Factors for Metin2 EXP Gain

Hello guys, here is Goldceo!

Here we will introduce you something about factors for Metin2 EXP Gain, if you are a new player to this game, please read the following description. By the way, if you want to buy cheap Metin2 gold, please go to our site and have a look, we have enough stock anytime.

It means that each monster has a certain capacity of exp, but you will get more exp on condition you deal the more damage. Here we offered the cheapest Metin2 yang. This also means that you do not need to actually kill the monster to gain EXP, simply dealing damage to it will give you something. Level gap. The larger the level gap is, the more or less exp you gain. The amount is not constant, and it's also a pretty big gap between each color. The difference between yellow color monsters and red color monsters is quite substantial. Optimal mobbing. In order to gain the most possibly experience in one hit, it is best to attack 4 monsters at once. When you exceed 4, you may hardly bring in any extra exp to the table. That is why people who mob 8 monsters at once gain just about the same amount as those who only mob 4.

In another aspects, Rumours have surfaced about a mysterious cave in Desert Scream, with a fantastic treasure hidden at the end of it. Several parties of explorers and treasure hunters have left to try to claim this treasure for themselves, and follow in the footsteps of the famous explorer Showarai. None have returned. The authorities of the colony in Desert Scream has ordered an investigation of this matter, to determine whether or not a threat exists in the cave the local inhabitants now call 'Panic Cave'. Rumours of strange noises and rumblings from deep within the earth has only made a quick investigation and report even more essential. It is now up to the bravest warriors to venture into the cave, to discover what happened with the lost explorers.

If you have any interests, please come here and our service is for 24 hours every day. We promise you will be greatly satisfied here!

Simple Metin2 PvP Fighting Guides

Dear friends, happy to see you in Goldceo!

If you have no time to earn Metin2 gold!¼?you can buy it from our website at the lowest price. Here we will provide you some Simple Metin2 PvP Fighting Guide, and I got it from other websites, hope it could help you.

You must train your Combo. Neither you or the other players around can emphasize how important Combo is, it makes sure all your skills(Metin2 yang) hit, and plus cancels the unimportant part of your skill-casting; short and sweet, your skills cast faster. Fade Step and Dash accordingly, and use them in Combo too. Fade Stepping is a strange one, most ppl thinks hey, Fade Step is useless. but lemme tell you something:Fade Step does to your opponent as a mob dying does to your opponent.They lose target on you, they have to click on you again, that's wad makes Fading so cool and make PvPs more "high"! Master on your butt later. Dashing is the trick to winning for melee characters. 'Coz Force Archers and Wizzies won't be dashing that often in PvPs you'll want to use one Dash to cover two of their Fade Steps.

You should keep your enemy in front of you, at all costs. Use the Force, Simple enough, nobody likes getting b-sed at the wrong moment. Get a good mouse, if you did not make sure your swing hard and good with your old ghey Digitek mouse. Please make sure your opponent is in front of you, adjust your cam accordingly. When they're in front, you dun need to panick that much when they fade away. Scroll in or out accordingly, don't zoom in too much so that you can only see your own character, but do not zoom out too much either, hard for you to click on your target. Their Fading gets very annoying after a while, especially if you let them knock you down from afar; start your combo with a dash!

If you have any interests, please come to our website and here we promise our best service could satisfy you at any time, we are serveing you 24 hours everyday.

Thanks for your reading and have a good time.

FAQ Introduction in Metin2(part two)

Hello friends, happy to see you in Goldceo!

Here we gather some basic Metin2 FAQs for you and I got it from other websites. If you are in urgent need of some Metin2 gold, welcome to place orders from us, we will deliver the gold at the lowest price in an instant.

How can you see the monsters level stats?

Once you spot a monster, right-click on the monster to observe it's stats. The cheapest Metin2 yang is offered here. By default the setting to do this is a right-click, you may change the setting to left-click if you wish in the game options. If you notice, there is a box to the very right of experince bars and there is box to the very left of character stats button which has a head as its display. These two boxes correspond to the left and right mouse buttons and allow you to switch and choose which button to use as attack and which one to use as camera. Which ever one is set as camera will allow you to see stats of monsters when you move your mouse over the monster and use that button.

How can you tell where you are in minimap?

On your mini map you will find a arrow shaped icon try turning around to make sure this icon is your character. Someone is annoying you, is there a way to block them from whispering you? Open your Options Menu un the game, and look under "Block" then click on "Whisper" and you will block all incomming Whispers. You are stuck between

buildings, please help! Please contact a GM by email or in the game mail and we will release you ASAP.

Where can you see item information?

Item information can be found by moving your mouse over the item. A box will appear letting you know the name of the item as well as what the item will do.

How do you recover HP and MP?

Over time your HP and MP will automatically recover, also you can use potions to recover your HP and MP.

Thanks for your reading and enjoy yourself.
