```

What are these important factors of a

video converter

? It is a problem we must think about. Like iPad, a popular Apple product that makes millions of people be its fans. It needs a video converter to convert these video formats to another format it supports. So we should think about these important factors of a video converter.

Format, Speed, Quality, Easy to use. I think the four are the important factors of a video converter. To "format". The more formats a video converter supports, and the more format problems we meet can be solved.

To "speed". If we have a lot of videos to be converted, and then, the conversion speed is very important, some converters support batch conversion, that makes the conversion more fast and convenient. To "quality". I believe that we all don't like to put a HD video into the converter, but the output video is bad in quality. Because we all like to watch HD videos. To "easy to use". Easy to use is important, maybe you don't think it is important. But to some new users, it is rather important. And of course, it is important to all users.

Ok, I've said so many reasons and I'd like to introduce a good video converter which has these four important factors. It is the iStonsoft Video Converter.

Format

the istonsoft video converter can convert

all

popular video files from one format to another. Such as avi to mp4, flv to mov, mkv to mp4, flv to mov etc. so it can support nearly all video format.

Speed

the istonsoft video converter

supports multithreading process and batch conversion, the

Multithreading process makes you to convert a video file more fast, and the batch conversion makes you to convert a lot of video files more more fast at the same time.

Quality

quality is always very important . the istonsoft video converter can convert HD videos from one format to another with an excellent quality.

Easy to use

the istonsoft video converter has a very simple interface and keeps the confusing choices to a minimum. Support drag-and-drop functionality and provide a huge range of presets for iPad, iPod, iPhone, Apple TV and more. Video conversion with iStonsoft Video Converter is now a breeze.

In all, iStonsoft Video Converter is an excellent Video Converter software for you to convert all popular video files from one format to another with great output quality and high conversion speed. With iStonsoft Video Converter downloaded and the video converted, you can easily share your favorite videos online with your friends or enjoy with your portable players on the go!

mso-fareast-font-family:??????;
mso-fareast-theme-font:minor-fareast;
mso-hansi-font-family:Calibri;
mso-hansi-theme-font:minor-latin;
mso-bidi-font-family:"Times New Roman";
mso-bidi-theme-font:minor-bidi;
mso-font-kerning:1.0pt;}
```

Ipad is very popular now, you can see apple fans in almost every country. Ipad is a good product, people like it very much, but the format problem always makes it to be not so perfect. To meet the demand of apple fans, a lot of video converters appeared. Most of them are multifunctional, so we can often see some video converters with a lot of functions, sometimes it is not so convenient to use them to convert videos to ipad, especially for some new users. So It seems to be not so perfect for ipad. So I'll introduce a Video converter designed for ipad.

iPad Video Converter

is a professional Video Converter for iPad users to convert all popular video formats including AVI, MPEG, WMV, DivX, H.264, MKV, RM, RMVB, MOV, ASF, 3GP, VOB, H.264/MPEG-4 AVC to iPad/iPad 2 MP4 formats with super speed and excellent quality, as well as extract background music from videos and convert them to iPad audio formats.

Then how to convert video to iPad and put video into iPad? Do it with a iStonsoft iPad Video Converter, which can help you convert videos to iPad in 3 steps

Step 1 Download and install iPad video Converter

Of course, you should download and install it at first, and after the installation of the converter software, you will find an icon on your desktop, and you should click it.

Step2 Convert videos to ipad

Click "Add" to add your videos to the converter software, then you can choose the output profile you want for ipad. Because it is a video converter designed for ipad , so anyone you choose

will be supported by your ipad. Compared with other converters , it is rather convenient and easy to use. Ok, after you choose the destination, just click the "start" button to start the conversion.

Step3 Move the output video to your
ipad

I think this step is so easy to you,
but I still want to tell you once more, and so it
will be perfect. Connect your Apple iPad to PC and
sync converted video to iPad with Apple iTunes. Now
you can have wonderful iPad videos, and so you can
share them with friends and family via iPad
anywhere and anytime.

Ok,It seems that everything has been finished , oh, I've forgot to tell you that the converter software and these steps are also ok for ipad2!

```

You

are an apple fans, and you have an ipad, you like to use the itunes to move videos, music and other things you like from your pc to your ipad. Thus you can enjoy these good things on your ipad, good ,

everything is good, it seems to be so wonderful. And one day , your brothers or your sisters or even your friends , they are interested in these things in your ipad, they like these things very much, and want to have them in their ipads, and you have already deleted them from your computer. What should you do and what can you do?

Apple

fun all know that they can use itunes to move their favourite things from pc to ipad, but can't move them from ipad to pc. So when your friends or your brothers want to have them in their ipads , it seems to be impossible. So it is another problem that troubled apple fun a long time, the first problem is the problem of "format". And now , I want to introduce a good way to solve the problem, so that you can share favourite things from your ipad.

iStonsoft
iPad/iPhone/iPod to Computer Transfer

is
designed to help you

[back](#)

up files from iPad

,

iPhone, iPod or iPod touch. Compared with other similar iPad to PC Transfer software, iStonsoft iPad/iPhone/iPod to Computer Transfer can transfer your favorite music and videos from iPad to PC, iPhone to PC and iPod to PC. This iPhone /iPod/

iPad
to PC Transfer

also
enables you to use your iPad/iPhone/iPod as a portable hard drive.

Ok,

I'll tell you how to share your favourite things from
ipad now.

First

, you should download the iStonsoft iPad/iPhone/iPod to
Computer Transfer and install it on your computer. And
now , you should make sure that the itunes is already
installed on your computer and your ipad is connected to
the computer.

Second,

launch the software, and you will see the interface of it
, click "select" to choose your device. Of course it is
your ipad. Then click "Advance" to choose the "option".

You can see the

present output directories and
you can change the directories.

Third,

you only need to click the "file", then "export media" to
choose what you want. Ok , your favourite things are
moving from your ipad to your pc. Then you can use itunes
to move them to another ipad or other apple devices to

share favourite things from your ipad.

The software can also show details and has different view modes, and the transfer speed is very high and it is easy to use. In all, it's really a good way. And you can use it to share favourite things from your ipod and iphone.

How to transfer mkv to ipad

Maybe you have a lot of mkv video files, but just cannot convert them to suitable video formats with your iPad? And now I'll tell

you how to convert mkv to iPad compatible format so that you can play mkv videos on your iPad!

Before converting mkv to iPad, you should know the best format of iPad is 1280x720 MP4 (H.264/AVC video codec, AAC audio codec), so you just need a good video converter to convert your mkv videos to right iPad MP4, then transfer the converted videos into iTunes and sync it to your iPad.

iStonsoft Video Converter does a good job. It can convert your video files to various formats for playback on most popular players including iPad, iPod, iPhone, Apple TV, Zune, PSP, etc. When acting as an mkv to iPad Converter, it can help you convert mkv files to iPad with a fast speed and excellent quality.

Following is the guide on converting mkv to iPad :

Step 1: Launch the iStonsoft Video

Converter and click "Add video" to load the mkv files you want to play on iPad.

Step 2. Select output format from the "Profile" drop-down list and set an output folder for converted files.

Step 3. When settings done, click the "Start" button to start converting mkv files to iPad.

Step 4. Transfer output videos to iPad

Ok, everything is ok now, you can watch videos on your iPad! With this video converter , you can also convert mkv files to iPod, iPod touch 4 HD, iPhone 3G, iPhone, etc. In all, you can easily share your favorite videos online with your friends or enjoy with your portable players on the go!
