Is there any way to share or transfer
Kindle books with another Kindle owner? How to
move books from old Kindle to new one? Can
Kindle books be shared? Is the possible? In
this blog, you will find the answer!

To transfer Kindle books to another Kindle, just do as the following steps easily.

Step 1: Connect your old Kindle to your computer.

The Kindle's files should be available as a drive under "Computer." Click it and open the drive.

Step 2: There should be multiple folders. Open them one at a time and drag selected files from the Kindle and drop them onto the computer's hard drive to transfer ebooks and other documents from the Kindle to computer.

Step 3: Connect another Kindle to your computer and transfer the documents you want onto your new Kindle. Place audio books in the Kindle's "Audible" directory and place ebooks and other reading material into the "Documents" directory.

That's
all of steps to transfer Kindle books to another
Kindle. Very easy, right? Some Kindle books have
DRM protection, you may need to remove DRM from
Kindle with

kindle
drm removal

software.

There are many such professional drm removal
software in the market, such as

mp4
drm removal

,
zune drm removal,

wma
drm removal

,
pdf drm remover, etc. users can have much
convenience.

Have collected some precious AVI video files, however just cannot convert them to suitable video formats with your new iPad? This blog will tell you how to convert AVI to iPad compatible format so that you can play AVI videos on iPad freely!

Before converting AVI to iPad, you should know the best format of iPad is 1280x720 MP4 (H.264/AVC video codec, AAC audio codec), so you just need a right

avi to ipad converter

to convert your AVI videos to right iPad
MP4, then transfer the converted videos into iTunes
and sync it to iPad.

Here Wondershare Video Converter Platinum does a good job. It can convert your video files to various formats for playback on most popular players including iPad, iPod, iPhone, Apple TV, Zune, PSP, etc. When acting as an AVI to iPad Converter, it helps you convert AVI files to iPad with excellent quality. Following is guide on converting avi to ipad :

Step 1: Launch the AVI to iPad

Converter and click "Add video" to load the AVI files you want to play on iPad. Step 2. Select output format from the "Profile" drop-down list and set an output folder for converted files. Step 3. When settings done, click the "Start" button to start converting AVI files to iPad with the AVI to iPad Converter. Step 4. Transfer AVI to iPad

Done! Now you can eject your iPad from

iTunes and watch videos on your iPad! With
this

best video converter mac

, you can also convert AVI files to iPod,
iPod touch 4 HD, iPhone 3G, iPhone, etc.

```

"I would like to embed a video clip into a powerpoint presentation and then make that presentation available to others. I can get the video clip into my presentation and I can run it from my computer. However, when I've emailed the presentation to others, they are unsuccessful at getting the video to play. Any suggestions?"

Nowadays, it is popular to

embed video in
powerpoint

, which can make PowerPoint presentation much more entertaining and informative to its viewers. However, PowerPoint only inserts few video formats including ASF, AVI, MPEG, and WMV. What if to insert videos in other formats like YouTube video, iTunes video, iMovie video, and more?

In that case, you need to convert the videos you want to add to Powerpoint to certain video format that is supported by PPT. This article will describe a step by step guide on how to insert video to PowerPoint presentation so as to successfully play videos in PowerPoint.

There are four steps you should follow :

Step 1: Run Video Converter and click the first button on the top, and if you want to download web videos, you can click third button to enter url and download videos.

Step 2: When you have loaded the videos, the videos will appear on the interface of the software. Click the image button next to the videos, and choose an output format supported by PPT, such as asf, avi, mpeg, or wmv.

Step 3: Specify an output folder

to store your converted videos and click Start button on the bottom of the software to start conversion.

Step 4. Open your PowerPoint

presentation. Embed your video by using the "Insert", "Movies and Sounds", and "Movie from File" commands. Navigate to the video file you saved on your desktop and click "OK."

With this ideal video to

powerpoint converter

, just enjoy inserting any kind of video into PowerPoint like inserting videos from YouTube to PowerPoint, iTunes to PowerPoint, iMovie to PowerPoint and more.

Steve Jobs's Patience Make Apple Success

Guide

language: Barron published online that it was Steve Jobs' patience make the achievement of Apple's glory today. Since 1997, Apple's shares soared 7000%, but this doesn't occur overnight. So, don't feel disappointed for Apple iPhone 4S.

The

following is the content :

Steve

Jobs can't make home run at each time, but compared with most CEO , Steve Jobs can have more players on base, this situation is totally advantage for Apple. Let game (note: home run is a attack method that batter hit each other's ball, then the batter ran one, two, three base in turn and return to home plate safety.

This point

often ignored by many apple analysts , it is worth us to explore in the moment of current global attention in future destiny.

Apple's
iPho

ne 4S released

Tuesday makes many apple observers are disappointed, they think that iPhone 4S hasn't much ascension compared with the iPhone 4. Also, analysts wrong again.

Since Jobs returned

to apple in 1997, Apple's shares soared 7000%. But this results achieved did not in overnight, it is a steady process of ascension.

The
initial idea for iPod came from an independent contractor

Tony Fadell, but
this caught Job's attention immediately.

After
several years deep consideration
, Jobs make
iPod a music equipment which closely tied to people
life.

Sometimes, some
new products published by Jobs are not accord with many people
value , but they brought huge revenues for Apple. iPhone 3 GS
roll out in 2009 and iPhone 3G in 2008, they seems to have no
much difference, it makes some people disappoint.

But
Investment Bank Piper Jaffray analyst Gene Munster
points out, iPhone 3G sales increase 75% after it listed first
year, and iPhone 3 GS sales increase 95% when it listed. So
Jobs doesn't make surprise for people every day, he will make
product optimization in the foundation of initial success ,
then lay the foundation for further growth.

And now what will
apple to be after Jobs died ? Sanford Bernstein analyst Toni

Sacconaghi said that these are three answers for this question.
The first: when losing Steve Jobs, with the passage of time,
Apple will feel the loss of Jobs. The second: Jobs' genes have
been penetrated into Apple employees, they will benefit from
it. Third: Apple still has a huge growth space. Jobs is truly a
successful businessman, his children iPad, iPod, iPhone truly
offer us much convenience and bring more other software, such
as

iPad to PC
transfer

, iPad photo
editing ,

iPad video
converter

, iPad converter
for Mac , iPad 2 video converter, etc.

Gustav
have
argued that, Apple
products will have Jobs' imprint in the next five years, this

products include Apple intelligent TV. Apple investors have great return potential. The current Apple stock is at \$369.80 per share, only diluted earnings expectations of 11.3 times for next year, growth space is enormous. And Apple still has a share equivalent to \$81, the profits expected to rise 18%. In addition, Apple may send dividends and buy back shares. Of course, as Apple cash increases, Tim Cook and the board of directors have better obligations.

New York

October 16, Gartner gave a report on Tablet PC development. The report shows iPad was overwhelming in the tablet PC market . Until to 2014 Apple will continue to occupy 50% market share.

Gartner reports that this year the iPad Tablet PC sales share reached 73.4% in the global market, in addition to Android Tablet PC , other Tablet PC share was no more than 5%. The report also noted that Apple will occupy more than 50% market share in 2014.

Milanesi, Gartner vice president, said that although iPad sales expected market share dropped from 83 percent last year to 73.4% this year, but its competitors can not provide a similar experience to Apple, it will not affect Apple's sales.

Gartner also reduced expected sales value of Android, Milanesi said, "As Android tablet by high prices, poor user experience and application of too few restrictions, Android Tablet PC

sales will be greatly reduced in the future."

In addition, reports are not good for Windows 8, Because windows 8 released too late, subsequent development will be limited, so most of the future users come from business users.

Apple is still such a technology company which always lead technology trend. Its products ipad, iphone, itunes, ipod, etc are so popular, they bring us much convenience and joy. And Apple also promotes other software develop, such as

ipad converter mac

, ipod to pc transfer, ipad video converter,

ipad to pc
transfer

, iphone video converter,
etc.
