School

Hi, everyone my name is Kristy. This is basically just a little entry in my journal about my journey on the way to getting my degree in Medical Coding and Billing. I'm going to school to get a degree because I believe that in the long run this will help me. Not everyone seems as sure as I. These loans are piling up and its starting to get crazy. The stress seems to be at an all time high. But I know once I am done I will be in a great career that I love.
