Hello

Hi there,

This is my first post. Don't really know what to say at the moment. I'm not feeling well so my brain is in power saver mode and not working really well. Write more another time.

Tired...Why do I bother

I Am so tired. Why am I typing. I don't know. I should go brush my teeth and collapse into bed. Why do I have to feel this way? I'm sick and I don't like it. I am so depressed. I don't want to feel this way any more.
