We love Blu Ray, but we need to rip blu ray

We all know TS files are difficult to use and have some problems, we don't like. So we usually

convert TS Files to other format. At this time we need a converter which can convert TS Files. Many people like MP4 format, because general mobile phone all can play with high image quality, we can enjoy the movies everywhere.

Now we have a powerful tool called

TS to MP4 Converter, with this Converter, you can convert MPG, VOB, DV, MOV, WMV, MP3, 3GP, FLV and RMVB videos to MP4 format. Just through few steps:

Step 1: Add files

There are three ways to add files:

One: Click "ADD video" button on the toolbar, then choose video, audio files you want in the dialog that opens.

Two: Click "File" to open the file menu, then select Add Video or Add Folder option to load your source files.

Three: Use a direct way, drag the video and audio files into the file list window directly.

Step 2: Set MP4 files

Click "Profile" box then choose an output format for the selected file.

Step 3: Choose destination

Click "Browse" button to choose your willing MP4 output destination.

Step 4: Output settings

Click "Settings" button to set video by setting Encoder, Frame Resolution, Aspect Ratio and Video Bitrate and set audio by setting Encoder, Sample Rate, Channels and Audio Bitrate.

Step 5: Convert TS to MP4

You can click "Convert" button when finished all the settings.

Except for the Converting functions, you can also have some edit functions, like "Trim", "Crop", "Watermark", "Merge". Take "Trim"

for example. Click "Trim" button on the toolbar to open the Trim window, or you can click "Clip" menu and choose "Trim" option. Here are four ways to "Cut down" your video length:

One: Drag the "Start Point" scissors to mark the beginning of the clip, and drag the "End point" to mark the end of the clip in your preview time.

Two: Press the "Mark in" button to mark the beginning of your clip and "Mark Out" button to mark the end of your clip.

Three: Input the time in the "Start Time" and "End Time" box.

Four: Click the up or down arrows to get desired time value.

It's very easy to operate as well as the "Crop", "Watermark" and "Merge" function, you can free download and have a trial. Maybe you don't want MP4 format, you may think 3GP format is better. Then you can try

TS

to 3GP Converter

, this converter can not only convert TS files to 3GP, but also convert TS to other popular video formats including FLV, AVI, 3GP, MP4, etc. This converter is also very easy to operate with very little converting time.
