled the circular home key Apple traditional design, with several large touch virtual buttons to occupy the entire screen space below. Although this departure from the habit of Apple fans, but it's worth it, freeing up space makes Apple mobile phone screen bigger, the whole device modeling is also more balanced fruitily. In addition, the concept of design also uses a fully edge-to-edge display, adds a bright as the machine.

Hajek has created a lot of concept design includes iPhone mini, and unique ideas and be strict in one's demands execution for many people left a deep impression.

According to foreign media reports, KGI Securities analyst Ming-Chi Kuo is expected that in June this year, Apple will release an iPhone 5S and a cheaper version of the iPhone, they will be officially opened in July.

Ming-Chi Kuo has always been to accurately predict Apple product information known. He reiterated its earlier forecast in the report, said that Apple will launch two new iPhone models, namely the flagship iPhone 5S and made of fiber glass and plastic made from mixed cheap version. In addition to the shell material, two models will have greater differences in high-tech interior materials.

Ming-Chi Kuo expected that iPhone 5S will use the Apple of a number of new generation technologies, including more quickly A7 chip, with white or yellow LED ensures the high image quality of " intelligent flash " function, as well as from Apple 's purchase of AuthenTec, embedded in the Home key under the fingerprint security chip. Aluminum body thickness of iPhone 5S will be the same as the iPhone 5, but the battery capacity will be slightly larger, up to 1600mAh. Beside, in order to appeal people to buy iPhone 5, Apple will launch cheap

cute iPhone 5 cases and other unique iPhone accessories.

For the cheap version, Ming-Chi Kuo thinks, the mobile phone than aluminum version of iPhone slightly heavier, may be adopted by the fiber glass and plastic made from mixed shell. It will also support the LTE network.

Because the price of the product may be higher than the other end intelligent mobile phone, such as the lack of LTE support will

be difficult to obtain sufficient operator subsidies. Ming-Chi Kuo estimates, such as the choice of two versions of the contract, operators will be able to afford a cheap version of the iPhone purchase cost, which makes it especially attractive to emerging markets such as china.

Suppliers are expected to begin a large number of shipments in May 2013, two of the new iPhone would be released in June, July officially listed. Ming-Chi Kuo is expected to first half of the year, shipments of iPhone 5S and a cheaper version of iPhone this year will reach nearly 40000000 and more than 53000000. He pointed out, apple is not a repeat of last year, delay the launch of iPhone 5, let Samsung your competitors.

For a quarterly basis point, iPhone 5S in the third quarter of this year and the fourth quarter shipments will reach more than 1400 and 21500000 over the same period, cheap edition iPhone shipments will reach 19000000 or more and 34000000. Coupled with Apple's existing iPhone product line, iPhone the second half of this year the total volume is expected to reach 110000000, the first half of the year rose 83%.

Low Price is a Key to Amazon Kindle Fire

At present, the Amazon Kindle Fire and Kindle Fire HD are so popular in tablet computer market. Although that they do not have the popularity of Apple's iPad, they are a key role in a firm foothold in the tablet computer market for Android.

Undeniably, Amazon's Kindle Fire makes the online retail giant to become a major player in the tablet computer market, it help Amazon has attracted a large number of consumers, and promote the users on the Amazon content service consumption. So, what has Kindle Fire characteristic, makes it can be in the market so popular?

Low price attractive

When consumers see low prices of Kindle Fire, it is difficult to resist the temptation. At present, the first generation of Kindle

Fire costs only \$159, Kindle Fire HD has a starting price of \$199, a large screen and a 4G LTE version of the Kindle Fire HD sold for \$499.

Plenty of storage space: thanks for cloud storage

The maximum internal storage space in the Kindle Fire itself is 64GB, but it supports 5GB's free cloud storage space, and consumers can also through Amazon cheap cloud plans to gain more storage space. In other words, the storage space for Kindle Fire users is not a problem, the cloud storage can help you avoid a lot of any menace from the "rear".

Different screen sizes

And like Apple, Amazon has a profound insight into the ordinary consumer's heart, it provides a flat computer different screen sizes for different consumers, respectively 7 and 8.9 inches.

A great design

Amazon's Kindle Fire appearance may be less than the Apple iPad, but its design is very good. Kindle Fire has a beautiful black shell, baffle is very small, reserve enough space to screen. At the same time, Kindle Fire body is very thin, easy to carry.

Retina display competitors

8.9 inch screen Amazon Kindle Fire HD brings a strong visual impact, it has a pixel density of 254ppi, just to compete directly with retina display iPad. That is to say, through the Kindle Fire HD, consumers can use the low price to get such as iPad retina display that visual enjoyment.

A App Store competitors

Many mobile users think that Apple's App Store is currently doing the app store using best, but Amazon 's Appstore also can not be ignored. We can say, Amazon's Appstore has all the top-level application contains the Apple App store. At the same time, the application of the approval process for the Amazon is also very strict, ensure the security of your application. What is more, Amazon also liked to launched all kinds of Kindle Fire cases as cheap

ipad mini cases to appeal people to buy Kindle Fire.

Electronic reading powerful

All along, the Amazon in e-books and e-readers aspect performance is obvious to people, very good. Now, users can also use the Kindle Fire to watch the color version of the e-book, millions of Kindle e-books will give users the ideal reading experience.

4G LTE support

When Amazon launched the first Kindle Fire, it only supports

WiFi network. Now, Kindle Fire can connect to the Internet via 4G LTE network, which is a big selling point for those who want to connect to the Internet whenever and wherever possible.

Mobility is very large

Amazon's Kindle Fire is the epitome of mobility, it weighs just 0.9 pounds, the thickness of only 0.35 inches, users can conveniently placed into a bag, very convenient to carry. When Amazon released the second generation of Kindle Fire, the company stressed that, in the design of Kindle Fire, the mobility is an important factor to consider.

Product placement of the Amazon

Perhaps, the Amazon Kindle Fire was able to achieve the main reason for this success is also attributable to the Amazon.com.

Every day, millions of consumers will access the Amazon.com online market. And when the consumers to visit the Amazon.com home page would see Kindle Fire advertising, there must be many users because the product placement to buy Kindle Fire.

New 7 inch Kindle Fire will be Launched in 2013

According to the Taiwan science and technology website DigiTimes reports, Amazon will release New \$199 7 inch Kindle Fire in the third quarter of this year, the original Kindle Fire sold \$149. In the end of this year or early next year, Amazon will also release a 10.1 inch Kindle.

The screen and the specific configuration of the new 7 inch Kindle will be much better than the current Kindle, is expected to be equipped with a resolution of 1280 * 800 screen, the main high-end market.

If the Amazon Kindle Fire update frequency is once a year, it is expected that the new Kindle Fire in the Thanksgiving Day in the United States, Black Friday and Cyber Monday shopping season on a fire. The fourth quarter of last year Kindle Fire sales of about 4500000 to 5000000, but after the first quarter of 2012 dropped to

70 to 800000. Network game www.hlh1166.com the analysis thinks that, because Amazon is not to rely on to sell Kindle Fire hardware to make money, so the new 7 inch Kindle Fire price will be \$199, while the 10 inch Kindle price is estimated to be \$one hundred or two hundred less than Apple's iPad.

As for the rumors before the 8.9 inch Kindle Fire, will be published by Amazon to use at the end of this year to early next year. And with the production of 10.1 inch Kindle, the Kindle Fire estimates will continue to delay, there may even give up.

Last May, reported that Amazon will launch two new tablet computer, a code-named "7 inch tablet computer Coyote", and another is the development codename " 10 inch tablet computer Hollywood". According to the network game experts www.hlh1166.com statistics, in addition Amazon 6 inch backlight Kindle e-books will be released in the third quarter of this year, may also be released together with other versions. What is more , will launch more and more kindle fire accessories like iPad mini, for example cheap cute ipad mini cases.

Amazon also launched in Android mobile ad API, the project is currently in the United States of America users, marked Amazon and Google competition further expand.

So far, Amazon and Google Android applications store all its own game system based on Fire hardware, and Kindle. Now, to help them into the Amazon's advertising in the application of the Amazon is by providing mobile ad API for developers, instead of from other networks such as Google ads. Developers need to integrate their applications into the Amazon App store for Android sales to participate in this project, show the application but these ads can be Android devices in an arbitrary, but not limited to Kindle Fire equipment. These ads not only can come from Amazon or from other brands, which means that the company is building a mature mobile phone and Internet system, but at present this project only to customers in the United states.

Amazon will provide a "competitive cost per thousand " for developers, this means that Amazon will surpass Google Advertising performance. Amazon even for the developers can provide a code example, this example will first show mobile advertising Amazon, then show the Google AdMob and network.

Next, Amazon will be provided to the Android mobile phone

manufacturers and software developers to another device to make Android " to Google ". Amazon has basically is Kindle Fire it's built on a non - Google open-source Android, with further expansion of mobile advertising the new API application, the competition of Amazon and Google has entered a new stage.

The Latest iPhone Accessories With Free Shipping

Today, we continue to recommend the new accessories for iPhone5, iPhone5 owns excellent design and experience, once again become a hot phone, have been or are ready to buy iPhone5 user might as well have a look these parts, a high quality accessories, in addition, it can give more functions for the iPhone, a best accessories also can let mobile phone more features, hope that recommended accessories can provide some inspiration for you, convenient you find yourself like accessories.

First for the introduction of a best case that was launched by Miniot, the protective case is divided into two different styles, one is made of natural wood, wood texture is to protect the shell pattern; another kind is made of two different wood materials together, different wood color difference components of the protective shell pattern. Miniot wood protection cases are made by hand, protective shell details of the production is fine, each a protective shell has its own unique tree. In the mobile phone side, the volume keys have also protective shell protection. Protective shell can be separated from top to bottom, mobile phone after installation can see the gap protection shell seams very small. Protective shell can choose different wood materials, you can choose maple or rosewood, wood species, because of handmade and protective shell material and other factors, protective shell for Miniot is still relatively high, each priced at \$196, interested users can go to the official website to view more information. AI international fashion product is starting point for user needs, introduced to works of art will be applied to IT products, both art and technology products, is committed to building the palm between ambilight. Combining Deco+ and iPhone is ART'S is a science and technology age claims, retro and avant-garde, grace and wisdom

at the moment of collision. Behind the ART'S Deco+ 100 years of reincarnation, hidden luxury and classic over time. Apple iPhone and Deco+ protective case, a sense of science and technology and art take on an altogether new aspect. It is sexy like the Miami Beach Hotel Classic window lintel chic.

It is originated in 1925 from Paris. From the pursuit of emotional and cultural patterns, combined with because of the rise of industrial culture aesthetics of machinery, with geometric composition, symmetry and concise bright and contrasting colors, flexible use of repetition, symmetry, gradient aesthetic rules, the geometric modeling of poetic, full of decorative.

But if you love and lovely personality design, so called " mango protective shell " you should be loved. The protective sleeve is made of silica gel material, handle and protection are very good. Design of mango protective shell on the back is very strange, just to see if it is missing a piece, this is actually the designers deliberately, so that the design can let you play games or watching video more comfortable. At the same time the phone also can vacate hands to take notes, protective shell back just stuck in the shoulders, if no protective shell, want to grip iPhone5 is basically impossible. If you want to find other more cheap

cute iphone 5 cases, you can go to icase-zone.com.

The protective shell named PowerLoop, at present only at the design stage, has not been officially available for sale, but the design of protective sleeve is very worthy of recommendation, if the official sells, should still have a big market.

PowerLoop protective sleeve is designed specifically for the iPhone5, see the protective jacket with a strap from the map, can let the user more comfortable carrying mobile phone. The wristband another role, that is storing iPhone5 data line, in the protection shell designed the data line slot, the data line can be placed at the interface the interface part of the wrist, carrying such data line will not become a problem of user.

The protective sleeve design has 5 kind of colors, price has not been determined, interested users can go to the official website to view detailed information. Maybe you have an interested on: cheap

WebOS operating system will be abandoned by HP

HP has announced the WebOS operating system will be sold to Korea LG Electronics. LG will be fully acquired WebOS source code and proprietary assets and engineering talent, and plans to put it use in WebOS for smart TV. After heralding HP open source WebOS and finally abandon the WebOS.

Lost to fuzzy strategy, WebOS was abandoned

It can be said that, starting from the Palm was acquired by HP, WebOS was the fate of controversial. More opinion thought that HP has influence, resources, finance, marketing and channel, a large number of enterprise customers, led WebOS be able to go all the way. However, the fact was a disappointment. The development of its own problems made worse for WebOS.

There is no denying that HP's first WebOS Smartphone, the first Tablet PC TouchPad has got off to a good start, but a number of factors, such as poor market conditions, hardware defects, shortages, slow launch speed, and lack of product promotion, causes the WebOS mobile devices not on the formation of consumer appeal.

Analysis suggested that the WebOS failed to successfully enter the market for operating systems mainly because: first, the lack of developer support, secondly, there is no app store for users to download App to facilitate the third, without a strong support for mobile terminals.

However industry people that also has long-term track HP told journalists: "as in moved Internet few of full independent ecological system, this WebOS should become HP in moved Internet market differences of competition of weapon, but since last CEO Lee people living with HIV section began, HP on wanders in enterprise and consumption market strategy transformation in no findings, this inevitable to led to HP for WebOS of research and development and the promotion efforts enough, so transformation strategy fuzzy is WebOS died a of fundamental causes. â

HP WebOS for sale at the same time, in 2013 at the Mobile World Congress to be held a few days ago, HP released a tablet based on

Google's Android system Slate7.

Insiders pointed out that, looking at the current entry-level Tablet market, competition has long been a Red Sea of various manufacturers, in addition to the Amazon Kindle, such as Fire, Google Nexus, Apple also launched last year positioned low-end iPad mini Tablet PC. In such a competitive situation, HP Slate7 has the chances? Maybe HP can launch some cheap accessories like Apple, for example,

cheap

ipad mini cases.

Slate 7 sold only \$ 169, low price seems to be the biggest selling point. Indeed, compared with the Android Tablet market, it really cheaper than Amazon Kindle Fire HD and Google Nexus 7. But the low price comes at a price. The resolution Slate 7 only has 1024X600, while a device can extend the memory, but only 8GB internal storage space. 1.6Ghz processors dual-core ARM CPU, rear 3 million pixel camera, front VGA camera, battery life estimates of up to 5 hours.

In contrast, Nexus 7 and Kindle Fire HD have no rear camera, display resolution is higher than the Slate 7, reaching 1280X800, and minimum 16GB, there are 32GB versions are optional. Processor is faster than Nexus 7 Slate 7 in height, equipped with a quad-core Nvidia processor. Kindle battery life of up to 11 hours of Fire HD, Amazon can access a huge amount of content is available.

"While HP this high profile return flat computer market made has low price brand, but at this time of flat computer market and Amazon year publishing price 199 dollars price Kindle Fire Shi of competition environment has large does not same, price has is difficult to set off larger of market effect, besides similar price paragraph of flat computer intensive, HP undoubtedly entered has flat computer of ' Red Sea "' a industry analyst does not bullish HP flat computer of prospects.

Is Apple iPad still A King in 2013

Apple iPad products once occupied more than the market share of 90% in the global Tablet, but this situation is changing rapidly. International market research agency IDC research data released recently showed that 2012 global Tablet shipments in the fourth quarter (the manufacturer's shipments), an all-time high, up to 52.5 million units, an increase of 75.3%, Apple iPad 22.9 million units once again leads the series shipped, 43.6%, but its market share has fallen to its lowest level. Apple iPad market share in first three quarters of last year respectively, 59.9% and 46.4%.

From Taiwan manufacturers supply chain news, in the second half of 2012, other brands supplier of Android tablet computers have access to a great deal of shipments, 2013 will continue to eat into Apple's iPad and iPad mini shares. "No Apple camp is already very clear that Android shipments accounted for more than 40%, has reached 38.8%."DIGITIMES Research Analysis said.

Rise of non-Apple camp

DIGITIMES Research survey shows that in 2012 in the Amazon, and Barnes&Noble in the fourth quarter, Google, Microsoft with lower non-iPad Tablet shipments amounted to 22.22 million units, exceeding 21 million units of iPad for the first time, accounted for more than 51.4%.

"7-inch Amazon Kindle Fire, success is the only one by one, which a the Android tablet, I believe Apple has seen the results and then Apple launched the iPad mini version. "Edwards Media CEO Chang told reporters, the development of the Android camp is steadily accelerating.

Several major brands have made input in the Tablet market last year. In February 2012, Samsung continuous launch a 7-inch and 10-inch Galaxy Tab 2 and Galaxy Note 10.1 10.1-inch, than the iPad mini price of us \$ 329, with the dimensions of the Galaxy Tab 2 for \$ 249.99. In June, Google and ASUS launch \$ 199 Nexus 7 tablet. After 3 months, Amazon has released Kindle Fire HD series, 7-inch Kindle Fire HD lowest price 199 dollars.

"In good case of Amazon Kindle and Google Nexus7 market, China, Taiwan and Korea manufacturers continued to launch Android tablet." DIGITIMES said, as the Android Tablet hardware and software increasingly higher qualities, iPad's declining market share looks almost inevitable. However, Apple will launch some

Best

iPad Mini Cases to appeal people to buy iPad mini.

IDC data show, Samsung Tablet PC market share jump from 2011 fourth-quarter rose to 15.1% in the last quarter of 2012, shipments amounted to 7.9 million units, surged 263%; Amazon Kindle fire series of shipments of 6 million units in the fourth quarter of last year, an increase of 26.8%, market share from 3.7% to fourth-quarter cent of early last year.

"We expect the iPad 4 shipments of about 9.5 million in the fourth quarter of last year, about 4.5 million iPad mini, iPad 2 to ship 2 million increase compared to the previous quarter, and up to 6 million units, the third generation of iPad shipments still has about 1 million. "DIGITIMES analysts told reporters, non-iPad shipments compared with the previous quarter 93%, 175% annual growth, beyond the iPad for the first time.

Unique And Cheap iPhone 5 Cases With Free Shipping

Apple iPhone is a very good product, but have you ever encounter such a situation, you're on the go, suddenly you have a very important call or email you need to use the phone, but this time your disappointing iPhone happens to have no electricity, iPhone user state must have been crazy at this time.

Now an iPhone 5 case appears, which makes you calm in such situations, because the phone cover has a rocker Peter Clarke, no electricity, you will only need to shake a shake, then mobile phones will be able to continue using the. This protective shell built a 400 mAh battery, through a shake the handle, power generation, in order to charge the iPhone 5 for you.

But at the moment this is only an idea, researchers have designed a Web page, if you can raise up to \$ 350,000, then this product will be put into production. The first products will sell \$ 99. At present, the product has raised US \$ 2,510, while some far from objective, but such ideas did make our eyes light up, but did not know how long crank needs to let dead iPhone restart.

There are many kinds of mobile phone cover for iPhone 5, the

perfume case also was heard for the first time. France KFA II i-PERFUME CASE a genuine precious perfume scented borders, passing the French romantic style. At present, the dealer "love fashion digital", quotes of \$32, suitable for use in crowd favorite flavor.

The KFA II i-PERFUME is designed for the iPhone 5 cover, which is divided into purple four colors of black, red and transparent, we can according to their own preferences. Its uses material, which is a material of plant extracts, non-toxic, natural degradation. At the same time with high toughness and high transparency characteristics, it is often used to make aircraft windshields, to withstand high pressure, collision avoidance and surface transparent. Do you like these cheap cute iPhone 5 cases?

In fragrance formulations and colors are added to the raw materials, provision of the Department, not spray perfume in the late and paint stain, smell can be kept for 2 years or more, will never fade. Products is the perfect fit iPhone 5, elasticity is moderate, because material is both flexible and rigid, so on the premise of ensuring easy and close to the body, without leaving any gaps and absence, brings the perfect feel.

After Apple the new products put 30pin into Lightning interface, due to opportunity markets are huge, and a TI chip is a Lightning Rod for various vendors cannot die primary challenge schools, many third party manufacture websites to obtain patents in this area. Originated in mainland China, "iPhone5mod" is then they have cracked Lightning interface, and introduced the style of interface and wire, as well as many innovative products, like telescopic transmission lines, electricity transmission lines, all kinds of Dock products. Besides, if you buy them in iCase-Zone, you can enjoy cheap iPhone cases free shipping.

EX Hybrid Controller, this new product is a protective case, but it is not simple as Bluetooth 3 keyboards to use with the game at hand. Structure mainly composed of three parts, first to cover as the bottom of the Pan, then use two aluminum magnetic total thickness of 2 mm, keyboards and game controllers use thin aluminum material, and can be waterproof and dustproof. Part of the battery,

1 hour of charge time will be available to support continuous duration of 40 hours, retain 160 hours of standby.

This paragraph protection shell of design concept can said mature, first see in iPhone 5 needed protection of characteristics, to development protection shell for based concept, again to mix past blue bud keyboard and game hand to too heavy does not portable of shortcomings to magnetic be improved, and see in iPhone 5 originally on design thin, even again plus two tablets thickness 2 mm of aluminum tablets, also can tenure plateau first texture. The iPhone 5 exclusive protective case is priced at \$ 49.9, there were black and white two colors are available.

Unique And Bling iPhone 5 Cases From iCase-Zone

As a young group of fashion, enthusiasm for Crystal love is very high, it represents a pure and noble. Swarovski brand, as the world's leading manufacturer of Crystal, sophisticated career woman new understanding, recently launched a 2012 Swarovski iPhone5 candy series protective case.

Many iPhone users love that sense of luxury extravagance that brought to iPhone, if you think worth nearly USD iPhone 5 should be used with a more textured protective case to show their taste, don't miss this special Sellot diamond case for iPhone 5. The Sellot stones cover the whole body with Swarovski rhinestones to create, first sight of shiny satin effect really is quite great, coated store display bin for deliberately opened without the need of direct spotlight, it has a very bling effect; however, where is the difference between Swarovski Crystal and diamond? I check data on diamond to share with you.

We often say stones consist mainly of quartz glass, diamond was just habit, commonly known as, after cutting through the manual, will be able to show as if shining like a diamond. The unique Swarovski rhinestones, is that it is the best quality artificial Crystal cut, can be as high as more than 30 cutting facets, so a high refractive index, revealing a sense of deep luster, gloss better Czech drill and drill in the Middle East. And because of its high hardness, can keep the gloss for a long time, under the popular favorite of the market, and thus laid the Swarovski rhinestones distinguished positions in the market.

Thankfully, you don't have to choose between an iPhone case that's sparkly or an iPhone case that's colorful -- you can have both with these fun cases by Lucien Elements (\$158). They're covered with gorgeous Swarovski crystals and are available in every color of the rainbow, as well as black. We love that they use jewelry-grade materials, so you know these cases are just as nice as any other accessories you carry. Do you like these

iPhone

5 bling cases ?

Apple iPhone5 weight is reducing 30% than before. Sometimes hand-washing and hand sweat fear instability after iPhone? Famous CAPDASE said iPhone5 Mobile Shell is definitely your best helper. Special function is that it has a non-slip design, even if his hands wet or sweaty, no longer afraid of slipping hands out iPhone5. And provide a variety of colors to choose from.

CAPDASE is an internationally renowned brand, from Hong Kong, launched the iPhone5 cover shell using matte material, make feel even better for iPhone5. After opening the package will find protective case bag + bracket + foil + admission, only one purchase, can give the beloved iPhone5 all-round protection, price is only \$32. What is more, it will plan to publish cheap

iPhone 4 cases free shipping.

If your preferred method of sparkle is glitter, then this case will make you (and your iPhone) shine! This case is available on Etsy (\$17) and is actually a skin that sticks directly on the front, back and sides of your iPhone 4 to protect it from scratches and give it bling. Each little piece of colorful glitter completely stands out on this case, and the black background makes it unusual in the world of spa

Apple iPhone 5S Will Appear Killer Features

According to Apple's internal staff revealed that Apple press conference will be held on June 29 this year, and will launch a new model of the iPad and iPhone devices. Rumors said publishing the session sixth iPhone device will be published on "iPhone 5S" model name, there will also be "iPad 5" release. According to the Gizmorati report in addition to the introduction of new products, Apple also will be carried out to launch six years of massive celebrations.

If it is true, this celebration will be Steven Jobs as the core, thanks for he led Apple to the top, thanks for he has brought to our world so several very innovative devices. And Cook certainly one reviewed past and look to the future. By then, we might see Apple more product and development direction in the future.

Judging from the current situation, iPhone 5S should be consistent with the shape of iPhone 5, the largest change is the configuration of the upgrade, while adding new features. Earlier today, Apple Taiwan industry chains give the news that Apple will release next-generation iPhone in early July this year, the machine is now conducting small scale trial production work, of course, compared with the iPhone 5, technology will increase its shell (just change it a little bit). PS: can not afford to paint? If so, we do not need

bling

iPhone 5 cases to protect our beloved iPhone 5. Many United States media's messages also show that July of this year, Apple will release iPhone 5S, which will be powered by A7, but for millions of pixels camera, pick-up iOS and 7 systems.

Taiwan media have revealed that iPhone 5S support NFC and fingerprint recognition for the first time, and accurately predict iPhone 5, said Ming-Chi Kuo, an analyst said, Apple is also preparing a cheaper iPhone 5, its fuselage material is composed of fiberglass and plastic, there are two versions of FDD-LTE and TDD-LTE. At the same time, United States Piper Jaffray analyst Gene Munster on Tuesday predicted that Apple iPhone 5S will debut this summer, and cheaper version of the iPhone was launched in September. Incidentally, United States Patent and Trademark Office granted a new patent Apple, the technology allows the user to a screen of a mobile device has been on the premise, a multi-touch operation.

An analyst Katy Huberty at Morgan Stanley in New York said in an interview with CNBC, Apple iPhone 5S will have a "killer feature".

Katy Huberty pointed out that: "I believe that Apple shares have hit a bottom. As we heard, Apple are discussing the return of more cash, we think Apple will distribute cash in the coming weeks. But the people held Apple stock as dividend, but because of innovation. Last week, Samsung has launched Galaxy S4, which it has shown innovation competition for points, S4 killer features, I feel that this year Apple will bring surprises in this regard. iPhone 5S is equipped with a killer feature, it will further promote the consumer into the platform, increase the value of 500 million users.â If the Apple iPhone 5S comes, so we can expect that there are more and more cases for us to choose from, we can also enjoy the cheap iPhone cases free shipping.

As long as the concern, it can be found in over the course of the past year, each first-class Smartphone released into a pattern. New iPhone, Android and even the Lumia and BlackBerry, mobile phones are getting faster, and more powerful or beautiful than before, but only a few stunt features exciting few weeks, nothing to subvert innovation. Last time, really feel excited when Apple launched iPhone 4S Siri features, something that was 1.5 years ago. However, even Siri sensation, not ordinary people speaking to mobile phones all day long. Huberty's argument sounds good, but look at the reality, Apple shares are falling, competitors seize the headlines, it's easy to make people think Apple is just rhetoric that: I develop some unusual cool features. In addition,

Smartphone hardware is similar to Apple if they are really killer features, may be software-related.

Dress Up These Unique iPhone Cases For Your Beloved iPhone

United States renowned manufacturer of Apple accessories Spck recently released a iPhone 5 waterproof protector-ToughSkin Duo case. ToughSkin Duo series case a Spck case is more classic, Apple fans from the iPhone 4 began with a high popularity, the new case in appearance compared to the previous generation is not much improved, but there have been subtle changes in the details.

This protective case is using silica gel and a hard shell composed of plastic materials, which is more suitable for long-term users who work in outdoor use, while water resistance than professional protective sleeve tough over there, the average rainfall was hard to invade.

The Speck CandyShell Card case is a great way to carry up to three credit cards or ID cards with the iPhone. Available in a number of colors, this case adds some bulk, but users love it.

United States famous SwitchEasy Apple accessories manufacturers recently released an iPhone named Monsters 5 cover, the same polycarbonate material, after the SwitchEasy designer's hand, it can full of distinctive styles.

As its name Monsters in General, the iPhone 5 protection of the shape of the shell has slightest smell of the devil, see this image reminds one cannot help editing the Goo in world of Warcraft, terror with a touch of lovely.

Judging from the previous release of information, the filming of the iPhone has long been the most popular, is also saw this opportunity, many parts have been offering protective shell with a lens. Now have a look this type of iPhone 5 shell that also has a lot of character. Of course, it also published some unique

iPhone 4 casesto appeal more fans to buy.

This protective case is made by Turtleback PentaEye, which is the most distinctive feature with 5 shots (one for the iPhone 5 your own), and this can according to user's need to choose. Four

scenes are provided by PentaEye is a 0.33x fish-eye lens, wide angle lens 0.7 times times, 1.5 times telephoto lenses and shooting macro lens focal lengths of about 2 cm, its Hong Kong price is \$190. For more details, you can check this website: [iCase-Zone](#).

The Incipio Feather Ultralight offers protection in over two-dozen colors without adding bulk to your iPhone. The matte finish helps avoid fingerprints and offers a soft touch. The case is thin enough that it is compatible with some iPhone docks on the market.

Incipio will bring a new product--Atlas iPhone 5 protective case for water resistance. Atlas has a very modern appearance, and extremely strong protection, colorful Plextonium framework, can absorb shocks in the inner layer of tempered glass screen and built-in. Layers of protection, waterproofing, dust, dirt, drop, impact damage, iPhone 5 be most comprehensive defense.

Best Cheap iPhone Cases From iCase-Zone

Like most new iPhone 4 buyers, I knew that I had to purchase a bumper to insure no antenna issues, and I wanted something to protect my fancy new purchase, especially since I have a tendency to drop small expensive items. So, I told the sales guy to ring up a black bumper and I would be on my way. Imagine my surprise when I got home and realized I paid \$29 for a shockingly small amount of rubber stretched around my iPhone!

At least I was happy with my new phone, and the bumper did perform as advertised, it kept my phone safe, provided a grippy handle, and masked any antenna problems. However, after six months it finally started to fall apart.

Being cheap, I just found it very difficult to accept that I would need to budget \$30 every six months to the gods at Cupertino.

So, while placing an order for live crickets or some such on Amazon, I decided to buy a couple different cases and try and figure out which I liked better. And, as a bonus I would have the opportunity to share my findings with the two other folks who read this blog.

iPhone 4 is an expensive gadget and it is a must for any one to protect it from accidents. There are very cheap to most expensive iPhone 4 cases in the market and the choice of selecting a case or cover is one of the toughest decisions. We are here to give you some suggestions to choose the best iPhone 4 cases or covers. Also, iPhone 4S cases can be used for iPhone 4 as both the phones have same exterior. What is more, you can also enjoy the cheap iPhone cases free shipping.

A few notes. First, the majority of iPad cases shown here are compatible with the iPad 2 (the iPad 2 is a millimeter or so thinner). Second, while Apple's Smart Cover also works just fine with the new iPad, I've avoided including any back-only covers that are designed to be paired with the Smart Cover. Several companies, including Speck, Belkin, Incipio, STM, and Joy Factory, make nice, slim back-only covers, and they're all fairly similar. My suggestion: get one that has a piece of metal on the back so the Smart Cover magnetically adheres to it when you have it folded back from the screen. Or if you have not so much money, you can buy cheap iPad 3 cases.

Of course, this roundup only represents a fraction of the cases available for the new iPad. If you think we missed a good cover -- or just have a favorite among the ones shown -- feel free to post a comment. I'll continue to update this list until, well, the iPad 4 comes out.

Best Cute Couple iPhone Cases With Free Shipping

Besides its brilliant qualities like display, looks, performance and much more the prime reason for buying an Apple iPhone 4 is its uniqueness. Although, the device is expensive but still this awesome Apple iPhone 4 has found its way into hands of enormous people thus making standing out a little more difficult. In order to bring back this peculiarity designer all around the world have come up with different iPhone 4/4s cases that add a sophisticated

layer to your iPhone and eventually you stand out among other mundane Apple iPhone 4 holders.

Every women/girl, including me, loves different looks for their iPhone. Specific case can tell a lot about you - what do you like, what's your interest, what are you into to? My currently case for my iPhone 4s is Kate Spade's black and purple dotted case - it can tell that I'm girly, into fashion, I like minimalistic designs and I want to have my iPhone protected so I bought quality case, not some cheap one.

Here are some iPhone cases that I've found on iCase-Zone.com. I chose to feature them here in this lens because they just screamed "Look at me! How cute/interesting/pretty/awesome am i?" Honestly, I don't know which one is my favorite! They're all so nice and I hope that you like them too! :) If you buy these iPhone cases, you can enjoy the cheap iPhone 4 cases free shipping.

When you are part of a couple, you want to tell the world and show everyone that you are a romantic pair, that your life is now intertwined with the other. These cute couple iPhone cases can help you show that you are one part of two. Give them to your other half as a cute romantic gift. It's really unique and you will have fun carrying your iPhone either together or apart.

These couple iPhone cases are designed to show that they are part of two. The iPhone cases come in a pair too, just like you and your partner. They are romantic, cute, funny and all your friends will love them, so will you.

This romantic lovers iPhone case is colorful and cute. It is compatible with Apple att verizon iPhone 4 (16GB or 32GB) models At&T Verizon Sprint iPhone 4S.

This romantic lover cute

iPhone cases come in a set of two for boy and girl. The boy is wearing a bow tie and smeared lipstick smudges on his face while the girl is wearing a ribbon in her hair. Both have "I Love You" on their 'clothing' and both spot nerdy glasses.

This cute iPhone couple pair is a lovely gift for a couple or if you are the couple, you can get it for yourself just for fun.

Most Striking iPhone Accessories Roundup

Apple iPhone redefines the use way of mobile phone, and further opened a new era for mobile phone accessories. Now Apple iPhone accessories can be described as assortment, the different accessories from small headset plug to guitar software, guitar modelling peripherals, in short, it is a phrase, only you could not think that, they could not have achieved, as the saying goes, what big birds are dark. There are a lot of good accessories, but there also have most striking accessories. Recent foreign media technology Web site lists the 9 species of most striking, let us to see together.

Tactile keys Plus Stickers is a peripheral accessory, the role is to let players games used on the iPhone, which make iPhone more texture in the game room, Tactile Plus Stickers have two sets of keys and function keys that is consisting of the eight independent. Game installed easily, no game can be removed. Although Tactile Plus Stickers have some utility, but it makes iPhone to become very ugly.

Mobigrip is a mobile phone fall prevention tool, users just need to get it glued to the back of the phone, then trap with function of elastic rope in hand, this avoids the phone fell to the ground, but it's really not pretty at all. When you get a petty iPhone, you must want to use a

bling

iPhone 5 cases to decorate and protect your beloved iPhone 5.

Apple iPhone Holster model is very similar to movies, TV series Holster strap installed in the police, it keeps the phone in the iPhone Holster pockets and card Pack, but if you're wearing this for \$ 40 accessory appeared in the Bank, supposed to panic? And the model in the picture looks really ugly.

So-called TV Hat are a user to watch video content from their iPod Touch, iPhone to enlarge 2.5 times, but it really look striking, really wonderful work is also very scary. TV Hat sells for \$ 30, and is still on sale in the market.

Phone Fingers is to avoid scratching the screen of the iPhone and the iPod Touch, and iPad or designed as a greasy hand prints on the contamination, although this device that allows users to avoid the intrusion of oil pollution, but let the user turns out to be a very strange person.

Breathalyzer is an iPhone version of alcohol detectors, users can be connected to the iPhone, and measuring the concentration of alcohol in the body by way of blowing. But this stuff is really accurate work, which is not known, it is just a toy warning.

Actually until now there are still many people does not using virtual keyboard, the large factors is size problem that led to experience not plus, but a name for ION of company launched of this paragraph to iPhone using of iType is to iPhone provides of full keyboard peripherals, while convenient has those not habits using virtual keyboard of friends, but is put a Taiwan Compact of smart phone into has a Super King of equipment. And it may not be easy. It is reported that this product sells for about \$ 100.

Quiver Body Sling allows iPhone users to be bound in the black diagonal shoulder and oblique shoulder section to control over the external button of the iPhone. The product is priced at \$ 90, but it's too striking.

Cell-Mate Headset is your iPhone can be fixed to the bracket near the ears, but the people who buy it, why don't you buy a Bluetooth headset?

If you want to learn more information about the best iPhone accessories, you can go to iCase-Zone, there are many kinds of best iPhone accessories for you to choose from, what is more, all of them are free shipping, come on and enjoy the cheap iPhone 5 free shipping.

Cheap iPhone 5 Cases With Free Shipping in 2013

Apple iPhone 5 as the most popular cell phone for women, there are many accessories for iPhone, today I took the chance, and want to introduce several good cell phone accessories for woman. You don't have to worry about what a gift. Please follow the below and see the several products that I recommend for everyone.

ROCK Apple iPhone 5 current bi-color CONTRAST COLOR soft and hard protection case

First, I recommended for everyone, which is the ROCK trend of two-color soft and hard protection sleeve CONTRAST COLOR for the Apple iPhone 5. As the iPhone 5 listed were selling like hotcakes, there also emerged a lot classic phone jacket. Just recently, the internationally renowned ROCK accessory manufacturers have released a great visual effect trends bi-color CONTRAST COLOR soft and hard cover. So-called CONTRAST COLOR is two contrasting colors to match each other, a strong visual contrast make people's eyes light up.

Favorite friends can think about sending the product to her. Apple iPhone 5 this ROCK trend color CONTRAST COLOR soft and hard protector skin color scheme using the now very popular hit-color design, bright colour makes it look more vibrant. Not only that, this case also uses both within and outside the two-box design, be soft inside despite one's hard shell. Internal soft box can play a very good role in earthquake resistance fall of external hard box and can scratch resistant wear. Do you like these

cute

iPhone 5 cases?

ROCK the Apple iPhone 5 current two-color soft and hard protection sleeve CONTRAST COLOR can have such a good performance, thanks mostly to its selection of material decisions. Frame made of high quality polycarbonate, drawing lines on the surface. Box used the imported high quality TPU, high flexibility, which is very wear-resistant, scratch resistant. In addition, this case also with its unique design, perfect protection of iPhone 5 built-in speakers sound. If you buy these iPhone cases in iCase-Zone.com, you can enjoy the

cheap

iPhone 5 free shipping.

IWALK Extreme 7,500 mobile power

Editor will give you a second product for iWALK Extreme 7,500 mobile power. Now stop worrying about performance issues with it using a mobile phone, but more of a concern to its electrical power. Or leisure, we will enable Internet access on your cell phone, listening to music, novel or play games, power is so little is consumed. Equipped with a mobile power supply is a good choice.

On the quality of the product, there are strict requirements as to quality friends deserve consideration.

IWALK Extreme 7,500 mobile power is divided into white, rose red, purple, yellow, black, we can according to the five colors to choose their own favorite style. Extreme series inherited the

iWALK's crisp design looks very small and easy to carry. Design of the square of the angular, clip the corner arc, with the Metallic surface SF Coating spraying process, making iWALK Extreme 7,500 mobile power feels very good.

MH405 in-line control headphones

Small series, I want introduce a third product for MH405 in-ear headphones. Prevalent in pop music today, not equipped with a good headset, have lost Dick style? You want to listen to the song at work, work when you want to listen to the song, before going to bed to listen to. Love to listen to songs friends if you wear the headphones of this beautiful, fashion and beauty shows.

How to Make Your Beloved iPhone Twinkle

After Apple's brand new iPhone 5 on sale, it become the most popular mobile phone product, but burst out of an aluminum shell off paint problems have also plagued many users who have purchased or want to purchase. But the current strength of the accessories manufacturer has unveiled with the iPhone 5 perfect protective shell products, leading accessories brands, for example, has published a variety of iPhone 5 case products in the near future, we have come together to know about it today.

Many friends are no doubt aware that Swarovski rhinestone Crystal diamonds in the best one of the cut face for more than 30 faceted, high hardness and luster lasting. Freeson also do these elegant accessories Accessories iPhone 5 cases, the introduction of flower and fruit of Mr J-logo two case series.

From the appearance you can directly see Freeson, this case is designed for the iPhone 5 that is designed for women. Cover used white color design, back with a perfect blend of blue, purple petals, mix with Swarovski rhinestones are interspersed, with strong artistic beauty and the fresh, elegant temperament. I believe that many girl must like these bling iPhone 5 cases.

All material is made from quality PC plastic material composition, with high flexibility, scratch wear-resistant characteristics. I put it in my pants pocket are out walking, get out and cover the outside still bright as new, believe routine use is not easy in the shell result in scratches or damage.

To set it on the iPhone 5 model, a combination is very good, did not loose any feeling or matching does not apply easily cause shell deformation, mix so appropriate in the current release of iPhone 5 in case the admission and cover edges sanded smooth, very comfortable grip. Back Swarovski rhinestones are slightly raised, of course, there is no obvious impact on the holding hand.

Side transparent design, this case clearly shows iPhone 5 that has a strong metallic texture, interface or key openings are very

suitable, with Shell to charge or plug in headphones are not affected. Camera and Flash on the back of the mouth the same accurate, as with other openings, edges it is very smooth and natural. Reflect the standard of good manufacturing processes. Beside, this company also launched a version for iPhone 4/4s, if you buy these cases in iCase-Zone.com, you can enjoy cheap iPhone 4 cases free shipping.

We often say that the stones consist mainly of crystal glass, studded with just everybody used to commonly known as, by means of artificial cut, will be able to show shines like a diamond. Swarovski rhinestone unique, is that it is the highest quality artificial Crystal to cut, can be as high as more than 30 facets, so a high refractive index, revealing a sense of deep gloss, gloss better than Czech drill and drill in the Middle East. And because of its high hardness, can keep the gloss for a long time, under the popular favorite of the market, and thus laid the Swarovski rhinestone premium position in the market. If you like this Swarovski rhinestone case, come on and get it Now!!

Miracle iPhone 5 Cases For iPhone Fans

We are well known that iPhone accessories are hot sellers, from small drawings of the headphone jack, to audio combination for iPhone. Of course apart from protector of the most commonly purchased, it is an important case. Now shell pursuit is not just security, but rather an expression of personal taste or style, distinguished by color, styling is a strong expression of self-recognition. Describes six makes your iPhone an absolute different protective case!

Cute sheep cases: Sheepy

Different from other common cases, "Sheepy" brings real to the touch, except for winter heating, sheep also have clean cloth on the front of the screen features shooting function does not affect the camera on the back, is functional and cute design combined with a protective case.

Diving man: TAT77

Like diving or surfing? This "TAT77" know that in order to

protect the iPhone can cover important for outdoor sports, the "TAT77" transparent pressure-resistant shell, except for appearance does not change the iPhone design, can take photographs, newsletters, and other actions in the sea. Their ability to dive 30 meters, I'm sure that waterproof is totally fine.

Taylor Mug iPhone 5

Appearance of this mug made from silicone back cover, even beyond then. From one perspective, will make people mistake it for a cup! (But don't really help pour coffee) "Taylor Mug iPhone 5" this Cup also spawned a variety of placement and use, the only problem is not the price but at the expense of the camera. Do you like these unique and cute

iPhone 5 cases?

DENNIS ICELICK

In order for us to maintain a childhood of happy times, specifically in three stages (top, bottom, grip) of plastic objects, integrated body protection for iPhone brings an interesting appearance. "EMIE ICELICK"-d ice cream ice cream concept, using a variety of colors, include Strawberry (Pink), Blueberry (blue), Orange (yellow), lime (green), chocolate (Brown), the bottom of the handgrip the some 90 degree turn, makes iPhone upright or horizontally. Besides, if you buy these DENNIS ICELICK case, you can enjoy cheap

iPhone cases free shipping.

NUKLES iPhone4/4S Case

The nukles Tiger case is a protective shell for iPhone4/4S, claims to be the first aluminum alloy material, produced this has four finger holes appear iPhone shell that can be used to knock people! Some people think he is a fashion, some people feel kind of weird, designed to prevent hand falls off the "Chrome Nukle iPhone Case" maybe another feature really is self defense?!

Armor case

For millions of per second, often need to access many dangerous nation or people, "bullet-proof" that feature absolute is a prerequisite when purchasing any goods. This must watch. 50-caliber sniper who Japan manufacturers launched fits the demand of products.

Apple iPhone 5S will be launched in the Summer

On April 5, according to eWeek Web site published an analysis article said, Apple is planning to launch iPhone 5S in the summer. But Apple has not confirmed this information. Apple iPhone 5S anticipated that there is only slightly improved for iPhone 5, including better processors, improved cameras and the same design.

About iPhone 5S is the most important consideration that when it will be launched. The phone that gives some of the most impressive is comparable with Android phone currently.

This iPhone 5S will compete with new BlackBerry 10 phones, and other devices running Windows Phone operating system. In other words, the iPhone 5S will face fierce competition. Apple must be taken into account at the appropriate time to launch the phone in order to achieve maximum success.

Therefore, summer 2013 is Apple's best release window, it has the best opportunity to maximize sales. Here is 10 reasons are that may be launched this summer for iPhone 5S.

1. Samsung Galaxy S4 is a huge threat

Samsung Galaxy S4 will be the greatest threat to any iPhone that Apple has launched so far. The 5 inch screen of Samsung Galaxy S4 is much larger than the screen of the iPhone 5, it has a better processor and greatly improved the camera. Apple needs to launched the iPhone that better than iPhone 5 as soon as possible, otherwise, compared with the Galaxy S4 phones, iPhone 5 will become obsolete.

2. the timing seemed to be right

The launch time of iPhone 5S seemed to be right in this summer. Apple has just launched iPhone 5 a few months ago. However, it is a major upgrade. iPhone 5S were purchased for last year iPhone 5 people with a slightly upgraded products. If Apple is targeting sales of late, as launch iPhone 5S is meaningful. Apple iPhone 5S, most people are looking forward to the new iPhone cases, just like the cute

iPhone 5 Cases. Of course, most accessories suppliers are ready for this, for example, iCase-Zone, if you buy iPhone cases here, you can enjoy the

cheap

iPhone cases 5 free shipping.

3. launch the iPhone 5S after iOS 7

Apple's iOS 7 may be the best reason to launch iPhone 5S this summer. In recent years, Apple has launched the latest operating system during the summer. Therefore, the launch of Smartphone is very significant at this time. However, the rumored iOS 7 was postponed, therefore iPhone 5S may have launched without iOS 7.

4. iPhone 5S does not have to be an important upgrade

Apple iPhone 5S does not have to be an important upgrade product. This phone is only reinforced internal components. However, those who want to greatly improve the performance of people will be disappointed. iPhone 5S not need to fully upgrade the product in advance stages of production, thereby making it easier for Apple launched the iPhone5S in this summer.

5. operators need it

Carriers rush to own store this summer introduced the latest iPhone. From the perspective of history, is a technology company's most difficult time in the summer. New iPhone sales will help the United States four major carriers to increase revenue. If the operator taking his own way, iPhone 5S will certainly show up in June or July.

6. the introduction of new products has been successful in summer

The new product for Apple has been successful in the summer. Apple launched the iPhone in the summer that caused a stir, in subsequent years, Apple has to do. Apple launches new iPhone every time, which has been a success. Apple launched the iPhone is successful wherever. However, users expect Apple to launch iPhone in summer. Apple is wise to maintain this consistency.

7. to save time at the end of the launch products to international markets

Summer in the United States and other key markets is one of the benefits of iPhone 5S give Apple ample time after summer into other key markets such products. Apple was forced to hastily to the global market last year launched the iPhone 5. The launch of iPhone 5S will limit these problems sooner.

8. the performance gap

Currently Apple performance gap with its competitor in the Smartphone market is huge. Samsung, HTC and other companies are

providing similar to the iPhone 5 or more advanced products. Users will see this soon and questioned on why they chose Apple products. Eliminating the performance gap is very important for Apple now.

9. taking into account the margins

Apple offers a slightly upgraded product benefits can help Apple to maximize profitability. Save internal component costs, Apple iPhone 5S is significantly lower than the cost of redesigning the product. This means that Apple will have higher margins and improved earnings. Who is unwilling to the profits made as soon as possible.

10. the rumors that Apple will do this

Apple's troubles were rumors around Apple everywhere. When reputable sources published these rumors, users believe the projected deadline. Rumor factories widely forecast for Apple iPhone 5S will be introduced this summer. Therefore, Apple must do so, otherwise Apple will have some type of unpredictable delays.

Apple iPad 5 Will Be Launched in the End of This Month

On April 5, in accordance with established practice, Apple released a new iPad when in March of each year, as it was published like the iPad 2 and iPad 3. But in the last year, Apple release iPad 4, it had slightly deviated from the traditional release cycle than before. Thus, recent widely circulated reports that iPad 5 was released at the end of this month, and this will be a full iPad design innovations.

Believe a new 9.7-inch iPad design will be a big hit. Just like the launch of iPad 2, at that time, it was a complete redesign, unlike other versions of the updated appearance and no big changes, just on the screen resolution, camera pixels for upgrading.

Recent messages from the multiple source said Apple plans to hold another press conference in late April, which it will redesign the iPad 5 that will be unveiled. It now appears that this message there is a certain amount of credibility. Previous rumors indicated that its recently released iPad 5 design elements similar to the Mini, if this is true, we're probably first learned that some leaked parts of a message prior to the Conference. You know, Apple's supply chain is a "leaky", "bucket", and Grapevine will be released, well ahead. However, for the upcoming iPad internal

hardware specifications 5, there will be no confirmation from Apple. However, for iPad fans, they are prepared for buying the new iPad 5 and also looking forward to the iPad case just like the cheap iPad mini cases.

As long as the third party retailers started to cut for an Apple product, this often means that new products will soon be released. Of course, this also has other reasons, but it is, like Apple's friends never bored watching this type of message. Today, the good news is that we may have will soon usher in the fifth-generation iPad.

According to Reuters, Wednesday, Wal-Mart, best buy and MacMall is the third generation of iPad and iPad mini prices, the sharpest of up to 30%. After the cut, best buy price of 16GB third generation iPad Retina screen is lower than the entry level iPad mini. Why does retailer prices all of them a sudden? Perhaps they already know about new product releases, now is the best chance to clear inventory.

Recently there is a rumoured to be held in April, Apple will launch, but, you know, until the end of last year, the fourth-generation iPad release, so if Apple launched the iPad this month 5, it means that the iPad could be updated every six months. iPad iPad mini 5 might be adopted design elements, lighter and thinner, more narrow borders. For further information about how the results, can only be patient.

Make an Inventory of Hot Tablet PCs in 2013

Many analysts predicted that in the next few years, the share of the Tablet market will continue to grow, and ultimately beyond the PC. At present, the market contains various forms of Tablet PCs,

they can meet the different needs of different users.

In 2013, the tablet computer market will continue to be dominated by Apple, Samsung and Google, Amazon products in the market to make a difference. Let us look at the popular tablet computer market in 2013, they will be welcomed by users around the world:

Apple iPad

Apple's iPad defines modern tablet market, widely welcomed by the users since its debut. Of course, Apple's marketing and brand value for iPad sales goes to the promotion. Although there are about whether the iPad is the best Tablet PC market, which is also controversial, but it is undeniable that it is indeed an outstanding player in the Tablet market.

Apple iPad Mini

Apple iPad Mini tablet computer called the Apple classics, it configuration 7.9 inch display, is much smaller than the full sized iPad, but it can provide users with the same iOS user experience. Meanwhile, compared to full size iPad, iPad Mini Tablet PC a thinner, mobility is better. Besides, we can not help to say its rich accessories, for example, cheap iPad mini cases are best choice for iPad mini users.

Samsung Galaxy Note 10.1

Currently, Samsung Galaxy Note 10.1 have been welcomed by consumers and business users, it configures a 10.1-inch touch screen and a powerful processor, and also have stylus support, providing storage space for up to 64GB, support micro SD card slot.

Microsoft Surface Pro

Since its release, Microsoft's Surface Pro Tablet PC received a lot of attention, but the outside comments mixed in it. In any case, Surface Pro as a whole is a good product, it configures a high-resolution display, run a full Windows 8 operating system, is a very compact design of tablet computers. Meanwhile, the Surface Pro also can be converted into portable form, performance can be comparable with the notebook, also it is very convenient to carry.

ASUS Transformer Pad Infinity

ASUS Transformer Pad Infinity is a very suitable for business users of Tablet PC, it can easily convert between Tablet PCs and laptops. ASUS Transformer Pad Infinity configured resolution of 1920 x 1200, 10.1-inch super IPS Panel, 1.6GHz Tegra3 quad-core processors, optional internal storage space with 32GB/64GB, running

Android 4 operating system.

Google Nexus 7

Google Nexus 7 is the best 7-inch tablet computer in the current market, it runs Google's latest mobile operating system, "jelly bean", and has a very nice design. Meanwhile, the Nexus 7 sells for \$ 199, it is a great tablet. Off course, these cheap google nexus 7 cases are not overlooked.

Amazon Kindle Fire HD 8.9

Amazon Kindle Fire HD 8.9 screen size is a range of 7-inch and 10-inch Tablet PC, it has a good design, and includes a solid Android software support. Meanwhile, it built in the Appstore to rival and Google Play shop, to provide rich content to users choice.

Bano Nook HD+

Bano Nook HD+ Tablet price ratio is very high, which configure the full HD resolution of 1920 x 1280 screen, 16GB version sells for \$ 269. At the same time, Nook HD+ also has Palestinian promise powerful e-book library support, making it the electronic reader is the best alternative. For the average consumer, Barnes Nook HD+ is a good choice.

Google Nexus 10

Google Nexus 10 is a strongest competitor for Apple iPad, it has a good design, and is derived from a well-known, reputable of Google's hands. Google Nexus 10 most noteworthy is that it has a pixel density of 300PPI high resolution 10.1-inch display, display more than the Apple iPad. Meanwhile, the effect is very fast and smooth running of the Nexus 10, is one of the best Android tablet in the current market.

Samsung Galaxy Tab 2

For the budget conscious user, Samsung Galaxy Tab 2 is well worth considering, it uses a resolution of 1024 x 600 7-inch display, configure the 8GB storage space, but supports micro-SD card slots for users to extend the storage space.

Apple iPhone 5S will use fingerprint verification feature

Routine June as Apple releases new mobile time approached, recently more and more rumors about iPhone 5S, a well-known Web site exposed the photos of iPhone 5S, said it will use the ARC screen, canceled the classic "Home" button.

Web site exposure photographs can be seen from abroad, the back of new iPhone 5S are curved, as Apple has applied for a patent of curved screen, it is not difficult for the Apple. Addition from the pictures you can see, new iPhone 5S cancellation screen below the "Home" button, headphone jack still remains in the bottom of the phone. In addition, the site also said, the new iPhone 5S cell phone camera will see a hefty increase of 10 million pixels.

About the new iPhone 5S after news that Apple will release two phones this year, slightly below the one configured to facilitate "powder" choice, a phone screen will be increased to 5 inches. For launch time, outside said that it will be locked on June 29. In 2007, on June 29, Apple released the first generation iPhone, select iPhone at this time published 5S, is in honour of the then launches jobs presided over the whole field. However, rumor has it that Apple will release iPhone 5S on June 20, cheaper version of the phone will be released in August. As usual, Apple still not above guessing came forward to confirm.

On the fingerprint reader will appear on the iPhone there have been rumours of iPhone 5S, now report that the technology will also be applied to Apple iWatch.

After the talks with related components supplier, analyst at New York Ticonderoga securities in Brian White thinks that iPhone 5S and the so-called iWatch will use fingerprint authentication technology. By the way, Apple new iPhone is coming, more and more people are looking for the new iPhone, at the same time, they also are looking for the new iPhone accessories, just like cute

iPhone 5 cases. Do you have an interested on these new iPhone accessories, iPhone cases? If you have, you can buy the all kinds of iPhone cases in iCase-Zone, besides, you can also enjoy the cheap

iPhone cases free shipping.

White said that Apple called the fingerprint verification

feature will be necessary for security purposes. He believes that this technology will create opportunities for Apple's other business areas, especially its products with credit card payments. White noted that fingerprint reader will be the main selling points of the iPhone 5S, this product will be released in July. In addition, White also said the fingerprint reader is not only used in iPhone 5S, Apple iWatch released this year also will be equipped with this technology. In contact with Apple components suppliers in Asia, he discovered that there are signs that the supply chain might be to speed up the production of iWatch. In another report on Wednesday, White said that iWatch could also play an important role in the Apple TV product. Wright may also be named iRing products are described, this product will be worn on the user's fingers to help control the Apple TV. Industry speculation about the Apple product will configure the fingerprint verification technology comes from Apple last year invested \$ 356 million takeover of AuthenTec fingerprint security company. The company made a "Smart Sensor", and the product to the fingerprint reader on the touch-screen display

Rumors That Apple iPhone 5S will have Five Colors

The black and white color combination of Apple iPhone is classic enough in the past, but if the next-generation iPhone will provide more color variety in the future, will it become more attractive to people? The answer seems to be yes, because Apple seems to have prepared to do. According to Japan website Mac Otakara reported that Apple iPhone 5S will be added on the basis of the previous black and white bi-color three color versions, so that future iPhone5S will provide up to five colors optional.

According to Japan website Macotakara disclosed news that they learnt from a very reliable source, in addition to the original black and white two colors, Apple iPhone 5S will add three color variants. However, it is not clear which colors that for Apple. However, if the rumors are to be true, then it means that the next generation iPhone will have five frame colors for the user to select.

Not only that, but for a cheaper version of the iPhone, Macotakara also stated that the machine will also have five different color style choices. But it is not yet clear whether the

five color styles, including black and white two colors of the original. But if Apple does follow as rumors in the past practices of the fifth-generation iPod touch, then it means that the cheap availability of body color in iPhone style will be as many as seven. If a cheaper version of the iPhone is coming, what are you do? Are you want to buy a cheap iPhone cases to protect your iPhone, just like these cheap bling iPhone 5 cases. If you want to buy all kinds of iPhone cases, I recommend you go to iCase-Zone, there are many kinds of iPhone cases for you to choose from, what is more, you can also enjoy cheap iPhone 5 cases free shipping.

It is worth to notice that these claims have not been substantiated, but Apple may be use Anodic oxidation technology aluminum shell coloring for iPhone 5S after the rumor has been circulating for some time. And recently the Apple Web site has updated with two Job Links, expressly refer to the engineer company is looking for Anodic oxidation, which in the community and in the industry's view, in fact, increased color styles for next generation Apple's products.

In addition, rumors also claimed that iPhone 5S is the first multi color models of iPhone. And as early as last December, when the famous Investment Bank Jefferies analyst Peter Misek has submitted reports, the next-generation iPhone may be not only the classic shades of black and white in appearance optional, 6-8 body color version will follow suit iPod Touch.

About the release time of Apple iPhone 5S, Macotakara News said it would be released in July of this year and go on sale in July or August. It is learned that Apple iPhone5S will be equipped with more powerful processors and higher-quality camera, this is consistent with previously reported appear to be closer.

Previously, Mac Otakara has accurately forecast the seventh-generation iPod nano and fifth generation iPod touch, also before the iPhone 5S did not debut, released the number of parts.

Manufacturers such as Samsung, LG and HTC has a variety of screen sizes are available a series of smartphones, and Apple never felt the need to move into the big screen market. By today's standards, even has a 4 inch screen of iPhone 5 is also considered too small. According to the latest report, Apple may finally ready to provide with a variety of screen size iPhone 5S, designed to resist competition from the other smartphone manufacturers.

White also expects Apple to publish low-price iPhone this year, but he expects the price of this product will not be less than 300 dollars, "those hoping for \$ 150 or \$ 200 to buy an iPhone mobile phone who will be disappointed." "We have discussed the low price the average price for iPhone may be between 250 to 300 dollars; however, it appears, its average selling price is more likely to be between \$ 300 and \$ 350. " White wrote. "We believe that this price point will make investors feel at ease, its to know that while Apple wants to expand market share in developing markets such as China, but also issues such as appropriate management of margins and brand. â

White reiterated that he has designated Apple's stock rating to "buy" (Buy), the 12-month target price of us \$ 888, 1 time equivalent to the current share price has more than doubled. The latest rumors, Apple iPhone 5S will have a faster processor and better camera and upgraded version of the iOS operating system, was released on June 20.

Apple iPad is Less Popular than iPhone

Market research firm Canalys (Analysys International, China's Internet market superior information products, services and solutions provider) issued 13 reports mobile market in the first quarter, reported that 13 first quarter App Store, Google Play, Windows Phone application Store, BlackBerry World four mobile markets total downloads reached 13.4 billion times, generated total revenues of approximately \$ 2.2 billion. Compared to last quarter of 12, about 11% of downloads, revenue grew by about 8%.

Data from the report view, Google to 6.8 billion applications downloads to become the world's largest mobile platform. 51% per cent of total market, but Apple still uses 40% market share, revenues of us \$ 1.6 billion into a market winner. Meanwhile, Microsoft and BlackBerry's market share is still in single digits, Google and Apple have long distance.

Canalys Tim?Shepherd, a senior analyst at the media predicted in an interview, Google and Apple in the mobile market share gap will further widen, but Google's ability to achieve profitability and Apple is still far, only close to 450 million at present, 20% per

cent of total market revenue. While Microsoft and BlackBerry only have a single digit revenue share.

Two giants, Microsoft and BlackBerry are not completely no chance of chasing, Tim?Shepherd believes that current Microsoft and BlackBerry development strategy should focus on the development of new user groups, and new groups of users were concentrated mainly in South Africa, and Brazil and Indonesia and other developing markets.

As Apple 5S listed time is approaching, a lot of people are speculating about whether this new paragraph came and ready go to buy a new iPhone cases, just like

cute

iPhone 5 cases to protect their iPhone, however, according to Piper Jaffray analyst Gene Munster today issued a United States youth survey recent results, data show interviewed 5,200 young, still a large number of iPhone and iPad users. According to the report, 48% of the United States youth express themselves using the iPhone, a figure than investigation by 8% 6 months ago, so it seems market requirements is to ensure that Apple products are important evidence in the normal output.

Despite competition from Samsung, but many young people still choose Apple iPhone instead of Samsung products. Survey shows 62% teenagers want their next phone is still iPhone, it shows the loyalty of young iPhone users is very high. For Android,23% teenagers want their next phone Android, 1% increase over the results of last fall. Munster believes that Samsung Galaxy Android devices of S3 and S4 is the most popular, but does not affect Apple shares.

What is more, 51% youth has a tablet computer, 7% investigations rose by more than 6 months ago. In this 51% users have Tablet PCs, 5% of teenagers are using a full size iPad, 63% who is using the iPad mini. This means that in the survey, 35 young people are using a Tablet PC. 68% young people plans to buy iPad within 6 months, believes the next iPad mini will continue to erode the iPad market share. However, the iPad accessories also rise, for example best

cheap iPad mini cases.

Samsung mentioned in advertising, iPhone has been unable to attract young consumers, but also interpretation in advertising, young people line up in front of Apple Store just for parents and

so on. However, according to the latest findings of the iPhone and iPad are still favored by young consumers like.

Seven Reasons For You to Choose Apple iPhone

According to foreign media reports, the spring of 2013, the high end smart phone market has assumed a dual male war, the competition of Samsung Galaxy S4 and Apple iPhone5. Both phones are currently comparing the best of smartphones, the people has a phone that may be available to the user will not be disappointed. However, these two phones have each their own advantages, iPhone5 strengths in application software, software updates, and customer support:

1. Better software options

If you own an iPhone, that will be able to ensure that the first one has the best new mobile applications. Developers tend to give priority to the iPhone development applications. Even Google is no exception, Google introduced its Android platform before the new application software, usually have launched iPhone version of the application software.

Although Android like Apple iPhone, offers many of the same top level application software, it has some exclusive best iPhone applications.

2. Better video and music options

With iTunes, Apple iPhone has best for rental and purchase music, movies and television programs. The Play Store and Google's Android Samsung "Samsung Hub," Although there are a lot of content choices, but it is not on the level with iTunes.

3. Better design and quality

If you are a user who designs and quality of cleanliness, then iPhone is your best choice. Samsung Galaxy S4 smart phones plastic casing may meet some people's taste, but the vast majority of people still prefer Apple's glass and metal housing.

4. Free technical support from Apple

If you are Apple's iPhone users, you can get free technical support from the Apple store employees. If your phone has problems within the scope of the warranty, they will give you a new phone. In addition, if you are a novice, Apple staff will teach you how to

use the iPhone handset. If you are a Galaxy4 user, cell phone broke, who would you call? The Samsung or Operators? Samsung also does not have the same as Apple's customer service support system.

5. Rich Accessories

In the Accessories market, there are many kinds of iPhone accessories for you to choose from, such as

cheap

iPhone cases, iPhone skins, iPhone dock and so on, what is more, almost iPhone users can enjoy

cheap

iPhone 4 cases free shipping, however, compared with Apple iPhone, there is very few accessories for Samsung, so many people prefer to use Apple iPhone.

6. Ongoing and timely software updates

Samsung phones software update has one of the biggest problems, which is slow update, after Google released version, usually has to wait for several months, Samsung and its operators will only push software updates to their users. Also, do not forget that Samsung did have to give up their old phone software updates history!

For iPhone users, you don't need to worry about software updates issues. Apple can ensure that their software update pushes the time is the same for all users, whether you use that iPhone is the telecom operator's network or the phone.

7. Can be done with one hand phone

Although many people prefer in large screen Samsung, Apple a little 4-inch screen is more easy one-handed operation.

The Last Cute iPhone 5 Cases For Girls

Apple iPhone 5 has published for a long time, this week I will introduce several iPhone5 accessories for you. If you want to buy some iPhone 5 accessories, you can have a look. Currently on the iPhone5 accessories, iPhone 5 cases are most choices. due to iPhone5 used has new 8 needle interface, so the before Dock interface accessories are not compatible with the new iPhone 5, you need to pay attention to it.

iPhone5 parts: the Griffin case

Today we introduce the first iPhone5 accessories from Griffin that is introduced an a leather protection case, this case was exquisite workmanship, on the protective case with a front cover, so that you can to protect the screen of your phone, also set the card slot on the front cover, which also cover more functions.

The Griffin cortex inside the protective shell is plastic pan, the outer cortex is leather, the protective shell provides three card slots on the front cover, with side hole card slot can also be placed in the change object. This protective shell part combined with wallet and card packs, saving users space.

This case is reserved specifically for iPhone5, so the camera opening on the back, wearing a protective case will not affect the normal operation of your phone. This case sells for \$ 29.99, interested users can go to the official Web site for more information.

iPhone cell phone case has a card slot, we also give you a lot, this cover looks more than ever. The protective case is launched by Marware and overall design from the shape simple, paired with iPhone5 minimalist design is quite.

The protective case is made from a polycarbonate material, the internal TPU coating can effectively protect iPhone5 body security.

In the set has a card slot on the back, up to two cards, card slot internal damping coating-coated, cards and will not easily slide out. For easy card removal, reserved check card place in the hull, slipping, you can remove the card with your fingers.

Also it has a small, narrow the gap on the back at the same time, the main purpose is to make the card in the card slot can quickly turn into bracket, whether horizontal or vertical you can give the phone a perspective provides a good viewing experience for the user.

At the shell side volume keys are protected, though you also take protective case, you can easily control the volume keys. For security purposes, you can think of bus pass is not the most important card in the card slot, so that even if the phone is lost or result in additional losses. This case sells for \$ 34.99, interested can go to the official Web site for more information, or you can go to

iCase-Zone.com.

SwitchEasy launches iPhone protective case, which has been of great personality, this case also has a great personality, this is no exception, the new SwitchEasy iPhone5 cover a very exaggerated, mouth, face, as decorative motifs, combined with iPhone5 camera,

looks pretty interesting.

This protective shell called Master, is also more in line with its design. Shell is made of silicone, texture is very good, but patterns are out of cell phone back, can also provide better grip for the user. This protective shell protection is comprehensive, the volume keys and Home keys are protected.

Master cover has a variety of brilliant colors, each color has a different look, you can meet the needs of more users. This case sells for \$ 19.99, interested users can go to the official Web site for more information. Do you like these

cheap

cute iPhone 5 cases ?

Here, this case is primarily cute style, this case was launched by Sanrio, pictures feature leading Hello Kitty, topic is Street Fighter x (street fighter x), two seemingly very different types of styles combined effect is still very good.

There are two patterns can be selected for you, namely Chunli styling as well as Ryu style, polycarbonate shell materials in terms of feel, and protection has been performing relatively well. After you put a protective shell, handset keys will not be affected, and there is no obvious thickening of the fuselage. This case can cover use as a couple, and are very matching, street fighter official authorised for cover, priced at \$ 34.99, like Hello Kitty or street fighter fans should not miss.

Comment On Ridiculous Digital Products Accessories

When we see a variety of digital products in the hands, says they're powerful, convenient, and brings to life the possibilities when did gaze falls on those sets for digital products only on the parts of it? Here follows the authors to enjoy their charm.

Screensavers that can be rolled up

Seen the appearance of the iPad users are aware, iPad has two volume increase or decrease button on the right side of the fuselage and a pull to open the key, and the left side of the fuselage was bare, you might think, appearance-oriented idea why Apple iPad to make this kind of asymmetric design?

One reason is that it leaves to the left of the Smart screen

protector Cover magnetic adsorption, as its point of attachment. This multifunctional protective sleeve by small magnets to the right with the whole side for the micro-fiber cloth, lateral PU or leather subject composition, small magnets can be attracted to the iPad left side of the fuselage, thematic part that protects the screen. It wake-iPad and put it into sleep mode function, curl can also serve as cover for iPad. How these iPad case are a bit expensive, if you want to buy some cheap iPad cases, for example, cheap cute iPad mini cases, you can go to iCase-Zone.com.

Unique Wireless charging pillow

After Lumia series Nokia Windows phone 8 operating system was introduced last year, combined with a series of wireless charging accessories were launched, which includes unique pillows DT-901 Wireless charging. It is based on international standards Qi, you can recharge the mobile phone and other compatible devices and avoid the trouble of finishing the charger cable, simply put your phone on the charger Board, phone will start charging, stable and efficient.

Cute mini ball speaker

A lovely pendant, a sponge ball, bright colors, mini ball turned out to be the speakers? In fact, mini ball speaker 3.5mm audio output interface is shaped like a ball player, applied to the 3.5 interface MP3, mobile phone, iPad, computers and other digital products, built-in lithium-ion battery, repeating the charge, fully charged, can work after 5 hours, with separate switch. With it, we don't have to worry about in the streets because the earphones and hear the sounds of the outside world, you don't have to worry about our laptop sound is not large enough.

Pierced 3D mobile phone shell

Now cell phones cover product after another, but no matter how many games, 3D mobile phone cover is not to let a little surprise for you? Fashion brand CUCA Smartphone protection class double independent grid design, provide similar 3D box-spring shock-absorbing effect, can effectively shockproof and cushion the impact and hollowing process brought about by the unique sense, reflect the complexity and depth of a space. This 3D cover, there is a mezzanine, can be inserted to save bus pass, people from work to do is take the phone to pass all the way without drawing out your pocket cards, making daily life more convenient, due to the

two-storey open design of the grid, heat is also useful to the mobile phone. Besides, accessories business launched the most expensive bling iPhone cases for iPhone 5 users, which sold \$2890. However, for the common iPhone users, it is so expensive price, they would like to buy cheap bling iPhone 5 cases.

Apple iPhone 5S and iPad mini 2 will be published in Summer

A KGI Taiwana securities analyst Guo Mingchi research reports released on Thursday, faced a number of challenges, Apple's next generation iPhone and iPad mini released later than expected.

Guo Mingchi forecasted in January of this year Apple release the road map in 2013, is expected in the third quarter the company will upgrade iPhone, iPad, iPod and Mac notebook. He also reported last month, the new iPhone may be released in June or July, which is compatible with networks of China Mobile's TD-SCDMA version will be listed in late September.

However, Guo Mingchi in Thursday's report predicted that the plan could be delayed. However, because Apple has not yet announced a formal release plan, so-called "postponed" is only relative to market expectations, and are not necessarily Apple's plans.

Guo Mingchi said in the report: "we had expected, the new iPhone will be shipped in July, TD will be shipped in September, while iPad mini2 list in August. Market of cheap iPhone and iPad iPhone 5S, mini2 General delivery is expected for June, July and September, respectively. But from a public information and our understanding of technology trend, we now believe that release dates of these three products will lag far behind earlier expectations and the market generally expected.

â

Guo Mingchi does not provide clear expectations, but under June/August, September/October, October/November release of three possible periods, gave Apple shipments may be subject to impact.

Specific to the challenges faced by production, Guo Mingchi

gives the following information:

--iPhone fingerprint sensor for 5S. The company is developing the right color paint, avoid interference to the sensor. In addition, iOS 7 software also needs to be adjusted in the consolidation.

Color coatingsâthe lower-priced iPhone. There is talk that Apple cheap iPhone plastic case, there are several color options, Apples are making efforts to reduce the thickness of the shell, and could trigger the corresponding production problems. If the shell of new iPhone is best, so many people do not use cute cases for iPhone 5.

The retina display is for iPad mini. Guo Ming pool is expected, the second generation iPad mini will have retina display, design and manufacturing challenges associated with them may cause Apple release date postponed.

Because the release time than expected may be delayed, Guo Mingchi now expects Apple's iPhone and iPad shipments can only be achieved in the third quarter year on year percentage growth in the low single digits, compared with 30% per cent of current market forecasts. Apple new iPad mini is coming, so cheap iPad mini cases also are coming.

Before Guo Mingchi, analyst at Morgan Stanley, Katy Huberty report also predicted that Apple's Worldwide Developers Conference in June (hereinafter "WWDC") presented iOS 7, then released in September the new iPhone. Huberty expects Apple show at WWDC mobile wallet "killer application", and the new iPhone and iPad will have to wait a few more months to launch.

Ten of The Most Promising Thing For Apple iPhone 5S

According to eWeek Web site published an analysis article, Apple's iPhone 5S has been rumored in recent months. Rumored that iPhone 5S and iPhone 5 have the same basic design, but the iPhone 5 will offer better graphics and processor performance, thus providing improved overall user experience. All aspects from the

measure, iPhone 5S should be better than iPhone 5, enabling competition between Apple and other smartphone manufacturers to be in a better position.

Taking into account this situation, many people around the world do not know whether to buy iPhone 5 now, still waiting to buy iPhone 5S. For these people, the iPhone 5 is good enough. iPhone 5S is best, however, provides all of the functionality that may not be the average consumer needs. Therefore, these people have no choice but to buy iPhone 5S, choosing instead to buy iPhone 5 now.

However, these people probably should not have made such a choice. Now, wait for iPhone 5S and see if Apple can offer what may be a wise choice. Then, potential buyers will have access to all the information they need in order to decide which model, which is the best buy's iPhone. Following smart phone buyers should wait for iPhone 5S 10 reasons.

1. it is now April

Waiting for the iPhone advantage of 5S is this phone listed time is not far away. According to some reports, iPhone 5S will be listing in June or July, was also reported to be available in August. However, in either case, iPhone 5S are not listed for more than 4 months, why rush it?

2. will have a better processors

While this is rumor, but iPhone 5S will no doubt use better processors. Why would anyone say for sure? The reason is simple: Apple launches iPhone every year when there will be more powerful and better processor. This one was no exception.

3. Apple for iPhone 5S is expected to add more memory

Apple is expected to configure more memory for iPhone 5S. Memory of the competitive is a big reason in smartphone market. Cell phone has more memory, open applications more quickly, you can effectively run multiple programs at once. More memory is good.

4. more powerful graphics capabilities

Graphics performance is Apple and its developers worry about another important issue. Better graphics performance improvements are allowed to run the game. Gaming is the most popular mobile application type. This is the Apple iPhone 5S provides better graphic performance reasons. Apple may attract more developers to develop more advanced applications and games for iPhone. This will enable the iPhone to do even better.

5. take a thinner design

Apple launched a new smartphone of the year how much publicity it making the phone thin all the time. Thinner designs are always welcome. However, according to the latest rumors, next-generation

iPhone will be launched so far Apple's thinnest mobile phone. This is for people who run around the field very well. What is more, if the iPhone 5S changes, so the Apple iPhone 5S accessories also changes, you can look forward to the new iPhone 5S accessories, not just

cheap

bling iPhone 5 cases, more and more iPhone 5S accessories will come out, for example, when Apple iPhone 4 was listed, there were many iPhone 4 in the market, such as unique iPhone 4 cases, cute

iPhone 4 cases, cool iPhone 4 Cases and so on.

6. see what happens T-Mobile

Apple recently signed a Bill to put the iPhone introduced to United States mobile operators t-mobile deals. Now, the mobile service provider is providing a variety of new projects and new ideas to change the way people access to wireless services as well as the amount of service fees paid. If the test goes well, this would make the current Verizon, Sprint, or t user seriously considering switching to t-mobile. So why not wait and see how things developed?

7. iPhone 5 is outdated

IPhone 5 is out. This phone Samsung Galaxy S4 phone configuration is missing the kind of large 5 inch screen, and many of the latest high-end 4-core processor with Android handsets, such as LG mobile phones. When iPhone 5S will be configured with the competition when competitive processor, and features more effectively, why buy now iPhone 5?

8. iPhone Mini will make you satisfied?

Recently there were many rumoured that iPhone Mini sometime in the year listed. This phone is better, cheaper and smaller than iPhone 5 and iPhone 5S. The best thing is that it will run the same operating system and using more thinner and lighter than the iPhone 5 designs. Before you buy something, you should wait to hear news on iPhone Mini, which is the best.

9. Android devices will change your mind

If Samsung Galaxy S4 is insufficient to change your ideas about iPhone 5S, perhaps wait a much longer time to see other Android devices will change your mind. Between now and this summer, a number of Android phones will be listed, some of which are mobile phone better than iPhone 5S. Before you purchase your Apple's next generation iPhone, you may want to consider.

10. iPhone 5 will cut prices

Apple launches new phones when they cut a year ago launched a

mobile phone price. Therefore, the current starting price US \$ 199 iPhone 5 may have lowered the price to \$ 99. iPhone 4S can be provided free of charge. Therefore, the concern people may have to wait some time for iPhone to get these phones more cheaply.

If you want to learn more information about Apple iPhone 5S, you can go to this website iCase-Zone.com.

Two Reasons Created Delayed Publishing Time For Apple iPhone 5S

Apple iPhone 5S has been a hot spot of concern, around the next-generation iPhone release date, there are many rumours.

Recently, Jefferies from prominent institutions of market analyst Peter Misek submitted after the field visits to Apple suppliers in Asia reported that Apple iPhone 5S may delay the release time, and cheaper version of the iPhone launch is postponed to the fourth quarter of this year, as for the rumored iPhone 6 there is almost zero chance of this year.

Apple iPhone 5S will delay publishing

Past have been rumored Apple next generation iPhone will come out in July this year, but from all indications, is likely to delay publication. According to Peter Misek said he learned after the field trip to the Apple suppliers in Asia, iPhone 5S are likely to delay publication, and cheaper version of the iPhone will also be delayed until the fourth quarter release, iPhone may listing 6 you will need to wait until 2014.

Although Peter Misek does not mention specific reasons for Apple iPhone 5S delay publication, but because the analysts also review Apple's supply chain in Asia came after speculation, so we believe they still are in the supply chain of causes for Apple iPhone 5S delay shipment. It is learned that the Apple iPhone 5S before mass production trial delayed at least a month or more, and rumored iOS 7 system will delay release, caused by so many factors had to delay publishing the next generation of Apple iPhone.

Or for production reasons

Essentially, the Apple iPhone 5S may delay there have been recently published. Like Apple's new machine Ming-Chi, analyst at

KGI securities forecast more accurate by Kuo (Guo Mingchi) revealed, due to the iPhone5S color shell surface treatment process could be improved, so as not to cause to interfere with fingerprint sensor, and OS 7 systems integration takes time reasons, publishing this next-generation iPhone may be introduced. From this, we can see, many Apple iPhone accessories suppliers also delay their production schedule, so we can not see the new iPhone accessories right now, but we can also use the update iPhone 5 accessories, for example

cute

iPhone 5 cases, if you have no iPhone 5, and just own iPhone 4 or 4S, you can also find these update

cute

iPhone 4 cases.

According to Morgan Stanley analyst Katy Huberty said information in the report, Apple's next-generation iOS 7 system will be unveiled at the Apple WWDC in June 2013 Conference, while the next-generation iPhone will be released in September this year. Therefore, integrated a number of rumours, perhaps Apple iPhone 5S some time much later than we thought.

Has begun testing

Despite the outgoing frequently delayed publication of rumours, but Apple's new iPhone and iOS 7 system test is carried out in an orderly. As developers use trace log to install iOS 7 unknown iPhone devices accessing the system, because the IP address for this device from Apple's headquarters in Cupertino, California. So many people inferred that Apple is testing the new iPhone and iOS 7 system.

Current iPhone 5S might have featured, synthesis is the A7 has a faster processor, smart Flash (Smart Flash) technology, as well as fingerprint scanning secure chip technology, and so on.

Google Developers Conference will be held in May 2013

On April 19, according to foreign media reports, Google I/O Developers Conference will be held this year from May 15 to May 17 Mo Sikang Exhibition Center in San Francisco. I/O was never there

are amazing products, the following are of foreign science and technology website TechRadar counting Google I/O 2013 aspects:

1. cross-platform communications services Babel

Babel screenshot has been exposed, a memorandum of the company Internet also has its presentation. Now is the time to hear it directly from Google's mouth features and availability of sources.

Although many media reports and sources have revealed a lot about the integration of Google's services for various communications, people eagerly at the I/O Conference are described in detail.

People want to know about Babel on Android, iOS, and Chrome compatibility, "one-off" features such as notifications alert, and when will join Talk, Hangouts, and Google Voice integration of Messages came in. Expect Google will soon be open to talk about this service.

2. the new Nexus 7 Tablet PC

In July, Google Nexus 7 7 inch tablet computer launched less than a year. Given the consumer electronics upgrades every year, launched at the Google I/O this year if the new generation of Nexus 7, not surprising.

iPad mini has 7 inch tablet computer is increasingly popular, so has now launched the new Nexus 7 appropriate to. The price of Nexus 7 is \$ 199, which is much more expensive Apple iPad that has formed a certain challenge. Besides, we can also looking forward to the new and

cheap

Google Nexus 7 cases.

Rumors, Google will continue to collaborate with Asus next generation version of the Nexus 7. Expect the PPI (pixels per inch) will be promoted, which is rumored to be on the display quality comparable to iPad with retina screen mini 2.

Taiwan reported the electronic times, Nexus 7 will support the new 3G network, sell for between \$ 149 and \$ 199. Last year, the first generation of Nexus 7 was released at the Google I/O Conference, therefore the second generation are also likely introduced in this year's I/O.

3. Google goggles

Google has confirmed that Google's glasses to be sent in batches to "Explorer Edition" subscribers hands. The company yesterday announced its arguments and provisions prohibiting advertising of developer. But did not disclose the product also has a lot of fresh stuff.

For example, at present it has only a few third-party application development, and Developer Conference will be detailed and the perfect occasion to seek additional developer support.

It is also hoped that Google is more designed for myopia, Warby Parker even brings the fashionable eyewear manufacturers design products. Rumored Warby Parker is building some fairly current Google spectacle frames.

The much-anticipated also from #ifihadglass (I have Google goggles) event winner shows, believe it will beyond perfect vision, Google will show you real life, solve problems and living facilities of exciting features.

4.older Nexus 7 price will cute down

If the new generation of Nexus 7 Tablet announced, and the \$ 199 price is lower than or close to the previous generation, that the previous generation will certainly reduce the price. This would make the Nexus 7 one of the cheapest Tablet PC on the market. Apple iPad 5 and iPad mini is also coming, so the iPad 4 and iPad mini will be cut down in price, the iPad accessories also will be cut down, for example,

cheap

iPad mini cases. If you want to learn more information about iPad accessories and Nexus 7 accessories, you can go to this website

iCase-Zone.com.

Google will set the price at \$ 149, \$ 129 or 99 dollars? Price was so low? Google's strategy is to make the hardware prices close to the people, and earned income, and Amazon sells Kindle tablet is similar.

Although Google Play Store app store content optimized for Tablet than Apple's App Store application store, but there is nothing better than free Android tablet had fallen into the hands of consumers more attractive to developers.

5. Nexus 10 support cellular networks

As with the Nexus 7, Nexus 10 is also a very good, the price is close to the people of tablet computers. Its size is 10 inches, similar to that with the iPad. But with the iPad and the Nexus 7 different is that Nexus 10 does not support cellular networks.

Relies on Wi-Fi networks will have limit on Nexus 10 of use, Google fans have been looking forward to AT&T and it will be the mobile operator t-mobile support.

Industry estimates, it may occur shortly after, likely will be able to see at the Google I/O Conference. Nexus 10 is launched only a few months ' time, also does not need to be redesigned.

6. Google voice Assistant Now

Google Now seems a little gas, and I/O is the best stage to demonstrate all the new features.

In March, the sources said, Google will Now visit iOS platform.

At that time, one is rumored to show for both iPhone and iPad, Google Now in YouTube version of the video appeared shortly after fading fast, people can not help but wonder whether your iOS version in development.

The personal assistant services may not login to Apple's platform, as rumored Google haven't submitted it to the App Store. According to people in the industry, if the rumours are true, then Google should soon be submitted. I/O may be the perfect time to publish the service.

In addition to the new system, people still want to see Google new features on the I/O, as well as messages about its small components.

7. home automation system Android@Home

This is a Home service.

As early as in 2011 on I/O, Google Android@Home Home Automation system will debut. Since then, never what was it news, and now is 2013, another I/O.

8. the Nexus 5 or to support LTE 4

Google and LG to create Nexus 4 has just launched a few months, the industry has reported a lot of rumors about its next-generation products. That is because the Nexus 4 is not compatible with most operators LTE services.

Although it is equipped with a Google latest "jelly bean" Android 4.2 system, it still lags in data speed of market-leading products. Such as Galaxy S3, HTC Smartphones such as the iPhone 5 and one competition, Nexus must support the next generation LTE network.

9. the streaming media player Nexus Q

This black plastic spherical device, Google certainly is both loved and hated.

Nexus Q used to be called is an excellent home entertainment solution, but now in Google on the Play which had already been marginalized. It does appear on top of Google Play, but is no longer sold.

10. Android 5.0

Android was last given a new version number already for a long time. Google has been to improve the Android 4, version 5 appeared on the I/O is unlikely. Now version named "jelly bean" continuation next-generation versions of Google named in the sweet name of tradition, called "Key lime pie".

Of course most of the Android phones haven't even used version 4.2, so even if the version 5 publishing to the I/O, it most likely

will be a long time before the formal launch, might just be to lift people's appetite, to put pressure on Apple and the upcoming iOS 7.

Apple iPhone 5S will have better performance than iPhone 5S

According to an analysis of article said, Apple's iPhone 5S has been rumored in recent months. Entertainment whao88.NET by Marriott is rumored, iPhone 5 and iPhone 5S has the same basic design, but the iPhone 5 will offer better graphics and processor performance, thus providing improved overall user experience. All aspects from the measure of iPhone 5S, should better than iPhone 5, enabling competition between Apple and other smartphone manufacturers are in a better position.

Taking into account this situation, think Marriott entertainment www.whao88.NET for many people around the world do not know whether to buy iPhone 5 now, still waiting to buy iPhone 5S. For these people, the iPhone 5 is good enough. iPhone 5S better, however, provides all of the functionality may not be the average consumer needs. Therefore, these people have no choice to buy iPhone 5S, choosing instead to buy iPhone 5 now.

However, these people may not have such a choice that should be made. Now, wait for iPhone 5S and see if Apple to offer what may be a wise choice. Then, potential buyers will have access to all the information they need in order to decide which model is best to buy iPhone. What is the reason to keep iPhone 5S worth looking forward to.

Waiting the iPhone 5S is now mid-April has the advantage of this phone listed time is not far away. According to some reports, iPhone 5S will be listing in June or July, was also reported to be available in August. However, in either case, iPhone 5S are not listed for more than 4 months, why rush it? What is more, many people have bought iPhone 5 and can not wait to buy some cute

iPhone 5 cases to protect their beloved iPhone. Since Apple launched iPhone, there are many iPhone accessories in the market, for example, cute

iPhone 4 cases.

While this is rumor, but iPhone 5S better processors will no doubt be better. Why would anyone say for sure? The reason is simple: Apple launches iPhone every year when there will be more powerful and better processor. This one was no exception. Apple is expected to configure more memory for iPhone 5S. Memory of the competitive smartphone market is a big reason. Cell phone has more memory, open applications more quickly, you can effectively run multiple programs at once. More memory is very good.

Graphics performance is Apple and its developers worry about another important issue. Better graphics performance improvements are allowed to run the game. Gaming is the most popular mobile application type. This is the Apple iPhone provides better graphic performance reasons in the 5S. Apple may attract more developers to develop more advanced applications and games for iPhone. This will enable the iPhone to do even better.

Apple launched a new smartphone of the year how much publicity it making the phone thin all the time. Marriott thinner entertainment www.66wanhao.com designs are always welcome. However, according to the latest rumors, next-generation iPhone will be launched so far Apple's thinnest mobile phone. This is for people who run around the field very well.

Apple iPad 5 Will Be Launched in August

Whether Amazon's Kindle Fire, Samsung Galaxy Tab, and Microsoft's Surface is difficult to shake the iPad lead place. Maybe at the time of publishing iPad Steve jobs, and did not think the device is still in the area of flat panel has the advantage of the dominant level. Despite the increasing demands of consumers and the competition is more intense, but the iPad is a Tablet PC since the 010 is available benchmark.

Look at Chitika advertising statistics institutions published the latest data. Statistics for March 2013, according to Chitika, iPad occupy the United States and Canada in 81.9% Tablet traffic,

which was increased for the first time since the December 2012.

Last month, Chitika has pointed out in the report of the investigation, Apple iPad tablet in North America's share of traffic had fallen to 80.5%.

Chitika, iPad growth in usage may be because sales of refurbished machines. Because from the beginning in March 2013, United States Apple online stores in the area began to renovate the iPad product lines, once the drop in prices, it will mean attracting more potential customers.

Taiwan Guo Mingchi, an analyst at KGI securities said in a research note recently, Apple, from August to September, mass produced 5th generation iPad, thinner than the current 15%, light 25%.

Guo Mingchi says in his report: "in our view, this tablet of 7.5 to 8 mm thickness, thinner than the 4th generation iPad 15%. The new iPad is likely to be about 500 grams in weight, lighter than the 4th generation iPad 25%. In addition, the new iPad A7X processors will be used, the camera parameters similar to the 4th generation of iPad, pre-HD camera, post 5 million pixel camera. Coat, color and design will be similar to the iPad mini narrow border. For the new iPad 5, more and more people are also looking for its new cases for iPad 5, just like the

cheap

cute iPad mini cases. What kinds of iPad cases that you like best? I like many girls must like cute iPad cases, for them, their iPhone also used

cute

iPhone cases.

Guo Mingchi also expects the new iPad will have the same GF2 iPad mini touch technology, which reduces the thickness of the screen. More energy-efficient screens and chip technology will lower the overall power consumption of the iPad, thus it's helpful for reducing cell size. "Therefore we believe that the 5th generation of the iPad battery capacity will be smaller than the 4th generation of 25% per cent, from 8,500 to 9,000 Ma. Cell thickness declined to 15% per cent, to between 7.5 and 8 mm, and the battery will change from three-prong to two-core." Guo Mingchi said.

Foreign market research company to analysts: "the iPad part 5 a more slim design is achieved by reducing the sizes of LED-backlit, implementation include increasing the energy efficiency of the display and use of more energy-efficient LED." He also mentioned

that Apple would use a different method to reduce body thickness.

"We believe that another significant changes may be to the touchscreen sensor based on thin-film conversion.

â

Apple wonder we haven't improved next-generation iPad display technology, so will the IGZO Panel is even more unclear. But iPad 5 if it can retain a Retina screen, based on reduced product thickness and weight, power consumption, so we were very pleased.

The technical progress meets resistance from production cost

For Apple that has led the premium Terminal currents, scheduled to be released in early summer of 2013 of iPhone 5S estimates will pay more attention to costs.

A talk about iPhone, gives the impression that at cost first use of most advanced technologies, including light aluminum alloy casing and internal built-in protection tempered glass touch panel, LCD touch panel In-cell, its high price. But its charm is irresistible, expensive iPhone continues to be consumers of all ages.

In order to control costs, Apple processor IC, power IC, audio codecs and other major components are used in the same enterprise products. All of Cameras are 10 million pixels, it controls 8 million pixels. The iPhone 5S, when a part is selected by Apple, estimated to be more cost conscious.

(1) Japan business meets resistance

Japan enterprise quality, it is the first in the world. Strict quality management, guarantee the time of delivery, is a model of manufacturing industry in the world, at every point. And on the other hand, in keeping with the Japan competing enterprises, overseas companies are seeking to lower the price. Toshiba-made Flash exist vertical stack stacked IC technology was recognized first in the world, but from now on, cheap Korea product may replace them. Battery--one of the main suppliers of Sony may also be encountering sniper. For the development of communication front end components Murata seisakusho, now fragmented configuration of

the company's parts may fall victim to reduce costs, reduced its number of components used in the face of threats. Besides, if the cost of new iPhone is lower, so the iPhone accessories also will be cut down, see from the market now, there are still many iPhone accessories suppliers offer all kinds of iPhone accessories for iPhone users, such as

cute

iPhone 5 cases, cool iPhone holders, stylish iPhone sleeves,

cute

iPhone 4 cases and so on.

(2) the unique advantages

Even focusing on cost, the parts that can't leave it, there are many parts. In-cell method to manufacture built-in touch panel display companies in the world can be counted on, vast majority of which are Japan enterprises. Japan monitor companies and sharp in the next estimate will be an advantage in the competition.

Moreover, dismantling part of the LCD Panel can be found below the LCD glass for a few pieces of thin films, may reduce the number of these films. Location map software and linkage of geomagnetic sensor field, Asahi Kasei to share first place in the world of absolute advantage, this estimate does not change.

(3) on new features

After the much-anticipated, but ultimately did not get the iPhone 5 NFC's equally dismal. In Japan very active electronic payments abroad are not yet universal. Also, insert earphone terminal using a credit card for low equipment prices. In light of the above, to already overcrowded on the Board joined the NFC, I am afraid, is not easy. And, while the NFC just terminals close to each other to Exchange data, using the very convenient, but this feature, recognition is not high. Another focus of concern is the speaker. Although the iPhone has two metal mesh at the bottom, but after disassembling found only 1 speaker. Request equipped with "true" stereo speakers are loud.

(4) other measures of cost compression

Today, about linkage with processors, large capacity DRAM 2GB high-end style more and more. But mobile product uses DRAM prices higher, the new terminal is estimated as the iPhone 5 is 1GB.

Camera pixel increase has always been guided by 5 million, 8 million pixels, the order of 12 million, 13 million pixels, 16 million pixels. In view of the camera of the iPhone 5 to 8 million

pixels, if you upgrade, new may be 12 million pixels. Now, processors with four quad-core processing system models more and more quad-core CPU power consumption and heat output are significantly, the price is relatively high, estimates Apple will continue to introduce dual-core CPU. Manufacturing technology estimated amount will also be used for 28nm production, than the most sophisticated 1Xnm behind.

From the point of view of technical progress, iPhone 5S can be said to be "frozen models of technical progress". This can also be seen as removing the "most expensive terminal" sign, a good reason. They say intelligent mobile phone-related technology and parts of highly concentrated, both parts still look the same. In order to become a crowd of smart phones, refined design estimates require a stop to take a look back.

The motor vibration patent will be used for iPad 5 and iPad mini 2

According to United States technology blog TechCrunch of reported, mobile marketing company Velti recently publishing of March report displayed, since iPad listed, it has been occupied dominate in flat computer area, and in mobile advertising market iPad also continues to keep has a alone large of situation, iPad mini is 6.2% of share and ranked second, comparatively speaking, in the Android camp, only the market performance of Amazon Kindle Fire did good.

Velti statistics showed that advertising accounted for through the iPad to show to the entire March Tablet 91.6%, iPad of total ads showed mini ranked second with 6.2% share, Kindle Fire is 1.6%, is the best flat-panel market in the Android camp, compared with 0.6% shares in Samsung Galaxy Tab. Android Tablet shown in the total amount of advertising, Amazon's tablet to 73.4%, Samsung tablet is 26.2%.

In terms of specific devices, Apple's devices accounted for advertising display 8 seats in the Top10, iPhone 4 by virtue of 13.3% of these shares ranked first, while the Samsung Galaxy s-II and s-III, respectively ranked 8th and 10th. On all Android devices, because Samsung leading advantage in hardware, so the advertisement of its equipment accounted for Android devices 68.2% of total ads.

A few days ago, Apple released the Q2 earnings, its profits fell for the first time in almost 10 years occurred, but the iPhone is showing a surge in overall sales trends. Of course people care more about Apple's new products.

Results after the end, Cook received a United States journalist's telephone interview, he said, Apple's job is to bring true innovation to the user, but this work is very difficult, while Cook also revealed that Apple is ready for the corresponding product.

When asked exactly when those new products, Cook did not give a direct answer, just suggesting that now the product line continued, and he said, these products will make people feel excited, because they both have a strong sense of innovation.

When the specific time on when asked about new product releases, Cook said, now Apple will not give you a specific time, but these great products from this autumn to continue to see you in early 2014. From Cook's statement, meeting of iPhone 5S should be after September, in accordance with his means, of course, iPad 5, iPad mini 2 are not absent, the beginning of 2014, iWatch and iTV, are they? Apple iPad 5 and iPad mini 2 will be coming, are you looking for it? Most people not just look forward to the new iPad, but also the new iPad accessories, for example, the unique and cheap iPad mini cases.

According to foreign media reports Apple or the iPad and iPad Mini 5 2 Tablet PC to increase the vibration motors, currently Apple has patented technologies.

Recently, about the iPad 5 and iPad Mini 2 will be released, there are many rumours more and more this month, the media also began to suspect iPad 5 and iPad Mini 2 will launch new features. Ingenious is that foreign media recently revealed a Apple obtained a patent, for tablets increase the vibration motors, thus enhancing the iOS plate news and game features.

It is understood that Apple patent involves a multi-channel audio codec, the decoder has been implanted with a chip, mobile handset can be activated according to the input signal or vibration device.

Make forecast about future developments of Apple

After the release of 2013 quarter Q2 earnings, Apple CEO Tim Cook said, China has an unusually large number of potential first-time smartphone buyers and that's not lost on us. We've seen a significant interest in iPhone 4 there and have recently made it even more affordable to make it even more attractive to those first-time buyers. We're hopeful that helps iPhone sales in the future. We're continuing to do that in other markets. We believe the [iPhone 4] for the price point we're offering is an incredible value for people that allows people to get into the ecosystem with a really, really phenomenal product. He said.

In accordance with the normal Apple product release cycles, after Apple released iPhone5S, it will shutdown iPhone 4. But from the above expression of Tim Cook, iPhone 4 will exist in the future, this constitutes a "cheap iPhone" basis. However, I'm afraid this is not cheap so simple.

From Apple on the development path of iPod, we will find that after several generations of evolution of the iPod (lighter and thinner and elegant), developed the Nano, Shuffle, Classic and Touch several branches. In each branch development after several generations, have launched a world of fashion, color version of the product. These color versions can even fashion wear, becoming part of fashion.

It is clear that after the evolution to the seventh generation iPhone, these diversify options have become choice for Apple. But Apple's selection is clearly more elegant and less offensive.

Specific approaches may be this: Apple would retain the basic configuration-core iPhone 4 3.5 inch retina screen, provides a single A5 processor, camera pixel is 5 million, and so on
replace new fuselage color such as blue, red, yellow, black and white plastic case and a new interface. Due to the experience of iPod and iPod touch, this product will be rendered on a new look, titanium vector editor believes that this product will be named iPhone Nano. Thus it is becoming the iPhone

family a whole new category. When Apple iPhone 5S comes, whether there are many kinds of iPhone 5S cases for iPhone users, just like

cute

iPhone 5 cases, maybe some people like

cheap

bling iPhone 5 cases, compare with the new iPhone 5S, the new

iPhone 5S cases also are anticipated

Taking into account its basic low configuration, despite the price (based on rumors) the price is about \$ 299, their profit margins will continue to be considerable, may be further pushed Apple's profit margin.

In addition, the phone will become Apple's iPhone 5S series Classic. In 2014, a stability upgrade iPhone Classic Series 4-inch screens at the same time, Apple will also launch a large-screen, leap (lead generation) configuration of the iPhone is 6--but it is clear that Apple will launch a new solution. Meanwhile, the iPhone nano will also upgrade along the path of iPhone 4S.

At this point, Apple's iPhone will form a complete industrial chain: high-end iPhone 6, high-end iPhone Classic and lightweight iPhone Nano. Due to iPhone 6 maintained products upgrade, price keep not variable of traditional, iPhone 6 will priced in 499 dollars, became full new products line; iPhone Classic 2 will upgrade price and launched color version, price will maintained in 399 dollars, and iPhone Classic 1 (that 5S) price drop for 299 dollars; iPhone nano 2 also will upgrade price, by original of 299 dollars, drop for 249 dollars, and iPhone Nano 1 price will drop to \$ 199.

I tend to think that Apple want to high end of the market and the carrier bundle, while the low-end machine for sale, ready machine card separation, users will want to have a more mobile, so that paired with fashion. While 2014, \$ 200 iPhone appears, its position in the Smartphone market will be able to complete the consolidation â just like the iPod nano after the launch, it was the dominant music player.

Consumers are more looking forward to Retina iPad mini

Apple launches iPad mini 2, which did not seem to worry, since, in their view, iPad mini also has a lot of growth in sales, but now consumers "bored" the latter, why?

Now Taiwan electronic times blast said it from the Apple iPad supply chain information display, iPad mini sales this quarter are expected to decline 20%, due to user demand reduced.

Reports that because of lower demand, Apple's iPad has been decreased from 15 million in Q1 to 100.012 billion mini reserve, LG April provided Panel is estimated to be \$ 3.5 million, almost 1.5 million less than last month.

Judging from the current situation, leading to weak demand, the reason is consumers are waiting for Apple to launch next-generation iPad mini. This, Apple is indeed rare, after all, iPad mini market for less than 6 months (demand).

"Retinal screen iPad mini, why not? "Maybe a lot of people have raised such issues, a lot of people may look forward to the second generation iPad mini replaced Retina screen. And according to the technology blog DIGITIMES reported recently, many consumers are looking forward to the next generation iPad mini, iPad mini is a decline in demand recently. Besides, the iPad mini accessoires also have already been affected, for example,

cheap

iPad mini cases.

News that Apple has recently been adjusted to the current iPad mini subscription plan, is expected to be sold 100.012 billion units in the second quarter of this year, compared with 15 million units in the first quarter is expected to have declined slightly.

At the same time, flat panel manufacturers are also affected by the impact of Apple shipments is expected. Allegedly, LG display sector plans provide 3.5 million in April this year for the iPad and iPad mini screens, number compared to last month by 1.5 million.

However, if second generation iPad mini replaced retina screen, is also unknown. After all, if Apple were to do so, maybe it was meant to "life" and "light" the sacrifice which one of these two.

On April 25, according to foreign media reports, Apple on Wednesday announced that on June 10 this year at the Moscone West Convention Center in San Francisco, in 2013, Worldwide Developers Conference (WWDC), tickets will be held at this Conference United States PDT time (United States Pacific time zone) and on Thursday (April 25) at 10 o'clock in the morning sale.

In this five-day Conference, developers from around the world will be the latest mobile operating system, iOS and OS x desktop operating system functionality, performance and how to improve the application's functionality, quality, innovation, design and other content for discussion, thus helping developers to design new applications with innovative features.

It is learnt that on this worldwide Developers Conference, the Apple engineers will hold over 100 technical activities, there are over 1000 Apple engineers and developers face to face communication, helps developers achieve more technology into the application you are developing. In addition, Apple in 2013 at the worldwide Developers Conference will also issue a popular Apple Design Awards design prizes.

Apple iPhone 6 will use all-glass fuselage

On April 27, Andorid has been ahead of the iPhone, but this lead place is not impeccable. Recent Yankee Group report shows that in the United States, Apple smartphones continue to take users away from Google, claiming the number is so big, so that by the year 2015, United States iPhone owners will be more than Android owners.

Where would the problem: customer loyalty.

In the past 12 months, Yankee surveyed 16,000 consumers, including: what is the smart phone, buy a Smartphone in the next 6 months. Results showed that about half of smartphone users are Android,30% is using the iPhone. Ready to buy a new smartphone in the next 6 months of investigation, 42% said it would buy about Android, and 42% plans to buy iPhone.

Surveys also showed that 91% iPhone owners said they would continue to buy iPhone,6% of people will turn Andorid in next purchase. In other words, more than 9 people in 10 iPhone users are loyal to Apple. Android have a worse performance, users who have Android phones 76% will also choose Android in next time, is still good. But a point of view, the 24% user is ready to go to the other

platforms, 18% of people would choose the iPhone.

Vice President of Yankee Group Carl Howe, Android has reached its peak, he said: "If Apple and Android ecosystems compared to two buckets. New smartphone players (mostly from a feature phone users upgraded to) as falling into the bucket of water per barrel received only rain, and rarely hit the Windows Phone and BlackBerry were part of the two barrels. However, Android barrel leaking bad barrel 5 users will waste 1. Apple barrel waste 7% the user, in other words, users who fall into the bucket of apples preserved. Apple in the bucket at the beginning user fewer, but this bucket of water rose faster than Android, water will eventually be more than Android."

Although recent stock performance revenues a record to see negative growth in the first 10 years, but rumours are still flying around about Apple products, are also fans of technology focus. Know Your Mobile technology blog article pointed out that, although the launch time of iPhone6 still undecided, but fans have begun to expect iPhone6 creative innovation of science and technology. What is more, they also look forward to the new iPhone accessories, for example, cute

iPhone cases. What kinds of iPhone cases that you like best? If you are very confused, you can find all kinds of iPhone cases in iCase-Zone.com.

Message says iPhone6 might abandon the usual small-screen, sharp's new big screen. Sharp recently introduced high sensitivity of 4.8-inch touch screen, even slimmer than the General screen, 8 times is higher than the traditional touch screen sensitivity.

According to Emirates274 reports, users will be able to write on any article in this new video, which is to wear gloves in the winter without disturbing screen sensors also cannot.

iPhone6 may use sapphire glass screen material, hardness of Gorilla glass 3 times more than double. iPhone6 sapphire glass, that phone will be lighter and thinner. There are rumors that Samsung Note 3 screens lighter and thinner material will also be used.

Also rumors iPhone6 fuselage will be the all-glass manufacturing, and is equipped with a transparent display screen, the user can see the cell phone from the screen behind the scenes. A few days ago, Apple films convey the concept the concept of

iPhone6 transparent screens, iPhone6 compactor and the film exactly the consumers reflected how, after formally launched until iPhone6 riddles in order to find out.

In addition, iPhone6 will be powered by iOS 7 system, designed by Apple Senior Vice President of Jony Ive personally designed. iPhone6 Apple A7 will be powered by quad-core processor, memory capacity will have the 16G, 32G, 64G option 3. At the same time, it will be powered by iSight camera and 12 million pixel Pro 10 times optical zoom lens. News that iPhone6 is scheduled for the end of 2013 or early 2014.

The Apple cheaper version of iPhone will be released along with iPhone 5S

According to foreign media reports, the Tactus hfc55 Neptune mobile device shell manufacturer published a picture on Wednesday, Apple cheaper version of iPhone that will be released this year that may just be using the plastic casing.

Neptune recently disclosed under www.hfc55.com market news that Apple may introduce a slightly thicker than the current versions of the iPhone, the price is cheaper, the use of plastic materials the production of iPhone. Tactus announced that suspected a cheap version of iPhone pictures seem to confirm this rumor.

But it is not yet clear whether the pictures released by the Tactus, which was real, and it also did not explain how it got the shell of the cheaper version of the iPhone. According to informed sources, the thickness of new and cheaper version of the iPhone will be a little thicker than Apple iPhone's products, and length and width is different from the current version of the iPhone. While Apple may have a plastic iPhone sometime this year, but it is nothing to do with the upcoming release of Microsoft's new flagship.

Apple may be released the earliest iPhone5 follow-up products in the summer of this year. Market rumored that the product name will be iPhone5S, its processor and graphics processor will have escalated, and may be equipped with a larger screen. If iPhone 5S will use a big screen, so we can not use

bling

iPhone 5 cases to dress up the new iPhone. The iPhone 5 and

iPhone 5S are not the same with iPhone 4 and iPhone 4S, because the iPhone 4 cases is compatible with 4S, so you can
cute

iPhone 4 cases to match the 4S.

Apple has not confirmed the news, it also did not disclose what kind of company is developing a new product. Face competition from Samsung Smartphone Android camp, we see the Smartphone market that Apple has made more demands. Over the years, Apple is showing on a flagship high-end product to consumers, but not everyone can afford such high fees. Maybe in the eyes of Apple, the profit is everything, but more and more, the fact that market share is also shaping the brand image is the cornerstone.

Since the message after the burst of the cheapest iPhone, Neptune, said www.loop88, a senior market analyst White Plains believes that Apple will launch two new iPhone in July, including iPhone5S and cheap iPhone. So presumably is mainly based on Apple's release of a series of initiatives the results of last year. From iPhone4S years published the year before, last year, iPhone5, iPad mini, iPad4 shortening release cycles. Distributed with the Apple can make the two devices is not possible. But we still have to worry about, cheap iPhone might affect sales of high-end iPhone5S?

Citigroup Global Securities recently released a new research report, which clearly states that the next generation of Apple iPhone to new Mac (or iPhone 5S) will be officially released in September this year, and rumors for quite some time "cheaper version of the iPhone" a new advent of the machines synchronized.

If the rumors are true, then there is good China Mobile users--Citigroup said, iPhone 5S and cheaper version of the iPhone will have the TD-SCDMA version, published at the end of September (or the beginning of October).

It was also revealed, in tablets, Apple's fifth-generation iPad and Apple iPad mini 2 rumors for quite some time will be officially released in September or October this year.

Previously we heard had some rumors, which pointed out that Apple or will "early" in June publishing new, but later Apple CEO Cook hinted and not launched new in September, while this meet Apple of new publishing "practice", but we also know time ranging people, after all large Android high-end flagship opportunities in this several months of time in occupation market, to last, left Apple new machine of market on not more has. Like HTC and Samsung Galaxy S4 One has not only launched a fierce competition in the

realm of Android, and the target of Apple fans.

The publish time of iPhone 5S was exposed by Japan carrier AU

Repeated exposure of all the rumors about Apple's next-generation in the near future, following the camera information, now news that Apple has begun testing the new iPhone handset, as well as iOS 7 operating system. Marriott International whao88.NET indicates that the rumours in the developer site has news, while previous rumors that Apple will release next-generation iPhone in late June, both considered, entering closed beta phase is normal.

Marriott International, www.whao88.NET pointed out that foreign media iMore, and iLounge have been exposure camera-related information for iPhone 5S, but news is that 13 million pixel camera. iPhone 5 now uses the same as iPhone 4S F2.4 aperture of 8 million pixels camera, just like a Sapphire lens, subtle change.

Rumored that iPhone 5 and iPhone 5S have the same basic design, but the iPhone 5 will offer better graphics and processor performance, thus providing improved overall user experience. All aspects from the measure, iPhone 5S should better than iPhone 5, enabling competition between Apple and other smartphone manufacturers are in a better position.

iPhone 5S will no doubt have better processors. Why would anyone say for sure? The reason is simple: Apple launches iPhone every year, when there will be more powerful and better processor. This one was no exception.

Apple is expected to configure more memory for iPhone 5S. Memory is competitive in smartphone market. Cell phone has more memory, open applications more quickly, you can effectively run multiple programs at once. More memory is good.

Apple Launches new machines in previous years, usually in October, and now the Smartphone is developing rapidly, particularly dominated by Samsung Android manufacturers rise also prompted Apple to some extent in accelerating the pace of introduction of new products. If the iPhone 5 and iPhone 5S have the same size, so we

can use

cute

iPhone 5 cases to dress up our new iPhone 5S, I think most of people like the same size, just like

cute

iPhone 4 cases to match iPhone 4S.

On camera, Marriott International www.66wanhao.com that rumored next-generation iPhone will be used with greater aperture larger camera, pixels will be 12 million, can dramatically improve night photo effects. The new iPhone will use sapphire glass, lens ' sharpness and abrasion resistance is still outstanding.

A net friend exposed a piece of Japan carrier AU poster, poster exposure the exact release time of iPhone5S, as well as new features.

Judging from the poster, iPhone 5S will be officially released on June 20, the market in July, increased the fingerprint recognition, was also promoted from 8 million pixels camera 13 million pixels, this is consistent with previous rumors.

In addition iPhone 5S will be running iOS 7 operating system, UI will be a completely new design, not know what Apple brings iOS 7.

Apple iPad is the next iPhone

Despite the industry revolution, but for Apple, iPad is always worse than iPhone. As the iPhone has a very high profit marginâ for every \$ 1 of revenue includes profits of us \$ 0.5 or 0.6, it naturally became the company's most important business.

Analysis of Slate wrote an article recently, iPad was launched for a three-year, its prospects very promising, leading advantage is weakening of the iPhone, Apple's next has the status of iPhone products, not a Watch, and a TV, is the iPad.

Apple's latest earnings, the company sold 19 million units iPad in the first quarter, though far less than the 37 million units of the iPhone, but the cent of growth well above the iPhone 65%. The reason is simple, with the rise of competitors and the breakout of cheap smartphones, iPhone dominance is slowly clearing up and

Tablet market, iPad is now the absolute overlord, even in cheap Tablet market, Apple iPad mini to consolidate a competitive advantage.

This means that iPhone brings to Apple's revenues and profits that will slow. Analysis of Slate said if this trend continued, iPad, or in 2015 will surpass the iPhone as the company's most popular product, and Apple also will become the first major Tablet PC manufacturers in the world.

Slate believes that is very similar to iPad iPod strategy: first launched a revolutionary product, and then expanding its product line, from high to low priced coverage. Just as iPod Classic and the iPod touch, iPod nano, and iPod Shuffle iPad type there are not that many, but price coverage less comprehensive: from \$ 499 iPad 4 to the iPad iPad mini to \$ 329.

Multiple prices, iPad, and iPod have another similarity is that they are not high profit margins. Slate analysis, relative to profits, Apple is more interested in their ecological significance for Apple. It is thanks to the iPod "halo effect", many people end up as iPhone users. And scary this is the Apple ecosystem, the product is by no means an isolated individual, but run through core iOS experience package, the whole breakthrough single horizontal expansion, hardware, service and experience form a mutual extension, resource share strong eco-system. Now, despite the iPod's status greatly weakened, but for so many years, it continued to occupy the digital music player market share up to 75%. What is more, we can also see from the iPad mini accessories, there are many suppliers to produce iPad mini accessories, for example, cheap

iPad mini cases, the iPad mini has been very popular.

But the harsh environment for iPad is clearly much better than iPod in competition, and increased impact of the cheap Android tablets. Slate notes that these competitors, though the price has advantages, but their margins are lower, both Amazon and Google, are not directly make money from hardware. And on the other hand, has reached 350,000 iPad exclusive application both in terms of quantity and quality far exceeding the Android tablet, Tablet PC, highlighted the value of, so this advantage is critical.

Slate finally said industry expectations for Apple to launch new products has an irrational, so Apple's resurgence may not be smart watch, the legendary TV and iPad is that people have been

ignored.

Finger Scan is the most anticipated feature for iPhone 5S

Forbes writer Anthony Wing Kosner analysis of articles published, last week's news that Apple's next generation iPhone have to wait until the autumn to publish, at the same time, the rival Samsung's strong growth performance achieved, these two messages do not ban observers worry about Apple's future road. Yet we should assert that Apple's Outlook was too early to worry. It may be Apple's annual Worldwide Developers Conference to be held June 10--(Worldwide Developer Conference, WWDC) saw Apple on some of the significant progress made in the software. In addition, the release of the next-generation iPhone may be waiting a long time, because Apple will probably be added to this phone is a truly ground-breaking features, thus proving that everyone is worth the wait.

One view was that Apple had acquired the security services provider AuthenTec, next-generation iPhone may be fully implanted AuthenTec fingerprint scanning technologies. Cult of Mac technology Web site columnist Mike Elgan thought that the iPhone "I" symbolizes "identity", and Apple as a global leader to create a legend, to be able to build something people want.

Mike Elgan has a very interesting opinion, he believes that next-generation iPhone will use fingerprint scanning technologies and NFC chip (near field communication). He wrote that Apple NFC chip and fingerprint scanning as a part of company strategy, the so-called grand strategy is to use the iPhone as a digital identification solutions. For years, people have been talking about the mobile phone as a basic unit of authentication, when Mike Elgan thinks now is a reality, and to make the rhetoric real reality is Apple.

Mike Elgan writes that Apple are keen to resolve the complex issue, so far still no solution, exploiting the opportunities from

this perspective, nothing more than digital identity. He cited the Boston Consulting Group (The Boston Consulting Group), according to a report, by 2020 the global value of digital identity solutions sector will reach the trillion-dollar level.

Another interesting point is that Apple's solution different from Google and Facebook identity system. Authentication and associated with building huge networks, the iPhone security system enables you to completely set safety protection in accordance with their wishes. Just like the popular iPhone slide to unlock feature, iPhone security system seems to be in how to set up a digital security, as well as the circumstances in which the identification via mobile phone user independent control. Mike Elgan believes that this is just the start, users can be connected to any of the available devices iCloud content and settings.

Can be seen from several points below some clues of the new Apple iPhone built-in fingerprint scanner:

1, hardware: Reuters reported last week, there is talk that a Taiwan supplier said Apple is trying to find a coating material that does not interfere with fingerprint sensors. One reason for this could be the next-generation iPhone delayed.

2, production: United Kingdom technology website The Register has reported that there have been unconfirmed rumors that Apple has put 8 million possible quality problems iPhone phone returned to business Taiwan Foxconn. Although there are no signs that this is because fingerprint scanning systems have problems, but there is such a possibility does exist. If the size of iPhone 5S is the same with iPhone 5, so we can use

cute

iPhone 5 cases to match the new iPhone 5S, just like use

cute

iPhone 4 cases to dress up the iPhone 4S. If the size of iPhone 5S is not same with the iPhone 5, most of people will have to buy the new iPhone 5S cases.

3, software: even if the hardware is advancing step by step, but identification software system running might not be in place.

4, the application tests: LeapMotion has decided to delay the controller, may have realized that even if Apple hardware and software systems to work together, software developers will also need time to test the application, from the outset, so as to make the App Store applications that support identity recognition.

So, iPhone 5S fingerprint scanning feature is something to look forward to? Above, the answer is Yes, both for Apple and the consumer. Many people say on the Internet, identifying

vulnerabilities, needed repair, due to the complexity of the issues and monumental, as of now none of us can solve. Try Apple may be in this regard is expected in June Apple Worldwide Developers Conference, there might be some clues in this regard, however, is known for its apples have long been a mystery.

\$ 199-249 of Apple iPad mini will be or released

KGI Securities analyst Ming-Chi Kuo has today released the latest report on Apple's iPad. Kuo thinks Apple iPad iPad mini will be the future for Apple. Previously, he had predicted Apple will launch in the fourth quarter of this year with the Retina display iPad mini, today he thinks Apple may also be considered a lower price of the iPad mini.

Before the iPad mini 2 was released, Apple may introduce a lower price compete with Android Tablet iPad mini. In order to reduce costs, Apple may be using more sophisticated technology to produce A5 processor, simplify the production process of metal casing, remove the rear camera, and to reduce the capacity to 8GB. In addition to these, Apple will choose to cooperate with more suppliers, cheap iPad mini prices between \$ 199-249.

However, Kuo thinks that such a device would not be more iPad sale, but can you organize a low-end Android Tablet invasion. Prior to the launch in the first generation of the iPad mini, there are a lot of people wish their prices between \$ 199-249, but the cheapest iPad mini for \$ 329.

There's news that Apple will launch later in the year cheap iPhone, the device will use the plastic shell. Current Android Tablet PC gradually begin encroaching on markets, under the Apple iPad's share has fallen to 50%, but a lot of people are expecting Apple to launch in the second half of the year to use Retina display iPad mini.

On April 29, according to foreign media reports, according to KGI securities gained AppleInsider site Sunday (KGI Securities) analysts Ming-Chi Kuo issued a research report saying, the second generation iPad Mini mass production unlikely before October, mainly due to the 7.9-inch retina display is configured for this

device there are production problems. For those who are curious, whether the cheaper iPad mini has the same with iPad mini, if so, we can still use

cheap

iPad mini cases to dress up our new iPad mini.

Analyst Kuo pointed out that because of rumors say these production problems, Apple may temporarily cheaper iPad Mini to help launch a sale and prevent the tablet of low-price competitors.

In his view, the low-price iPad Mini price \$ 199 to \$ 249.

Apple could take a number of measures to reduce the production cost of the iPad Mini. Kuo believes that he suggested choices including the cancellation of the back of the camera, down to 8GB internal storage, streamlined metal casing production, or the use of more advanced technology to create A5 processor.

Full size 9.7 inch iPad, Kuo still expects Apple's fifth-generation iPad will be introduced in the autumn of this year. However, he did not think the whole size of iPad sales will increase significantly, because this product does not provide different user experience than the iPad Mini.

Kuo said, we believe that, as Apple released the new and exciting products, Apple's long-term competitive advantage in the tablet computer market. However, due to the delayed product launches and increasing competition, Apple and iPad supply chain have to wait until 2013 to grow significantly in the fourth quarter.

Google voice Now VS Apple Siri

According to foreign media reports, Google launched iPhone version Assistant Google voice Now on Monday, as Smartphone users get up-to-date information such as weather and traffic forecasts one of the main services compete with Apple personal digital assistant Siri.

Last year, Google launched Google Now for Android devices.

Starting from Monday, Google Now will be for both iPhone and iPad,

a feature in the application of the new version of Google search. Apple's Siri and personal digital assistants such as Google Now playing an increasing role in the Smartphone application, these personal digital assistants application helps users find information on the Internet, schedule, and manage their travel plans.

Market analysts believed that preinstalled on the iPhone and iPad Apple's Siri in the growing threat to the world's number one search engine Google because Siri can provide information such as sports scores and nearby restaurants, reducing people's use of the Google search engine.

Google mobile search and the Assistant Vice President of business Johanna Wright describes as Google Now search the next stage of evolution, users do not need to type a query to obtain the answer.

This technology uses Google's range of online services, from Internet search to your personal Google Calendar and Gmail email entry, always provide relevant information in a pop-up window, Google called "cards". Such as Google Now can automatically remind travelers about the upcoming trip, and based on the current traffic situation, recommends that the best time for visiting the airport.

Android version of Google Now can be started directly on the home screen, users can click on the phone home screen quick access pop up message. Different from the Android version of Google Now, Google Now version iOS to launch Google search however you can uses. Now Apple iPhone 5S will be launched in this summer, if the size of new iPhone is the same with iPhone 5, so you can buy the cute

iPhone cases for your new iPhone 5S, many you want to find more kinds of iPhone cases, you can go to iCase-Zone.com.

As users increasingly use mobile devices instead of a PC to access the Internet, smart phones has become a major battlefield for Google and Apple. Last September, Apple uses its own mapping service replace the pre-installed Google maps in the iPhone before, Apple for its map service, however there is a lot of error messages have been criticized Apple CEO Tim Cook had to come forward to publicly apologize.

Ironic is that most Android phones are currently unable to use Google Now, because these phones still carry older operating systems can't run Google Now, to the contrary, Google Now is able to rival Android iOS running on the operating system.

Currently, Google can Now only carry Jelly Bean run on the Android mobile phone operating system. According to Google's own statistics show that currently only 25% Android phones powered by Jelly Bean operating system, approximately 39% of Android phones is still Gingerbread operating system, the version of the operating system market has been about 2.5 years.

So many Android phones is still running outdated versions of the operating system, because handset makers in the equipment they still have difficulty when upgrading to the latest version of the Android operating system. Most manufacturers use their own "skin" and the service of the General version of the Android operating system has been substantially amended. Later, to wireless mobile operating system upgrade, the manufacturer must provide the operator with those adjustments, to conduct more tests. The process sometimes takes months of time.

Apple iPhone VS Samsung GALAXY VS Nokia Lumia

United States Citi securities with the latest report, Apple's next generation iPhone mobile phone will be launched in September this year, in addition to Apple iPhone rumors for a long time 5S, lower-priced version of the iPhone will be unveiled.

Citi stock as revealed in the Apple become the world's largest number of users for the first time operators China Mobile business customers, Apple's iPhone will be launched to support the TD-SCDMA standard 5S and lower iPhone, TD-SCDMA proprietary 3G format is used by China Mobile network standard is obviously billions of users attracted Apple's partnership with China Mobile.

Outside is very concerned about the next generation iPhone, fifth-generation second generation Apple iPad and iPad mini will debut during the period from September to October, before that the Android maker's flagship products have been listed, and the immense impact on Apple's market share. Do you look forward this new iPhone? I think that many people want to know that the size of the new iPhone, if the new iPhone has the same size with iPhone 5, so you can use
bling

iPhone 5 cases to match your beloved new iPhone, if not, you have to buy a new iPhone case.

Nokia introduces new Lumia phone rumours for some time now, before the company finally announced the launch will be held on May 14 in London, which include 41 million megapixel EOS as well as the metal body of the Catwalk to debut, has become a focus of attention of the outside world.

Nokia has issued invitations to the media in blue tones, vaguely on the left side you can see the letter of invitation, "See What's Next" (see what is coming), invite, and white font on a blue background on the right, "THE NOKIA LUMIA STORY CONTINUES" (Nokia Lumia's story will continue), it also hinted the latest Lumia phone will appear to the outside world.

PureView earlier rumored Nokia ready to launch with 41 million pixel camera EOS, and a Catwalk using an aluminum body and coated with nano-coating, water resistant feature, the details still need to wait for next month's launch announced in conjunction with, but it is interesting at the same time Google I/O 2013 Conference will be held in San Francisco.

There is no doubt that Samsung GALAXY Smartphone arm forces now increasingly expanding family. Samsung GALAXY S4 as the flagship product in the global market, Samsung GALAXY S4 Mini base has no suspense, before news that Samsung has positioned relatively low will also launch a new smartphone.

According to foreign media reports the news, which named Samsung GALAXY Core, the new Smartphone will be launched targeted at the low end of the market, powered by Android version 4.1 Jelly Bean system, overall appearance will carry over Samsung GALAXY Samsung GALAXY S4, S4 Mini design. Samsung GALAXY Core will have a 4.3-inch WVGA resolution display screen, with 1.2GHz dual-core processors at, this Smartphone will run with 768MB and 8GB capacity of memory storage.

In addition to Samsung GALAXY Core is equipped with rear camera is only 5 million pixel level, the battery capacity of 1800mAh.

Foreign media also said that this Smartphone will be the price of 14,000 rubles in Russia market, equivalent to about \$ 280.

Apple iPad Mini2 is certain to inspire a raft of imitations

Although Apple announced at the WWDC Conference is not currently released product, but widely anticipated iPad mini may update 2 generations get Retina screen. But according to foreign news media noted that the iPad mini2 may not be the most short-lived iPad mini, Apple may update the iPad mini product line early next year.

Reports that iPad mini2 is more likely to be issued in early June this year, but Apple may also be delayed until September this year introduces new iPad mini2. New iPad Retina screen mini2 is expected to be used, but according to historical iPad3, Apple's iPad may then update the mini3, LTPS integration by new touch screen to save power and reduce costs.

Report predicted that Apple will at the beginning of next year, publish using LTPS screen iPad mini3. The processor of iPad mini3 was upgraded to provide adapted Retina screen performance. Analysis indicates that iPhone and iPad Tablet PC product line product line, faced pressure from competitors quickly update products, Apple or update the product faster to respond to competition.

In 2010, the iPad's stunning debut shocked the whole world, has achieved great success in attracting numerous competitors scramble to imitate. People mimic iPad, launch their tablets at the same time, Apple launched the iPad mini, again stole the limelight in the Tablet market, and these

cheap

iPad mini cases are hot seller in the iPad accessories.

At first it was iPad mini doesn't think much of, which is an Apple under the forced launch of the product. But huge market demand and high sales proves that Apple iPad mini was again put on a chip. Taiwan the electronic times, latest reports said, like the iPad, iPad mini mimics the frenzy will be raised again.

Anonymous industry sources, the next time there will be so many new small form factor Tablet PC into the markets. According to the previous blast, we know Apple's second-generation iPad mini will be

equipped with screens at the Retina level. Apple competitors certainly have an understanding about this information, it is learnt that they had started to develop a higher pixel density of the screen, to mini2 than Apple's iPad.

United States Patent and Trademark Office (USPTO) today announced five of Apple's latest obtained design patents. Two of iPad-related, two associated with Apple's latest iPad mini. There is also a description of the iOS system "settings" user interface.

We learn that according to patent documents, which a design patent shall come from the hands of Apple's industrial design team, including Senior Vice President of Apple, as well as design boss Jonathan Ive (Jonathan), as well as Bartley Andre, Jody Akana, Daniel Coster, Daniele de Iuliis, and Evans Hankey, and Richard Howarth, and Duncan Kerr and other members. In addition, former Apple CEO Steve Jobs also took part in "iPad+iOS" and "iPad+virtual keyboard" that two patented design.

According to foreign media reports, NPD DisplaySearch analyst Richard Shim recently noted that the fastest Apple LG Display Panel suppliers in the coming months begin mass production of the next-generation mini Retina Panel work.

Shim said, now we have Apple eager to distance relationship with Samsung, iPad mini Panel coupled with LGD has recently took over production work, so not hard to speculate that LGD will also be the main supplier of Retina iPad mini Panel.

In addition, Shim said the 7.9-inch Retina iPad mini screen resolutions up to 2048x1536. If converted to pixels, so it you see on the screen with the iPhone5 close 326 PPI pixel rendering effects. Shim believes that LGD Retina Panel mass production will be officially launched in June.

Who is the King in the smart-phone market

Shipments fell, the drop in market share, shares, net profit fell Once scenery infinite apples, recently was the trade

that "weakness". Many reasons relate to a blowout in the Smartphone market. AI vector Consulting's latest data show that 2013 scale of smartphone users in China reached 420 million in the first quarter, the chain grew over 10%. With the smart phone market growth, pattern has been changing. "Apple era" pattern, where to go?

"Apple has begun to decline, ' Apple era ' has arrived.

"Recently, the research center of Chinese Academy of social sciences, information technology Secretary-General Jiang Qiping said.

In September last year after its highest price us \$ 702 per share, Apple shares lower, falling to around \$ 400 in recent reductions had been more than 40%. 2013 second-quarter results showed Apple recently, its net profit to 9.547 billion dollars, fell for the first time in ten years occurred, declined to reach 18%, "Apple's decline, the core reason is that its innovation capacity and competitiveness of the market have been far worse than before. "Analysys analyst Jun Wang yesterday said to newspaper reporters. We can also see from the Apple iPhone accessories, for example,

cute

iPhone 4 cases.

Basically it takes two with Apple and HTC. Its earnings in the first quarter, when Ji Ying received 1.44 billion dollars, fell 36.9%; \$ 2.83 million in net profit, down 91.5%. Is even more depressing is that it is an HTC 6 consecutive quarterly profit declines.

Drop, rise, in the pattern of the Smartphone market, there is growing domestic manufacturers everywhere. First, Huawei and ZTE, IDC released data show that both of these vendors have jumped respectively 2012 global cell phone market share for third and fifth place. In China, according to the most recent report of market research firm Sai Noi, cool home-made Smartphone second place.

In addition, AI Media Advisory released yesterday by the China smartphone market quarterly monitoring report showed that the first quarter of 2013, domestic mobile phone brand market share with varying degrees of increase. Lenovo, ZTE, Huawei, cool market share respectively, 9.1%,8.2%, China-made mobile phones branded sales accounted for more than half.

This large rivers and lakes in the Smartphone market, Nokia, Motorola and other "Furtwangler" babies were also newcomers.

Ali phone will debut the global mobile Internet Conference in Beijing. Alibaba will work with ZOPO, Amoi, Kivu, KONKA, pepper 5

launch 6 aliyun mobile terminal manufacturers. Industry observers Liang Zhenpeng to newspaper reporters, Ali launched the mobile phones, to target millions of sellers on Taobao, which is a large potential user groups.

Amazon also began to increase the pace of entering the Smartphone. Prior to its recent hiring of Microsoft Windows Phone7 voice search company EVI team General Manager, acquisitions and a series of actions, speculation of a launch of its own-brand mobile phone products more and more.

"Internet companies now competing to enter the smart phone market, the biggest advantage is a software and systems, disadvantage is very weak in the r. "For smart mobile Internet business in the field of new faces, Liang Zhen-Peng said that" the Internet company it's hard to make the mainstream mobile phones, manufacture and design of foundations are too weak.

â

And once caused controversy and ridicule, "Rookie" millet, also increasingly eye-catching, AI Media Advisory of the China smartphone market quarterly monitoring report notes that millet booty 3.9% market share in the first quarter, and gives "stamina powerful" projections.

If you want to learn more information about smartphone market, stay tuned for upcoming articles in our iCase-Zone.com.

The Latest News About Apple iPhone 5S

According to Japan the journal industry news, Apple's next generation iPhone mobile phone key component, display device manufactured by sharp will begin mass production next month.

Reports that sharp at its Kameyama of Mie manufacturing base, for Apple's next generation iPhone cell phone display screen equipment, which legend has it the iPhone is very similar to the 5S.

So far, sharp Kameyama manufacturing base failed to full load, but after receiving the next-generation iPhone mobile display production tasks, the base is expected to achieve "full throttle".

Apple iPhone rumors 5S will be postponed, but some analysts to make a stern warning, according to need during the third quarter before the launch of its next-generation iPhone. The latest news suggests that these rumors may be the facts.

It is reported that sharp joined LG display and Japan monitor (Japan by Sony mobile display, Toshiba mobile display on the monitor and the merger of Hitachi displays) for Apple production ranks of the mobile telephone display. But the report made no mention of LG display and Japan monitor for Apple display time. When Apple released its next generation iPhone, also is expected to release its next-generation mobile operating system--iOS 7. In addition, the new iPhone might use the new kernel, and may include a newer processor chip.

According to foreign media reports, iPhone5S and iPhone6 launch could mean iOS systems global market share will be in the year 2015 than Android. One United States survey, iPhone5S and iPhone6 will lead the first of Apple's market share by 2015. 16,000 among smartphone users, 91% of iPhone users will upgrade to mobile phones this year and next iPhone or iPhone 6 5S. Remaining 6% the users says it will put the iPhone into Andre, meanwhile, 76% Android Android device users said they would buy more. In the remaining 24% of Android users, 18% said they would buy an Apple device.

Engaged in communication and network research and consulting in the field of the Yankee Group said that in 2016, Apple in the United States share of the Smartphone market will rise to 37%, and Android will remain at 34%. See Apple and Android ecosystems as two buckets of water. New smart phone users have nearly split into two buckets of water, a few users choose the Windows Phone and BlackBerry. Nevertheless, Andrew the bucket has created serious cracks, lost about one-fifth into one of the user.

Rumored iPhone will be introduced later in the year 5S will be equipped with Apple's iOS System 7, and 4.2-inch Retina display.

Apple iPhone 6 will be released in 2014 and will be more substantive. iPhone 6 reportedly will be equipped with 12 million pixel camera, iPad 4 A6X processors as well as wireless-charging characteristic. Anecdotally, its screen will be between 4.2 to 4.6 inches, while its color design and volume adjustments on the control bar.

Yesterday, on the iPhone5S and iPad 5,iPhone 6 34 patents published on the Patently Apple, and shows some interesting invisible devices. These will appear on the next generation of the iPhone remains to be determined. What is more, if the size of new

iPhone 5S is the same with iPhone 5, you can use cute iPhone cases to dress up your beloved iPhone 5S.

Apple is about to release new iPhone a recent hot topic. In addition to the iPhone from the 5S, lower-priced version of the iPhone is also affected by a lot of people's attention. Recently, former Apple executive Ken Segall recently revealed on his blog, Apple iPhone camp owned by 2013 will continue to grow. Ken Segall said Apple's iPhone will be using the same development cycle as the iPod, lived through the ages after the upgrade, iPhone will become more and more perfect, but from the currently revealed some of the parameters of view, Apple's next generation iPhone cell phones have already upgraded encountered a bottleneck, so by having more color versions or larger screens to make it meet the needs of different consumers.

The new photo of New Apple iPhone has exposed Appearance may be related to iPhone 5 Apple next generation iPhone exactly the same, but that does not mean that the next generation iPhone and iPhone 5 compared to no significant improvement.

According to United States technology blog BGR writers zhake?aipusitan (Zach Epstein) reported that the latest leaked HD spy photos show, the next-generation iPhone will use some of the new parts inside. In his view, judging from these parts, "the next-generation iPhone at the time of publishing this fall will have significant internal design changes."

Epstein said that these new parts will wear more than Apple to rearrange the interior design for the next-generation iPhone. He pointed out that these new parts are smaller and lighter, were joined by Apple next generation iPhone stuff.

Industry expressed, this internal design change may be good, but the same design may have disappointed many users. Apple's iPhone

will maintain a high level of sales, but Samsung and HTC have proved that people love the big screen Smartphone, so if Apple doesn't introduce a big iPhone screen, so the situation is likely to get bad.

New iPhone internal parts or remodel

Many analysts believe that Apple's next generation iPhone will be called iPhone 5S, this device looks like no big changes, just like the s-level upgrades in the past. BGR website won a number of iPhone 5S part abroad, although the appearance of your devices may not appear significant changes but there will be great changes. If the size of new iPhone is the same with iPhone 5, you can use the iPhone 5 cases to match up your new iPhone, such as

bling

iPhone cases, cool iPhone cases,

stylish

iPhone cases and so on.

iPhone rumors before mentioned 5S is equipped with a faster processor, better camera, and may have a fingerprint sensor. Of course, the projections are also unable to be determined, but leaked parts of display pictures, Apple plans to redesign the iPhone within 5S, reduced part size, make room for new parts added.

Leak parts including speaker bracket, flexible cable of the receiver bracket, vibration motors, WiFi and SIM card tray.

iPhone 5S component of this exposure have vibrating motor, receiver and speaker bracket, such as Wi-Fi, cable, United States media BGR also stressed that the iPhone 5 is much smaller compared to these parts, so Apple's new iPhone should be to remodel.

Taiwan media had claimed that, iPhone 5S built-in fingerprint identification capability, the Home key (touch) made of Sapphire Crystal. Then Taiwan the electronic times, gave the latest news that manufacturers have sapphire glass model to touch Home key Apple waiting for inspection, but this Taiwan manufacturer is Tera Xtal.

Upgrades or camera pixels for iPhone only 5S

Apple 5S's front-facing camera would be upgraded to 2 million pixels, rear camera you will upgrade to 12 million pixels.

Unfortunately this feature only supports Apple 5S, and probably would have to be postponed to the next iOS version 7.1 update.

But this so-called highlights may disappoint many fruit powder, because Samsung Galaxy S4 and before LG Optimus g Pro both have had the same or similar functionality. Now can only hope Apple more innovations and but also highlights hidden as a secret weapon.

It is reported that Apple's dual-camera feature is still in Beta

testing phase, Apple is expected to be completed in the near future tests, and integrated in the official version of iOS 7.

May 18 Beijing time, according to foreign media reports, the United States Defense Information Systems Agency (DISA) said in a statement on Friday, it had approved the Apple iOS 6 devices can be used on a network at the Ministry of defence. This means that the Ministry of defence to its existing staff of iPhone and iPad on iOS 6, but employees can't use their iOS devices on the network in the military.

DISA spokesman Alanna Johnson (Alana Johnson) says: "this does not mean that Apple will supply contract signed or reached a similar deal with us. Apple iOS, just 6 operating system had obtained military network access. â

What will Apple iPhone be like in the future

There for Apple's expectations are always so high, because it is the only jobs created Apple and not other brands. But history tells us is that the Apple iPhone will tend to have a two-year update cycle. That is no accident, then, iPhone5S will still be a relatively minor upgrade of iPhone5, no one can speak good but who won't be the iPhone 6? In addition, it is not know whether Apple's next generation iPhone would debut at WWDC.

Today, Apple is no longer a top of Apple 3 years ago, at the product level, once its much-needed innovation to prove itself.

Like Siri iPhone4S to join before, these impressive innovations are helping Apple to address the crux of the problem. Areas in which Apple's next generation iPhone can break it? PhoneDog wrote about this proposed five core innovation.

1. Durability increased

Apple iPhone5 despite the use of ultra thin aluminum fuselage, painting the door but it has failed to escape out of the ending.

Current Sony Xperia product z, Huawei Ascend D2 this have already begun-style features are supported, so Apple can also punch in this

regard, allow consumers to use more secure, was impressed by iPhone vulnerable no longer exists.

2, larger displays

Apple iPhone5 screen up to 4 inches, but are still too small for most users, and the screen ratio is very puzzling. Current Android products have entered a 5-inch 1080p, and Apple iPhone screen size, screen pixels to enhance at the same time adding some narrow border design, the effect must be very different. However, if the new iPhone 5 has a bigger size than iPhone 5, so you can not use

cute iPhone 5 cases to dress up your iPhone 5S.

3, changing the iOS system interface

Crossroads of the iOS system has come to have to change. Despite the Visual icon brings us a lot of convenience on, but over the years the stone have had a deep sense of Visual fatigue users. Apple currently favored to be equipped with new flat-style icon.

4, increased battery life

Today's smartphones are increasingly slim, Apple iPhone5 are no exception. However, battery life will be reduced because of the reduced the thickness of, if Apple can make achievements in this regard, therefore, will certainly make recognition of Apple products.

5, joined unprecedented design

All along, the Apple iPhone is not a big change in design, the biggest change was the 3.5-inch screen stretch to 4-inch screen. So if Apple could design some improved results will be much better. More exposure now is Apple's Home keys will adopt the Sapphire design, and would join the finger scan feature, or that Apple might consider double-sided design of smart phones, users are able to operate the mobile phone on the back of the fuselage.

Of course, these proposals are Phonedog fantasy scenarios, but also precisely tell the voices of a lot of people for the future Apple innovations, don't know whether Cook will accept such a proposal?

Apple Developer Conference will be opened next month, apart from the most talked about debut iOS 7 will debut, a new MacBook Air OS x 10.9, also will see you.

Taiwan chain gives latest news revealed that new MacBook Air will be at WWDC 2013 debut, and it sure is not equipped with Retina the retina screen.

Then Taiwan e-times also gave the same message that the new MacBook Air with MBA and now there is not much difference, just the fuselage detail with minor adjustments, latest Haswell and powered by Intel processors.

Many analysts believe that adding a Retina display look like a breeze on the MBA, but this display will add more additional costs, undermining its ultra thin design, there will also be a serious depletion of its battery life. For Apple, trying to balance the Retina display and the autonomy and achieve the most precise design, is no small challenge.

Judging from the current situation, a new generation of MacBook Air will be WWDC debut in 2013 the only hardware. Of course than this, we are most concerned about is the rumored in flat design of iOS7. If you want to learn more information about iPhone 5S, you can go to this website

Spot News About Apple iPhone 5S

According to foreign media IBTimes reports, United Kingdom operators Vodafone (Vodafone), an internal document shows, the upcoming release of Apple's next generation iPhone is not the fabled iPhone 5S, but the iPhone 6.

It is learnt that the United Kingdom operators Vodafone employee exposure, they will introduce new product list list, which we were surprised the "4G iPhone 6" message, and beside the release dates and other information was vague. The employee also said that iPhone 5S may be what Apple iPhone 5S will skip directly to publish iPhone 6.

There are rumors that Apple will release iPhone 5S in the third quarter of this year, upgrade the processor and camera and increased the fingerprint sensor and near-field communication (NFC)

and other new features, iPhone 6 is released in June 2014. However, the media also pointed out that Vodafone's "iPhone 6" actually refers to the iPhone 5, iPhone 5 is the sixth generation of iPhone.

According to Japan blog Macotakara, has issued a report, Apple is about to launch new products including: low-price version of the iPhone, iPad and iPhone 5S. Among them, low cost trial version of iPhone and iPhone 5S in June this year, released in September and iPad 5 release date expected in October this year.

In the design, iPhone 5S is basically the same as before, so you can dress up your new iPhone with the cute

iPhone case, but the aircraft joined the colorful color scheme, including black, white, gold, green, etc. Apple will provide it is equipped with a dual-LED Flash, rear microphone hole located between the camera and Flash. Cheap iPhone version is primarily intended for the mid-tier market, using polycarbonate shell.

Multiple color schemes will become a highlight of the machine, is expected to have a white, grey, pink, green, blue and many other colours, but does not include the black version.

According to the Wall Street Journal reported that in order to compete more directly with Google, Apple, Amazon is expanding the Kindle devices outside of the series. Sources said that Amazon is developing a high-end Smartphone that is equipped with glasses-free 3D display. Familiar with Amazon plans to people familiar with the matter said, Amazon recently has been developing a richer combination of devices, which includes two smart phones and audio streaming device, the purpose is coverage of the develop the Kindle Fire outside the Tablet market.

One device is a high-end Smartphone that is equipped with a glasses-free 3D display, allowing users to watch three-dimensional images, without the need to wear glasses. Informed sources said, with tracking technology in the retina, the images seem to float on top of the screen on a Smartphone, just like a hologram, rendering three dimensional images from various angles. The two sources said, users may only need to navigate with eye on the content.

Informed sources said Amazon hopes thanks to the 3D display stand out from the many manufacturers of mobile phones, Qualcomm will be supplied for the 4G LTE Smartphone chips.

Amazon's hardware part of information had been compromised. Last year on news that Amazon is developing an intelligent machine. Last

month, the Wall Street Journal and other media have reported that Asian Ma Xu is also developing a set-top box for streaming movies and TV shows.

Informed sources said Smartphone Amazon entered the hardware business and set-top boxes are just two elements of the broader plan, the plan also includes an audio streaming equipment and equipped with glasses-free 3D display for high-end smartphones. People familiar with the matter said, Amazon's Lab126 laboratory located in Cupertino, California, each device under development was named as project a, b, c, d, are collectively referred to as alphabet (Alphabet) project.

While Amazon plans to publish some of these devices in the coming months, but insiders warned that part or all of your device may be shelved because of the performance, financial or other concerns.

But Amazon will be entering the hardware market has gathered many manufacturers. Market research firm comScore released data show that in the smart phone market, Apple and Samsung occupied during the first quarter United States market share of 61%, which makes less than 10% every other manufacturers such as HTC. Nokia, RIM and other once-dominant device manufacturers have been unable to keep up with the pace of innovation in the field of intelligent machines, continued market share erosion.

Hot Point Track About Apple iPhone 5S

On May 28, with the upcoming release of Apple next generation iPhone, associated rumors, but had not broken, today inside Foxconn has once again exposed the latest news about iPhone 5S. According

to Foxconn's internal news show, Apple iPhone 5S screen border will become narrower. At present, the company began production of this preparation on the screen, September shipment.

In addition, there is news showed that it will have 1.5 million the number of pixels on the screen of the iPhone 5S, and would continue to use a 4-inch screen. Compare with the iPhone 5, iPhone screen resolution of 5S will be greatly enhanced.

In accordance with past habits of Apple products, iPhone 5 and iPhone 5S design is basically the same, screen 4 inches screen ratio remained 16:9. If this is true, then Apple iPhone 5S screen resolution will up to 1630x920 pixels .

Apple's supply chain to the China Securities news reporters, Apple launched the "low end" iPhone 5S (provisional name) have turned to the probability of the event. These people said, Apple launched the iPhone in the second half of the 5S, the relatively low-end version will be powered by a sale at this "low-end" iPhone5S sells price estimated at around 3,000RMB. Touch screen of most concern in the industry standard, in-cell standard abandoned due to cost reasons, GF2 standards will be adopted for use in iPadMINI. For the sales of products, supply chains are more optimistic.

Rumors about the low-end iPhone 5S will be published. Serious test of the growth due to Apple's recent performance, together with the company is done on the iPad for the corresponding try this rumor more and more concern in the industry.

According to the supply chain sources, Apple released iPhone 5S in the second half has a relatively low order of products when introduced, namely market rumors is the cheaper version of the iPhone for a long time. Of course, cheap is just as opposed to iPhone, this model the price equivalent to 3,000 RMB, and Smartphones as a whole is still on the high end.

Analysts believe that Apple pricing reasons, in addition to cost, there are considerations based on iPhone's own brand value, if the pricing of the product less than 2,500 Yuan or even lower, adverse impact on brand value to the iPhone.

The Cabinet, low-end iPhone 5S plastic enclosure will be used. Due to material causes, iPhone only black and white two colors to choose from in the past, and this product due to the plastic casing, will make its colors significantly richer. The supply chain people said, multi-color low-end iPhone 5S strategy, not only targeted appeals, will also bring the whole new wave in Smartphone

industry.

This year apart from Apple, and OGS in the industry (One glass solution) manufacturers also more stained glass in product research and development, more color will be a trend of smartphones this year.

iPhone5 uses the industry's most advanced in-cell technology for the preceding period, kept Apple's established high-end positioning, but yield issues also affect the distribution of iPhone5 early progress. It is learnt that, due to the continuing high costs so far, low-end iPhone 5S will abandon this standard, iPad MINI touch-screen standard used by the GF2.

Market participants believe that Apple's move would not only improve the iPhone in Smartphone market share, will also open two or three markets in China a huge market space. The supply chain people said the industry for this type of sale is reasonably bright.

Market cooperation, China Mobile will be "low end" iPhone 5S important driving force. It is learned that the "low end" iPhone 5S TD-SCDMA format will be supported, China Mobile will provide support the product promotion in China. Besides, if the size of iPhone 5S is the same with iPhone 5, so you can use the iPhone 5 cases to dress up your beloved iPhone 5S, just like use bling

iPhone 4 cases to match up your iPhone 4S.

ITO Film supplies tight

Due to Taiwan's news that the GF2 is selected by Apple for iPad5 touch screen standards, there is no doubt that if low-end iPhone final 5S GF2 officially confirms that "low-end" iPhone 5S standard on the touch screen to select this year's supply of ITO Conductive Film had a huge impact.

GF2 more traditional touch-screen films one less layer of membrane structure, but film requires more high. For technical reasons, the vendors of these products are primarily for the Japan business. Recent Japan supply chain trends have indications, media reports, Japan leading East of ITO Conductive Film will continue expansion in the second half of this year, GUNZE also plans to invest 1 billion yen to redevelop transparent conductive film touch panel key material capacity.

Because of ITO Conductive indium tin oxide film raw material comes from the rare earth is subject to the supply of rare earths, Japan's production capacity has been tight, the early stage of iPadMINI orders and buoyant domestic demand in China has made Sun East production of ITO Conductive Film supplies chronically tight State.

In China except the Ou Feiguang and Vanson shares, to ITO Conductive Film production businesses, not many quality is difficult and the Japan match. In Apple's supply chain, driven by Japan prior to China's supply of ITO Conductive Film, a large part of this year will be transferred to Apple, this will adversely affect the touch panel industry in China. But Ou Feiguang and Vanson shares, ITO Conductive Film was in short supply, will be a positive impact. Guosen securities research report finds that Vanson shares as the first breakthrough in Japan monopoly producer of ITO thin films, will enjoy the "high growth" + "route alternative" + "import substitution" threefold good.

Apple iPhone 5S will begin production next month

With the launch of the next-generation iPhone continues approaching, on iPhone5S (may also be named iPhone6) rumors are also more and more. Said foreign media today, iPhone5S of the screens pixels is twice times the iPhone5

According to the source, iPhone5S (or iPhone6) would apply a more narrow borders, are now preparing for production, in September to be on sale. In addition, the product will have 1.5 million the number of pixels on the screen, in contrast to pixels of the iPhone 5 nearly 730,000 number if iPhone5S not continue to increase screen size, and their resolution will be greatly enhanced.

Earlier Japan technology site Macotakara revealed that iPhone 5S will begin production next month, and in September this year to meet everyone, so that the message also has a certain credibility.

According to rumors before the road, the next generation of Apple's flagship iPhone in addition to classic black and white versions, there may be promoting a green and gold version, and is equipped with a fingerprint recognition system, while the main

camera picture will be raised to 13 million. If these rumors are true, then, the next-generation iPhone has more progress than people think.

Developers hope the iPhone operating system a new look, against Samsung Galaxy 4S. New displays will have more style in black and white, and its operation is intuitive and simple. Allegedly, this long John Ive from Apple's design efforts and he hoped not only iPhone, but Apple products that use iOS.

Launches iPhone 5s and iPhone 6 rumours at this stage no specific support, but the previously rumored iPhone will attack foreign emerging markets, in particular the mobile phone increasingly prosperous United Arab Emirates (UAE), local phone rates improve, customer must replace the SIM card to use. Besides, more and more people are concerned with the size, if the size is same with iPhone5, so they can use the cute

iPhone 5 cases to dress up the new iPhone 5S.

In addition, the telecommunications company Verizon lowered the iPhone price, many industry people guess the next generation iPhone might be the fastest will be introduced this summer, because based on past experience, the old phone when you start to cut prices was news of new cell phones coming soon.

However, this iPhone price cuts and the decline of the previous generations of iPhone pre-IPO is not the same, in accordance with the statement of the International Business Times, iPhone 5, prices are still high, especially retailers stock many Australian market, so that these regions before the next-generation iPhone announcement, may not be markdowns.

However, Apple CEO Cook (Tim Cook) has hinted at, iPhone and iPhone 6 5s will not release until September, he even said publicly that Apple would not push new equipment this year.

Previously we reported has next generation iPhone touch controlled screen pixel may upgrade to 1.5 million of message, and now from abroad media of reported is disclosure said, in touch controlled screen size maintained not variable of situation Xia, future of iPhone 5S or iPhone 6 touch controlled screen of resolution may upgrade to 1704x960 pixel, and Apple is consider in next year launched a paragraph 12.9 inches touch controlled screen of flat computer, tentative name for iPad Maxi.

Resolution upgrade

To foreign science and technology media SlashGear reports, if

the next iPhone 5S touch-screen size constant maintenance, exponential growth means that pixel touch screen resolution will have greater improvement. Currently the Apple iPhone 5 number of screen pixels to 727,000, if iPhone pixel to 1.5 million the number of 5S, 1704x960 pixel resolution is required in order to maintain the original aspect ratio, and to provide backward compatibility for applications.

However, from current levels of coverage, seems to be very little on iPhone 5S touch-screen resolution will have multiplied to upgrade, so even though this may become a reality, but perhaps on a future iPhone 6 may occur. Of course, due to the narrow border design, maybe iPhone 5S will have more space to change to touch home key areas.

According to Korea etnews media quoted insiders news that Apple is considering launching a touch screen size to be larger than the current 9.7-inch iPad Tablet products. Allegedly the screen Board or will reach 12.9-inch screen, tentatively iPad Maxi, projected release date is the first half of next year. If the new iPad is coming, we are looking forward to the cheap cute iPad mini cases.

As Apple move of main causes is is iPad size diversified of policy has is confirmed is success of, and from market of angle and market investigation company announced of data see, notebook computer of LCD screen shipments volume is expected to will will reduced, and mobile smart equipment LCD screen of shipments volume is will has more of growth, so first a step occupation market and to other area penetration, apparently more meet Apple of market strategy.

Of course, both the message's authenticity has yet to be confirmed, but including the iPhone and iPad touch screen upgrade is the trend, believe that in the near future we should be able to have bigger screens and higher resolution for Apple iPhone and iPad appears.

Apple iPhone 5S or will be published on WWDC

The launch of Apple's latest-generation iPhone just around the corner, and Apple's privacy policy also details new configuration airless. But on the next-generation iPhone screen resolution will use a burst of new material. Country vector reported said, in touch controlled screen size maintained not variable of premise Xia, the touch controlled screen of resolution of Apple iPhone 5S or iPhone 6 may upgrade to 1704x960 pixel, currently Apple iPhone 5 screen of pixel points number for 727,000, if the pixel number of iPhone 5S reached 1.5 million, so 1704x960 pixel of resolution only to keep original long wide than before, and on currently of application provides backward compatible with Apple iPhone 5.

However, from current levels of coverage, it seems to be very little on iPhone 5S touch-screen resolution, which will have multiplied to upgrade, so even though this may become a reality, but perhaps a future iPhone 6 may occur. Of course, as a result of the narrow border design, perhaps iPhone 5S more space will be available to change to touch home key areas of operation.

Apple Singapore Avago Technologies wireless chip vendor disclosed that Apple iPhone 5S will begin mass production. Meanwhile, Apple Taiwan supply chain also broke news that preparations for the current iPhone is ready for large-scale production of 5S, official production of the upcoming iPhone 5S.

Messages from current exposure, external design of Apple iPhone 5S will be basically the same as the iPhone 5. This news is good for many people, because they can use cue

iPhone cases to dress up their iPhone 5S. But in terms of configuration, iPhone 5S will be improved, and will be adding new features (or fingerprint). Technology will continue to maintain its focus, brings you the latest information. Besides, you can also check this website iCase-Zone.com out.

Apple WWDC will be hold in next week, for which products Apple will be published on the Conference, the industry forecast has been undertaken. Apple also revealed that more messages on their WWDC, the company's CEO Tim Cook said recently in D11 Conference on

Science and technology, this annual event message makes the developer extra exciting.

Cook said Apple's API (application programming interface) is more open than in the past on policy, so as to let the iOS system more flexible, easier to customize. It sets out the general direction of iOS, but he also said that Apple still will not allow features like Facebook Chat Heads cover the entire system. Cook also said that developers may be able to make better use of the system, providing features that could not be achieved in the past.

KGI (KGI Securities) analyst Mingchi Kuo released updated forecasts on WWDC, says new MacBook Pro and MacBook Air may be published in WWDC.

Guo Mingchi report points out that, on the June 10 opening of the WWDC Apple will launch thinner MacBoook Pro, except for camera upgrade, which will lower energy consumption, Intel Haswell processor can extend the battery life. Reports of the carrying the MacBook Pro 13-inch retina display will be thin and light design, and also will increase their mobility. At the same time we believe that its cameras will be upgraded from HD to HD, high resolution retina display support, this will improve the quality of Facetime videoconferencing. â

In addition, Guo Mingchi think Apple will also introduce improvements to the microphone, the new MacBook Air. Just like with-equipped MacBoook Pro retina display screen, design of the new MacBook Air uses the dual built-in microphones. Guo Mingchi also said that compared with the mobile phone, more and more people prefer to make a long distance call on a laptop, so update laptop microphone technology is especially important.

Unique and Bling iPhone 5 Cases in iCase-Zone

According to foreign media reports, about six years ago, Apple's iPhone with new design concept started under market scrutiny.

Stunning sales performance for iPhone also opened the world of Smartphone applications. After that time, smart machine features grows, more and more people would like to use it.

Now Smartphone applications can be described as a huge variety: mobile banking, dating, games, health indicators, monitoring, and so on. Is to be noted that, today's Smartphone development is very rapid, who don't know the next generation of smart phones will be like. Although our smartphones can be installed inside of one kind or another "helper" program, but sometimes we feel also lack something. If it is coupled with personalized cell phone accessories, it is perfect.

iPhone cell phone accessories now has become almost an industry, all kind of mobile phone casing and accessories dress up pretty iPhone. In addition to basic decor, the functionality of iPhone mobile phone accessories are also increasingly prominent. Phone case can defend itself, it can be used to open beer and even some cell phones can also be used to watch movies. This article collects several innovative iPhone cell phone accessories for readers.

iPhone case has a bottle opener. Have this weapon in hand, you won't miss a call, don't miss any more bottles of beer. Real iPhone cell phones also can be used when drawing board on the back of the shell. The iPhone phone case back with pepper spray, girls used to pepper tool. This is a powerful than pepper spray self defense phone case, because it has 650,000 volt stun gun. But at home it is embargoed, so we had been eye addiction. Do you like these unique

iPhone 4 cases ?

This Mobile Shell installed a high-resolution camera, to better meet user demand for mobile photography, the phone shell configured with a 180 degree fish-eye lens, twice the focal length, 67 times wide-angle and micro-lens. For many girls, most of them like use bling

iPhone 5 cases.

Despite the shock of Samsung Galaxy S4, Apple iPhone 5 is currently the most popular phone, slim appearance, fashion modeling, fluid systems, all these things is the Apple iPhone 5 reasons for success. This ancient old meimei iPhone5 series Flip case must be the best mix of iPhone5, some people may not like this flip-top cover, but for iPhone5 paint off the cell phone, and

protection comprehensive protection is more suitable for it.

Ancient ancient meimei iPhone5 leather Flip case + leather back shell with PC shell design. Fall-tolerant PC shell, weight and general strike has no effect on it, to protect the love machine. External selection of a whole sheet of high quality leather, fabric and grey Microfiber lining, elegant, delicate, strong and durable.

Protective sleeve holes reserved of front cover of the handset, you can close the front cover after answering the phone, still keep speech free. While protecting screen cleaner, more convenient than hand answered. Front cover of built-in mini suction cups in two soft silicone material, lightweight, iPhone5 into bottom, close the front cover, suction cups can easily be attracted to the screen, make the sleeves and body form a perfect whole, no peel off, bring to their care.

iPad 5 and iPad mini 2 Release Date

The wait for the iPad 5 and iPad mini 2 release date may have just gotten a little bit longer if the latest rumors about Apple's next set of tablets prove true.

The reason behind this reported delay stems from the fact that Chinese manufacturer Foxconn is out as Apple's iPad-producing partner, according to the International Business Times, noting Foxconn itself has hinted it's not leading the new slate charge.

The Apple-Foxconn split is reportedly "due to the unreliability" of Foxconn, which is said to have created woes for Apple with scratch-prone iPhone 5 handsets and up to eight million returns.

Foxconn is also producing Android handsets and even announced its own wearable tech that could compete against the long-rumored

Apple iWatch.

While Apple's new, unnamed supplier remains unknown, the Cupertino-based company may need some extra time due to the switch.

Release date ring around the rosie

Of course, no one really knows when the follow-up iPads are due, especially as Apple itself has never claimed the tablets are in the works (though, come on, we know how its refresh cycle rolls). To that effect, we've heard months thrown out from the left and right.

The IBT report claims that previous predictions indicated an iPad 5 and iPad mini 2 release date in July, before iOS 7 even goes public.

Other release date rumors peg Apple's next tablets for an October launch, one year after the launch of the iPad 4 and iPad mini.

Today's report doesn't have a updated release time frame attached to either the iPad 5 and iPad mini 2, so the launch of these two tablets could possibly have been pushed back to October do the the Apple-Foxconn rift.

iPad 5, iPad mini features

While the iPad 5 and iPad mini 2 launch dates are a big question mark at this point, there's a better indication as to what features we'll see from the forthcoming tablets.

Rumors have indicated that the iPad mini 2 will be refreshed with a Retina display resolution of 2,048 x 1,536 pixels. Besides, most people are looking forward to the new

iPad mini cases.

Behind its same 7.9-inch screen the heart of the tablet is likely to be the Apple A6X processor, an upgrade over the current model's A5 System on a Chip.

The iPad 5, meanwhile, may introduce the Apple A7 chip if the iPhone 5S doesn't beat it to the punch in September.

Its upgrade in processor speed may be accompanied by a downgrade in weight, as the full-sized iPad for 2013 is said to be 33 percent lighter than last year's model.

With rumors circulating that the iPhone 5S will launch in late September, it's only a matter of time before we start hearing about the new iPads coming down the non-Foxconn factory pipe.

Different Colour Variants For iPhone 6 and iPhone 5S

A new rumour claimed that the alleged low-cost iPhone 5S will come with 3.5-inch screen display like with the iPhone 4S's.

Moreover, the device is also speculated to be available in different colour variants similar with the 5th generation of iPod Touch.

It seems that Apple is jumping in the bandwagon of releasing affordable handsets to expand its target market. According to the sources cited by Taiwanese tech-business Web site DigiTimes, tech giant Apple is set to release the rumoured cheaper iPhone 5S with 3.5-inch screen display on Q3 2013.

Thus, many speculated that the flagship iPhone 6 may retain the current screen size of iPhone 5, which is 4 inches.

Recent leaks from the Apple supply chain indicated that the handset would retain the four-inch screen of the iPhone 5, with cost-savings coming from substituting premium materials for a plastic shell and skimping on processor brawn.

Another rumour about the low-cost smartphone from Apple is that the device will be available in different colours like its cousin iPod Touch 5th Gen. Purported images of iPhone 5S leaked online over the past weeks claiming that the iPhone 5S is true and is, indeed, coming. Besides, the new
cute

iPhone 5 cases will coming.

However, Apple CEO Tim Cook initially said in his D11 interview that Apple is not working on a low-cost smartphone and will not release such device in the near future.

Rumour has it that the next iPhone will include a faster A6X processor, larger storage capacity up to 128GB, added security feature such as the fingerprint sensor and longer battery life.

The alleged low-cost iPhone, on the other hand, is rumoured to have the specs of either the iPhone 4 or iPhone 4S and will be available in a variety of colours.

The devices are expected to make its debut later this year.
Rumour has it the smartphones will be released in September.

Can Apple iPhone 5 C save Apple

Entered in August, the annual "Apple new product exposure season" will be the climax. Unlike the previous years, we may not usher in a new iPhone, but two iPhone, while iPad mini 2 and iPad 5 may also be have come after the new iPhone was released. In the near future, according to legend, because of fingerprint sensor problems, the new flagship iPhone 5S delayed shipments, so most of the exposure and disclosure of information were focused on the cheapest version of the iPhone--known as the "iPhone 5C". Following the real machine shell, after packing boxes, and exposure of a protective shell, on the Internet and as a real machine video iPhone 5C, take a look at.

Spy photos exposed is the same as before designing
We can see in the video, iPhone 5 should be placed on the left side, right side is suspected iPhone 5C shell, first of all, judging from the overall volume and, basically, iPhone 5 consistent size, but the back cover made of plastic, but judging from the workmanship and details on the design, is in line with Apple's customary delicate style. However, when after the fuselage upside down in the video, the screen Panel is black, with the exposure of the white Panel some time before, but reserved a front-facing camera above the receiver details, so in accordance with the legend before parameter.

Combining exposure all information, you can determine as a cheap version of iPhone, iPhone 5C is made of plastic body, with a variety of optional back cover color, 1.2 million-megapixel front-facing camera, and 8 million megapixel rear camera, and dual-core A5 processors. If the size of iPhone 5C is the same with

iPhone 5, so we can also use

iPhone 5 cases to dress up your new iPhone 5C.

iPad 5 casing videos at the same time exposure

Surprising is that exposure while bringing the suspected iPad shell 5 video. You can see in the video, iPad 5 adopted a similar narrow border design iPad mini, compared to the iPad on the left marked reduction in overall volume 4, according to the exposure before design plans, measurements of the machine dimensions 232*178.5*7.9 mm or so, more excellent portability. Hardware, the Retina is still powered by a 9.7-inch screen, and has a more powerful processor and video card configuration.

Although the exposure of both video and does not deal with the new content, but it is even more iPhone 5 and iPad 5C design, of course, does this also mean more and more lax about Apple new product confidential mechanisms? In any case, the answer is very likely in the next two or three months to find out, let us wait.

2013 Newest Chanel iPhone Cases

This fun and desirable design that can surely satisfy your sense of style, this protective case with a Chanel Lego design is precisely made for your iPhone 5. Crafted from fine quality Silicon material for durability, this protective case is made to protect your iPhone 5 from against any type of danger such as scratches, bumps, and abrasion. It has accurate holes to easily access buttons and ports.

Chanel Lego iPhone 5S cases

2013, a year filled with innovation, variety, structure and inventive outlook and I am not referring to the Empire State Building or the Eiffel Tower but instead the handbag that has

become an instant worldwide showstopper: the Chanel Lego handbag from 2013 spring/summer collection. Karl Lagerfeld continues to illustrate his supreme sense of artistry and articulation through his inventive and at times ambitious designs. It is obvious that Lagerfeld's inspiration for this impeccably structured creation was the art of childhood. In fact, reminiscing about the good old days playing blocks has resulted in yet another genius fashion contribution from the 79 year old fashion mastermind. What is more, it also launched the Chanel Lego iPhone 5S cases for iPhone users.

Chanel Boy iPhone 5S cases

Introducing the Chanel Boy Bags for Fall 2012 including the new Taj Mahal and the Le Boy bags. Prices for the boy bags range from a low of \$3,900 USD for the Lambskin solid color flaps, to a high of \$9,300 for the new Taj Mahal python gold and bronze bags.
